BILLING CODE 4510-FN-P

DEPARTMENT OF LABOR

Employment and Training Administration

[SGA/DFA-PY-08-09]

Solicitation for Grant Applications (SGA)

AGENCY: Employment and Training Administration (ETA), Labor.

ACTION: Notice: Reopening of period to submit applications for SGA/DFA-PY-08-09.

SUMMARY: The Employment and Training Administration published a document in the **Federal Register** on November 17, 2008, announcing the availability of funds and issuing a solicitation for grant applications (SGA) for Local Young Offender Planning Grants, State/Local Juvenile Offender Implementation Grants and an Intermediary Juvenile Reentry Grant 73 FR 67884 (Nov. 17, 2008). This notice reopens the period during which applications for such funds may be submitted.

DATES: Key Dates: The new closing date for receipt of applications under this announcement is January 29, 2009.

FOR FURTHER INFORMATION CONTACT: B. Jai Johnson, Grant Specialist, Division of Federal Assistance, at (202) 693-3296.

SUPPLEMENTARY INFORMATION:

Date Extension: In the **Federal Register** of November 17, we established a December 18, 2008 closing date for applications under this SGA. It subsequently came to our attention that we mistakenly referred to a different due date for electronically submitted applications under the heading, "Part IV—Application and Submission Information, Section C, Submission Date, Times, and Addresses" on page 67888. We attempted to correct this mistake by publishing a separate notice in the December 1, 2008, **Federal Register** to clarify that the December 18 due date applied to all applications, including those submitted electronically (73 FR 72853).

However, we remain concerned that the December 1 notice may not have resolved confusion over the applicable deadline. Therefore we are reopening for two weeks the period during which

we will accept applications until January 29, 2009.

Submission instructions: Applications must be submitted in accordance with instructions contained in Part IV of the SGA by the date specified above. All other terms, conditions, criteria and provisions of the SGA remain in effect (including the correction regarding the goal of the intermediary reentry grant in Part I as provided in the December 1 **Federal Register** Notice).

Other Information: Applicants that have applied before for this solicitation are not required to resubmit their application. However, such applicants have the option to withdraw their proposal and re-submit if they so choose. If you choose to re-submit, you must notify the Grant Officer by E-mail (*Magruder.Chari@dol.gov*) stating that you wish to withdraw the initial proposal and resubmit. Once withdrawn the initial proposal will not be considered and failure to resubmit or a late resubmittal will disqualify the applicant from consideration.

For tracking purposes, resubmitted or new first time proposals must use the following on the cover sheet: "SGA-DFA-PY 08-09A."

Signed in Washington, DC, this 9th of January 2009.

Chari Magruder,
Grant Officer.

BILLING CODE 4510-FT-P

NATIONAL NANOTECHNOLOGY COORDINATION OFFICE

Nanoscale Science, Engineering and Technology Subcommittee, National Science and Technology Council, Committee on Technology; Human and Environmental Exposure Assessment Workshop: Public Meeting

ACTION: Notice of public meeting.

SUMMARY: The National Nanotechnology Coordination Office (NNCO), on behalf of the Nanoscale Science, Engineering, and Technology (NSET) Subcommittee of the Committee on Technology, National Science and Technology Council (NSTC), will hold a workshop on February 24–25, 2009 to provide an open forum to discuss the state-of-the-art of the science related to environmental, health, and safety aspects of engineered nanoscale materials in the area of human and environmental exposure assessment. Human and Environmental Exposure Assessment is one of the five environmental, health, and safety research categories identified in the

NSET Subcommittee document *Strategy for Nanotechnology-Related Environmental, Health, and Safety Research* (http://www.nano.gov/NNI_EHS_Research_Strategy.pdf), which was released February 14, 2008.

DATES: The public meeting will be held on Tuesday, February 24, 2009 from 8 a.m. until 5:30 p.m. and on Wednesday, February 25, 2009 from 8 a.m. to 12:30 p.m.

ADDRESSES: The public meeting will be at the Consumer Protection Safety Commission conference facility, 4330 East West Highway, Bethesda, MD 20814 (Metro stop: Bethesda on the Red Line). For directions, please see <http://www.cpsc.gov/about/direct.html>.

Registration: Due to space limitations and security requirements, pre-registration for the workshop is required. People interested in attending the workshop should register online at <http://www.nano.gov/html/meetings/exposure/registration.html>. Written notices of participation by e-mail should be sent to exposure@nnco.nano.gov. Written notices may be mailed to the Exposure Assessment Workshop, c/o NNCO, 4201 Wilson Blvd., Stafford II, Suite 405, Arlington, VA 22230. Registration is on a first-come, first-serve basis. Registration will close on February 21, 2009 at 5 p.m. EST.

Information about the meeting, including the agenda, is posted at <http://www.nano.gov>.

FOR FURTHER INFORMATION, CONTACT: For information regarding this Notice, please contact Liesl Heeter, National Nanotechnology Coordination Office. Telephone: (703) 292-4533. E-mail: exposure@nnco.nano.gov.

SUPPLEMENTARY INFORMATION: Human and environmental exposure assessment research is used to guide efforts to improve environmental, health, and safety (EHS) protection with regard to nanoscale engineered materials and to monitor trends and progress. The purpose of this workshop is to hold an open forum to discuss the progress achieved in the area of human and environmental exposure assessment research and to discuss the path forward for addressing the research needs in this area. Specifically, the Nanotechnology Environmental Health Implications (NEHI) Working Group of the NSET Subcommittee has identified five priority research needs within the human and environmental exposure category: Characterizing exposure among workers; identifying population groups and environments exposed to engineered nanoscale materials; characterizing exposure to the general population from industrial processes
