National Institutes of Health

Submission for OMB Review; Comment Request; Preventing Motor Vehicle Crashes Among Young Drivers

Summary: Under the provisions of Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the National Institute of Child Health and Human Development (NICHD), the National Institutes of Health (NIH) has submitted to the Office of Management and Budget (OMB) a request for review and approval of the information collection listed below. This proposed information collection was previously published in the Federal Register on June 13, 2006, page 34142, and allowed 60-days for public comment. No public comments were received. The purpose of this notice is to allow an additional 30 days for public comment. The National Institutes of Health may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

Proposed Collection

Title: Preventing Motor Vehicle Crashes Among Young Drivers, OMB No. 0925–new.

Type of Information Collection Request: New.

Need and Use of Information Collection: Motor vehicle crash risk is particularly elevated among novice young drivers during the first six months and 1000 miles of independent driving. Previously, researchers in the Prevention Research Branch of the NICHD have demonstrated the efficacy of the Checkpoints Program for increasing parental management of teen driving and reducing exposure to high risk driving conditions during the first 12 months after licensure. The current research seeks to test the effectiveness of providing an educational program entitled The Checkpoints Program to facilitate parental management of teen driving when delivered at motor vehicle administration offices at the time the teen obtains a permit, at the time of license, or at both permit and license. Frequency of Response: 3 times over two years.

Affected Public: Individuals or households.

Type of Respondents: Adolescents and parents/guardians.

The annual reporting burden is as follows: Estimated Number of Respondents: 4000; Estimated Number of Responses per Respondent: 3; Average Burden Hours Per Response: .35; and Estimated Total Annual Burden Hours Requested: 4,200. The annualized cost to respondents is estimated at: $42,000 (based on $10 per hour).

There are no Capital Costs to report. There are no Operating or Maintenance Costs to report.

Request for Comments: Written comments and/or suggestions from the public and affected agencies are invited on one or more of the following points: (1) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Direct Comments to OMB: Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the: Office of Management and Budget, Office of Regulatory Affairs, New Executive Office Building, Room 10235, Washington, DC 20503, Attention: Desk Officer for NIH. To request more information on the proposed project or to obtain a copy of the data collection plans and instruments, contact Dr. Bruce Simons-Morton, Chief, Prevention Research Branch, DESPR, NICHD, NIH, 6100 Executive Blvd., Rm 7B05, MSC 7510, Bethesda, MD 20892–7510; (301) 496–5674; e-mail: mortonb@mail.nih.gov.

Comments Due Date: Comments regarding this information collection are best assured of having their full effect if received within 30-days of the date of this publication.

Paul Johnson,
Chief, Prevention Research Branch, NICHD, National Institutes of Health.
Ghost Native-PAGE With Colorless Compound Derived From Coomassie Brilliant Blue

Description of Technology: Protein staining dyes such as serva blue G or Coomassie blue are used to enhance the separation of protein complexes by binding to the proteins and differentially enhancing the net charge of the complexes improving the separation of the complexes using electrophoresis procedures. However, the intense blue color of Coomassie stains interferes with immunoblotting and in gel colorometric or fluorescent studies. Available for licensing and commercial development is a colorless molecule that will bind and enhance the differential surface charge on protein complexes. The molecule has been demonstrated to work as well as Coomassie blue but will not interfere in gel assays critical for most investigations. This approach provides biochemists interested in protein complexes in biological tissues with the ability to separate protein complexes and perform in gel assays saving time and resources in this important emerging field.

The compound and methods of its use is for polyacrylamide gel electrophoresis (PAGE) and related gel techniques for the analysis of protein complexes and defects in the same. Such analysis can be extended to the detection of various diseases, e.g., Alzheimer’s disease or Parkinson’s disease. One such compound has the following formula:
can help diagnose or follow up on the progress of a variety of diseases, including Huntington’s Disease, olivopontocerebellar atrophy, epilepsy, schizophrenia, as well as hepatitis, cirrhosis, cholangitis, Gilbert’s diseases, muscular dystrophy, leukemia, kidney inflammation, cardiac infarction, or the presence of a tumor. Thus, tissue AST activity may become a novel marker of brain disorders which has been inaccessible using current clinical technologies.

Applications and Market: Diagnosis and monitoring disease status in a variety of diseases, including Huntington’s Disease, olivopontocerebellar atrophy, epilepsy, schizophrenia, as well as hepatitis, cirrhosis, cholangitis, Gilbert’s disease, muscular dystrophy, leukemia, kidney inflammation, cardiac infarction, or the presence of a tumor. The diagnostic market is a multi-billion dollar market, with a need for more efficient non-invasive techniques, markers and new methods of diagnosis.

Inventors: Dr. Jun Shen (NIMH).

Licensing Status: Available for exclusive or non-exclusive licensing.

Licensing Contact: Chekesha Clingman, Ph.D.; 301/435–5018; clingman@mail.nih.gov.

Steven M. Ferguson, Director, Division of Technology Development and Transfer, Office of Technology Transfer, National Institutes of Health.

National Institute of Mental Health; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Mental Health Special Emphasis Panel; NIMH Eating Disorders Grant Application Review.

Date: September 29, 2006.

Time: 1 p.m. to 5 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Rockville, MD 20852, (Telephone Conference Call).

Contact Person: Bettina D. Osborn, Ph.D., Scientific Review Administrator, Division of Extramural Activities, National Institute of Mental Health, National Institutes of Health, 6001 Executive Blvd., Room 6154, MSC 9609, Rockville, MD 20852–9609, 301–435–1178, ocunab@mail.nih.gov.

Name of Committee: National Institute of Mental Health Special Emphasis Panel; Mental Health Centers for Intervention Development and Applied Research (CIDAR).

Date: October 12–13, 2006.

Time: 9 a.m. to 5 p.m.

Agenda: To review and evaluate grant applications.

Place: Bethesda Park Hotel, 8400 Wisconsin Avenue, Bethesda, MD 20814.

Contact Person: A. Roger Little, Ph.D., Scientific Review Administrator, Division of Extramural Activities, National Institute of Mental Health, National Institutes of Health, 6001 Executive Blvd., Room 6157, MSC 9609, Rockville, MD 20852–9609, 301–402–5844, alittle@mail.nih.gov.

(Catalogue of Federal Domestic Assistance Program Nos. 93.242, Mental Health Research Grants; 93.281, Scientist Development Award, Scientist Development Award for Clinicians, and Research Scientist Award; 93.282, Mental Health National Research Service Awards for Research Training, National Institutes of Health, HHS)

Anna Snouffer, Acting Director, Office of Federal Advisory Committee Policy.

National Institutes of Diabetes and Digestive and Kidney Diseases; Amended Notice of Meeting

Notice is hereby given of changes in the meeting of the National Diabetes and Digestive and Kidney Diseases Advisory Council, September 20, 2006, 8:30 a.m. to September 21, 2006, 12 p.m., National Institutes of Health, Building 31, 31 Center Drive, Bethesda, MD 20892, which was published in the Federal Register on August 18, 2006, 71 FR 47820–47821.

Date: September 20–21, 2006.

Open: September 20, 2006, 8:30 a.m. to 12 p.m.

Agenda: To present the Director’s Report and other scientific presentations.

Place: National Institutes of Health, Building 31, 31 Center Drive, Conference Room 10, Bethesda, MD 20892.

Open: September 20, 2006, 4 p.m. to 5 p.m.

Agenda: Report from the NIH Director.

Place: National Institutes of Health, Building 31, 31 Center Drive, Conference Room 10, Bethesda, MD 20892.

Closed: September 21, 2006, 9:45 a.m. to 10:15 a.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Building 31, 31 Center Drive, Conference Room 10, Bethesda, MD 20892.

Open: September 21, 2006, 10:15 a.m. to 12 p.m.

Agenda: Continuation of the Director’s Report and other scientific presentations.

Place: National Institutes of Health, Building 31, 31 Center Drive, Conference Room 10, Bethesda, MD 20892.

Contact Person: Brent B. Stanfield, Ph.D., Director, Division of Extramural Activities, National Institutes of Diabetes and Digestive and Kidney Diseases, 6707 Democracy Blvd.,
