Approval and Promulgation of Implementation Plans and Designation of Areas for Air Quality Planning Purposes; NC; Redesignation of the Rocky Mount 8-Hour Ozone Nonattainment Area to Attainment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: On June 19, 2006, the State of North Carolina, through the North Carolina Department of Environment and Natural Resources, Division of Air Quality, submitted a final request: To redesignate the Rocky Mount 8-hour ozone nonattainment area to attainment for the 8-hour ozone National Ambient Air Quality Standard, and to approve a North Carolina State Implementation Plan revision containing a maintenance plan for Rocky Mount, North Carolina. The Rocky Mount 8-hour ozone nonattainment area is comprised of two

counties, Edgecombe and Nash. EPA is proposing to approve the 8-hour ozone redesignation request for the Rocky Mount 8-hour ozone nonattainment area. Additionally, EPA is proposing to approve the 8-hour ozone maintenance plan for Rocky Mount, North Carolina. This proposal is based on EPA's determination that the State of North Carolina has demonstrated that the Rocky Mount area has met the criteria for redesignation to attainment specified in the Clean Air Act, including the determination that the entire Rocky Mount 8-hour ozone nonattainment area has attained the 8-hour ozone standard. In this action, EPA is also finding adequate and proposing to approve the 2008 and 2017 motor vehicle emissions budgets (MVEBs) for nitrogen oxides (for both Edgecombe and Nash counties) that are contained in the 8-hour ozone maintenance plan for the Rocky Mount nonattainment area. North Carolina has established subarea MVEBs at the county level so each county must consider its individual subarea MVEBs for the purposes of implementing transportation conformity. Further, in this action, EPA is proposing to find adequate and to approve the insignificance determination for volatile organic compounds' contribution from motor vehicle emissions to the 8-hour ozone pollution in the Rocky Mount, North Carolina area.

National Emission Standards for Hospital Ethylene Oxide Sterilizers

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing two primary regulatory alternatives for new and existing hospital sterilizers that emit hazardous air pollutants and are area sources within the meaning of Clean Air Act section 112(a)(2). The first alternative proposes a generally available management practice requirement for new and existing hospital sterilizers that are area sources. The second alternative proposes that there are no generally available control technologies or management practices within the meaning of Clean Air Act section 112(d)(5) for this source category. We are proposing these two different alternatives because we currently have imperfect information concerning the ability of the proposed management practice to reduce hazardous air pollutant emissions and the cost-effectiveness of such management practice.

This action is being proposed as part of EPA's obligation to regulate area sources listed for regulation pursuant to Clean Air Act section 112(c)(3).
