waste stream designated Waste Stream No. SRS–RL–BCLDP.001 currently stored at the TRU storage pads in the E Area of SRS.

(2) The radiological characterization (RC) process using dose-to-curie (DTC) and modeling-derived scaling factors, supported by radionuclide data from the analysis of 69 swipe samples, for assigning radionuclide values to 87 drum liners of RH retrievably-stored TRU debris in one waste stream, designated as SRS–RL–BCLDP.001, that is documented in CCP–AK–LANL–501; Revision 2, and detailed in the inspection report found in EPA Docket ID EPA–HQ–OAR–2008–0410.

(3) The visual examination (VE) process to identify Waste Material Parameters and the physical form of the waste.

(4) The WIPP Waste Information System (WWIS) to submit data for both characterization and certification to WWIS for RH TRU waste.

(5) The attainment of pertinent Data Quality Objectives (DQOs).

Since no additional WC activities are expected to occur relative to the 87 drum liners of RH debris waste, no changes to the WC activities evaluated during the baseline inspection are anticipated. EPA, therefore, does not expect SRS–CCP to make additional revisions to the documents that were reviewed as part of this inspection and proposed approval limited to the WC processes specific to the 87 drum liners evaluated during the July, August, and December 2007 inspections. In the event that SRS–CCP makes changes to the WC components proposed for approval or implements them to characterize additional waste from the BCLDP activity (e.g., solids or soil/gravel) associated with D&D activities at Building JN–1 at the Battelle Columbus Laboratory, EPA will consider changes that have the potential to affect WC activities to be Tier 1 (T1) changes, as stated above. The inspection report does not list specific T1 or Tier 2 (T2) designations relative to these 87 waste liners and the WC components proposed for the approval at this time.

IV. Availability of the Baseline Inspection Report for Public Comment

EPA has placed the report discussing the results of the Agency’s inspection of SRS–CCP in the public docket as described in ADDRESSES. In accordance with 40 CFR 194.8, EPA is providing the public 45 days to comment on these documents. The Agency requests comments on the proposed approval decision detailed in the inspection report. EPA will accept public comment on this notice and supplemental information as described in Section 1.B. above. EPA will not make a determination of compliance before the 45-day comment period ends. At the end of the public comment period, EPA will evaluate all relevant public comments and revise the inspection report as necessary. If appropriate, the Agency will then issue a final approval letter and inspection report, both of which will be posted on the WIPP Web site.

Information on the certification decision is filed in the official EPA Air Docket, Docket No. A–93–02 and is available for review in Washington, DC, and at three EPA WIPP informational docket locations in Carlsbad, New Mexico. The docket in Carlsbad contains all major items from the official Air Docket in Washington, DC, plus those documents added to the official Air Docket since the October 1992 enactment of the WIPP LWA.

Dated: May 9, 2008.

Elizabeth Cotsworth,
Director, Office of Radiation and Indoor Air.

placed in the docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Dockets: All documents in the docket are listed in the docket index available in regulations.gov. To access the electronic docket, go to http://www.regulations.gov, select “Advanced Search,” then “Docket Search.” Insert the docket ID number where indicated and select the “Submit” button. Follow the instructions on the regulations.gov website to view the docket index or access available documents. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either in the electronic docket at http://www.regulations.gov, or, if only available in hard copy, at the OPP Regulatory Public Docket in Rm. S–4400, One Potomac Yard (South Bldg.), 2777 S. Crystal Dr., Arlington, VA. The hours of operation of this Docket Facility are from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The Docket Facility telephone number is (703) 305–5805.

FOR FURTHER INFORMATION CONTACT: Eric Miederhoff, Special Review and Reregistration Division (7508P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW, Washington, DC 20460–0001; telephone number: (703) 347–8028; fax number: (703) 308–7070; e-mail address: miederhoff.eric@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general, and may be of interest to a wide range of stakeholders including environmental, human health, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under FOR FURTHER INFORMATION CONTACT.

B. What Should I Consider as I Prepare My Comments for EPA?

1. Submitting CBI. Do not submit this information to EPA through regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. Tips for preparing your comments. When submitting comments, remember to:

i. Identify the document by docket ID number and other identifying information (subject heading, Federal Register date and page number).

ii. Follow directions. The Agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

iii. Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

iv. Describe any assumptions and provide any technical information and/or data that you used.

v. If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

vi. Provide specific examples to illustrate your concerns and suggest alternatives.

vii. Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

viii. Make sure to submit your comments by the comment period deadline identified.

II. Background on the Receipt of Request to Amend Registrations to Terminate Uses

This notice announces receipt by EPA of a request from Bayer CropSciences to amend three disulfoton product registrations to terminate certain uses. In a letter dated November 8, 2007, Bayer CropSciences confirmed their intention to cancel Di-Syston 15G (EPA Reg. No. 264-723) use on broccoli. The 2002 disulfoton Reregistration Eligibility Decision (RED) determined that disulfoton uses on barley, wheat, and potatoes were ineligible for reregistration and were to be phased out by June 2005. Additionally, the Di-Syston 15G use on ornamentals (commercial use) was to be phased out by June 2005. These phase-outs were necessary to mitigate drinking water, occupational, and ecological risks. This notice and subsequent order will finalize these phase-outs. These uses have been removed from their respective end-use product labels and Bayer CropSciences acknowledged their cancellation in letters dated November 16, 2007 and January 24 and February 5, 2008. Bayer CropScience disulfoton products that had been registered for use on barley, wheat, and potatoes included Di-Syston 15G (EPA Reg. No. 264-723), Di-Syston 8 EC (EPA Reg. No. 264-734), and the disulfoton technical product (EPA Reg. No. 264-725). The termination of the subject uses for this Notice will not terminate the last disulfoton end-use products registered in the United States.

III. What Action is the Agency Taking?

This notice announces receipt by EPA of a request from a registrant to amend product registrations to terminate certain uses of disulfoton. The affected products and the registrant making the request are identified in Tables 1 and 2 of this unit.

Under section 6(f)(1)(A) of FIFRA, registrants may request, at any time, that their pesticide registrations be canceled or amended to terminate one or more pesticide uses. Section 6(f)(1)(B) of FIFRA requires that before acting on a request for voluntary cancellation, EPA must provide a 30-day public comment period on the request for voluntary cancellation or use termination. In addition, section 6(f)(1)(C) of FIFRA requires that EPA provide a 180-day comment period on a request for voluntary cancellation or use termination of any minor agricultural use before granting the request, unless:

1. The registrants request a waiver of the comment period, or

2. The Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment.

Bayer CropSciences, the disulfoton technical registrant, has requested that EPA waive the 180–day comment period. EPA will provide a 30–day comment period on the proposed requests.
Unless a request is withdrawn by the registrant within 30 days of publication of this notice, or if the Agency determines that there are substantive comments that warrant further review of this request, an order will be issued canceling and amending the affected registrations.

IV. What is the Agency’s Authority for Taking this Action?

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled or amended to terminate one or more uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the Federal Register. Thereafter, following the public comment period, the Administrator may approve such a request.

V. Procedures for Withdrawal of Request and Considerations for Reregistration of Disulfoton

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to the person listed under FOR FURTHER INFORMATION CONTACT, postmarked before June 20, 2008. This written withdrawal of the request for cancellation will apply only to the applicable FIFRA section 6(f)(1) request listed in this notice. If the products(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling.

VI. Provisions for Disposition of Existing Stocks

In response to this request for termination of certain uses, the Agency proposes to issue an order which would include the following provisions for the treatment of any existing stocks of the products identified or referenced in Table 1. If the request for voluntary termination of certain uses is granted as discussed in unit 3, the Agency intends to issue a cancellation order that would allow the registrant to sell and distribute such existing stocks for six months from the date of the cancellation order and allow persons other than the registrant to continue to sell and/or use existing stocks of products with previously approved labeling that includes the discontinued uses, until such stocks are exhausted, provided that such use is consistent with the terms of the previously approved labeling on, or that accompanied, the associated products. Generally, orders effecting requested cancellations permit a registrant to sell and distribute existing stocks for one year after the date the cancellation request was received. In this case however, the Agency has determined that six months will allow sufficient time for the registrant to sell or distribute existing stocks. The decision to phase out disulfoton usage on wheat, barley, and potatoes by 2005 was announced in the 2002 RED. The technical registrant initially announced their voluntary cancellation of Di-Syston 15G use on broccoli in a letter dated September 30, 2004. Given the amount of time that has elapsed since these events, the Agency has determined it is unnecessary to provide the registrant one year to sell or distribute existing stocks. Consequently, the cancellation order will permit the registrant to sell or distribute existing stocks for six months after the date the cancellation order is issued. This policy is in accordance with the Agency’s statement of policy as prescribed in the Federal Register of June 26, 1991 (56 FR 29362) (FR L–3846–4). Exceptions to this general rule will also be made if a product poses a risk concern, or is in noncompliance with reregistration requirements, or is subject to a data call-in. In all cases, product-specific disposition dates will be given in the cancellation orders. The Agency intends to publish the final cancellation order in the Federal Register.

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which have been packaged, labeled, and released for shipment prior to the effective date of the cancellation action. Unless the provisions of an earlier order apply, existing stocks already in the hands of dealers or users can be distributed, sold, or used legally until they are exhausted, provided that such further sale and use comply with the EPA-approved label and labeling of the affected product. Exception to these general rules will be made in specific cases when more stringent restrictions on sale, distribution, or use of the products or their ingredients have already been imposed, as in a Special Review action, or where the Agency has identified significant potential risk concerns associated with a particular chemical.

List of Subjects

Environmental protection, Pesticides and pests.

Peter Caultins,

BILLING CODE 6560–50–S

ENVIRONMENTAL PROTECTION AGENCY

Notice of Withdrawal of 14 Tolerance Petitions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is withdrawing 14 pesticide petitions because the petitioners either voluntarily withdrew their petitions, or the petitions were administratively withdrawn by EPA.

FOR FURTHER INFORMATION CONTACT: Kathleen Martin, Registration Division (7505P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW.,
