with a new authorization on a limited specific medical use license.

NRC Form 313A(RSO) is also used by medical broad scope licensees when identifying a new individual as an RSO or adding an additional RSO authorization for the individual. This submittal may occur when applying for a new license, amendment, or renewal.

NRC Form 313A(ANP) is also used by commercial nuclear pharmacy licensees when requesting an individual be identified for the first time as ANP. This submittal may occur when applying for a new license, amendment, or renewal.

Who is required or asked to report?
All applicants requesting a license, amendment or renewal of a license for byproduct or source material.

The number of annual respondents:
15,122 (2,364 NRC licensees and 12,758 Agreement State licensees).

The number of hours needed annually to complete the requirement or request:
65,308 (10,289 hours for NRC licensees and 55,019 hours for Agreement State licensees).

Abstract: Applicants must submit NRC Form 313, which may include the six forms in the 313A series, to obtain a specific license to possess, use, or distribute byproduct or source material. These six forms in the 313A series are:
1. NRC Form 313A(RSO), “Radiation Safety Officer Training and Experience and Preceptor Attestation;”
2. NRC Form 313A(AMP), “Authorized Medical Physicist Training and Experience and Preceptor Attestation;”
3. NRC Form 313A(ANP), “Authorized Nuclear Pharmacist Training and Experience and Preceptor Attestation;”
4. NRC Form 313A(AUD), “Authorized User Training and Experience and Preceptor Attestation (for uses defined under 35.100, 35.200, and 35.500);”
5. NRC Form 313A(AUT), “Authorized User Training and Experience and Preceptor Attestation (for uses defined under 35.400 and 35.600).” The information is reviewed by the NRC to determine whether the applicant is qualified by training and experience, and has equipment, facilities, and procedures which are adequate to protect the public health and safety, and minimize danger to life or property.

Submit, by July 29, 2008, comments that address the following questions:
1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the burden estimate accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

A copy of the draft supporting statement may be viewed free of charge at the NRC Public Document Room, One White Flint North, 11555 Rockville Pike, Room O–1 F21, Rockville, MD 20852. OMB clearance requests are available at the NRC worldwide Web site: http://www.nrc.gov/public-involve/doc-comment/omb/index.html. The document will be available on the NRC home page site for 60 days after the signature date of this notice.

Comments and questions about the information collection requirements may be directed to the NRC Clearance Officer, Margaret A. Janney (T–5 F52), U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, by telephone at (301) 415–7245, or by e-mail to infocollect@nrc.gov.

Dated at Rockville, Maryland, this 22nd day of May, 2008.

4. Who is required or asked to report: Individuals requesting access to records under the Freedom of Information or Privacy Acts, and submitters of information containing trade secrets or confidential commercial or financial information who have been notified that the NRC has made an initial determination that the information should be disclosed.

5. The number of annual respondents: 212.

6. The number of hours needed annually to complete the requirement or request: 167.

7. Abstract: 10 CFR Part 9 prescribes procedures for individuals making requests for records under the Freedom of Information Act (FOIA) or Privacy Act (PA). It contains information collection requirements for requests to waive or reduce fees for searching for and reproducing records in response to FOIA requests; appeals of denied requests; and requests for expedited processing. The information required from the public is necessary to justify requests for waivers or reductions in searching or copying fees; or to justify expedited processing. Section 9.28(b) provides that if the submitter of information designated to be trade secrets or confidential commercial or financial information objects to the disclosure, he must provide a written statement within 30 days that specifies all grounds why the information is a trade secret or confidential or financial information that is privileged or confidential.

NUCLEAR REGULATORY COMMISSION

Draft Regulatory Guide: Issuance, Availability

AGENCY: Nuclear Regulatory Commission.

FOR FURTHER INFORMATION CONTACT: B. Von Till, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone: (301) 415–0598 or e-mail RRV@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) has issued for public comment a draft guide in the agency’s Regulatory Guide Series. This series has been developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC’s regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide (DG), entitled, “Standard Format and Content of License Applications for Conventional Uranium Mills,” is temporarily identified by its task number, DG–3024, which should be mentioned in all related correspondence. This guide describes a method that the staff of the NRC considers acceptable for use in preparing license applications for the receipt, possession, and use of source and byproduct material for conventional uranium milling. Conventional uranium milling is uranium recovery by crushing uranium ore and subjecting it to extraction processes in a mill facility to concentrate the uranium into a uranium-oxygen compound called yellowcake. This regulatory guide describes an approach that is acceptable to the NRC staff for complying with the agency’s regulations in Title 10, Part 40, (Domestic Licensing of Source Material,” of the Code of Federal Regulations (10 CFR Part 40).

II. Further Information

The NRC staff is soliciting comments on DG–3024. Comments may be accompanied by relevant information or supporting data and should mention DG–3024 in the subject line. Comments submitted in writing or in electronic form will be made available to the public in their entirety through the NRC’s Agencywide Documents Access and Management System (ADAMS).

Personal information will not be removed from your comments. You may submit comments by any of the following methods:

2. E-mail comments to: NRCREP@nrc.gov.

3. Hand-deliver comments to: Rulemaking, Directives, and Editing Branch, Office of Administration, U.S. Nuclear Regulatory Commission, 11555 Rockville Pike, Rockville, Maryland 20852, between 7:30 a.m. and 4:15 p.m. on Federal workdays.

4. Fax comments to: Rulemaking, Directives, and Editing Branch, Office of Administration, U.S. Nuclear Regulatory Commission at (301) 415–5144.

Requests for technical information about DG–3024 may be directed to the NRC contact, B. Von Till at (301) 415–0598 or e-mail RRV@nrc.gov.

Comments would be most helpful if received by August 4, 2008. Comments received after that date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. Although a time limit is given, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

In addition, regular guides are available for inspection at the NRC’s
