

and goals of the NWRS, and statutory and regulatory guidance. We have determined that Alternative B also includes the suite of activities that best achieves the stated purpose and need for action and the seven goals presented in the final CCP/EIS Chapter 1. Compared to the other two alternatives, Alternative B meets those needs and goals through the most balanced and integrated approach, considering both the biological and human environment.

It will also provide the means to better respond to changing ecological and socioeconomic conditions within the surrounding environment using an adaptive management approach. In summary, Alternative B was selected for implementation because it provides the greatest number of opportunities for the refuge to make a significant contribution to the conservation of fish, wildlife, and habitat needs in the region, as well as

make a positive contribution to the local and regional communities.

Endangered and Threatened Wildlife and Plants; Initiation of 5-Year Reviews of 103 Species in Hawaii

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of review.

SUMMARY: We, the U.S. Fish and Wildlife Service, are initiating 5-year reviews for 103 species in Hawaii under the Endangered Species Act of 1973, as amended (Act). We request any new information on these species that may have a bearing on their classification as endangered or threatened. Based on the results of these 5-year reviews we will determine whether these species are properly classified under the Act.

DATES: To ensure consideration in our review, we are requesting submission of new information no later than May 15, 2009. However, we will continue to accept new information about any listed species at any time.

ADDRESSES: For the species under review, submit information or direct questions to: Field Supervisor, Attention: 5-Year Review, U.S. Fish and Wildlife Service, Pacific Islands Fish and Wildlife Office, 300 Ala Moana Blvd., Room 3-122, Box 50088, Honolulu, HI 96850. Information or questions can also be submitted by e-mail to: pifwo-5yr-review@fws.gov.

FOR FURTHER INFORMATION CONTACT: Marilet Zablan, U.S. Fish and Wildlife Service, Pacific Islands Fish and Wildlife Office (see ADDRESSES), 808-792-9400. Individuals who are hearing impaired or speech impaired may call the Federal Relay Service at (800) 877-8337 for TTY assistance.

SUPPLEMENTARY INFORMATION:

Why Do We Conduct 5-Year Reviews?

Under the Endangered Species Act (Act) (16 U.S.C. 1531 et seq.), we maintain a List of Endangered and Threatened Wildlife and Plants (List) at 50 CFR 17.11 (for animals) and 17.12

(for plants). Section 4(c)(2)(A) of the Act requires that we conduct a review of listed species at least once every 5 years. Then, on the basis of such reviews under section 4(c)(2)(B), we determine whether or not any species should be removed from the List (delisted), or reclassified from endangered to threatened or from threatened to endangered. These actions must be supported by the best scientific and commercial data available. Delisting a species is considered only if such data substantiates that the species is neither endangered nor threatened for one or more of the following reasons: (1) The species is considered extinct; (2) the species is considered to be recovered; and/or (3) the original data available when the species was listed, or the interpretation of such data, were in error (50 CFR 424.11(d)). Any change in Federal classification would require a separate rulemaking process. The regulations in 50 CFR 424.21 require that we publish a notice in the **Federal Register** announcing those species currently under active review. This notice announces our active review of the 103 species listed in Table 1.

What Information Do We Consider in the Review?

A 5-year review considers all new information available at the time of the review.

In conducting these reviews, we consider the best scientific and commercial data that has become available since the listing determination or most recent status review, such as:

- Species biology including, but not limited to, population trends, distribution, abundance, demographics, and genetics;
- Habitat conditions including, but not limited to, amount, distribution, and suitability;
- Conservation measures that have been implemented that benefit the species;
- Threat status and trends (see five factors under heading “How Do We Determine Whether a Species Is Endangered or Threatened?”); and
- Other new information, data, or corrections including, but not limited to, taxonomic or nomenclatural changes, identification of erroneous information contained in the List, and improved analytical methods.

How Do We Determine Whether a Species Is Endangered or Threatened?

Section 4(a)(1) of the Act requires that we determine whether a species is endangered or threatened based on one or more of the five following factors:

- A. The present or threatened destruction, modification, or curtailment of its habitat or range;
 - B. Overutilization for commercial, recreational, scientific, or educational purposes;
 - C. Disease or predation;
 - D. The inadequacy of existing regulatory mechanisms; or
 - E. Other natural or manmade factors affecting its continued existence.
- Our assessment of these factors is required, under section 4(b)(1) of the Act, to be based solely on the best scientific and commercial data available.

What Could Happen as a Result of This Review?

If we find information concerning the 103 species listed in Table 1 indicating that a change in classification may be warranted, we may propose a new rule to: (a) Reclassify the species from threatened to endangered; (b) reclassify the species from endangered to threatened; or (c) remove the species from the List. If we find that a change in classification is not warranted, the species will remain on the List under its current status.

Public Solicitation of New Information

To ensure that these 5-year reviews are complete and based on the best available scientific and commercial information, we solicit new information from the public, governmental agencies, Tribes, the scientific community,

environmental entities, industry, and any other interested parties concerning the status of the species.

If you wish to provide information for any species included in these 5-year reviews, submit your comments and materials to the Field Supervisor of the Pacific Islands Fish and Wildlife Office (see ADDRESSES section). Our practice is to make comments, including names and home addresses of respondents, available for public review. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

You may submit information on the species in this notice by U.S. mail, e-mail, or hand-delivery, to the address in the ADDRESSES section above. You may also view information we receive in response to this notice, as well as other public documentations in our files, at the Pacific Islands Fish and Wildlife Office (See ADDRESSES section above) during normal business hours.

Completed and Active Reviews

TakeMeFishing.org Web Site Advertising Guidelines

AGENCY: U.S. Fish and Wildlife Service, Interior.

ACTION: Notice of adoption of final guidelines.

SUMMARY: The Recreational Boating & Fishing Foundation (RBFF) will sell advertising on its <http://TakeMeFishing.org> Web site to help generate revenue from non-Federal funds to expand its outreach program. RBFF has adopted final advertising guidelines to determine who can advertise and how the advertising sales will be operated.

FOR FURTHER INFORMATION CONTACT: RBFF Project Officer
Mary_Burke@fws.gov (e-mail) or (703) 358-2435.

SUPPLEMENTARY INFORMATION:

Recreational boating and fishing participation rates have declined over the past 5 years. Recreational boating and fishing related activities contribute to conserving aquatic resources through excise taxes collected from sales of fishing equipment and motorboat fuel that fund the Federal Aid in Sport Fish Restoration Program. This program, coupled with fishing license sales, makes up more than 80 percent of the funding for conservation and protection of aquatic resources in the United States. To address the declining participation of recreational boating and

fishing, Congress passed the Sportfishing and Boating Safety Act of 1998, which called for Federal appropriations to be used for the National Outreach and Communication Program. The Sport Fishing and Boating Partnership Council developed the "Strategic Plan for the National Outreach and Communication Program," and the Secretary of the Interior approved the Strategic Plan in February 1999.

RBFF is a nonprofit organization created to carry out the National Outreach and Communication Program, whose mission is to increase participation in recreational angling and boating and, through those experiences, increase the public's awareness of and appreciation for the need for conserving and protecting America's aquatic natural resources. RBFF is funded through the Sport Fish Restoration and Boating Trust Fund. This fund is composed of Federal taxes collected on the sale of motorboat fuel and of excise taxes paid by manufacturers of fishing tackle. The U.S. Fish and Wildlife Service (Service) administers RBFF's funding via a cooperative agreement between the Service and RBFF, in the form of a Memorandum of Understanding signed by the Service, the Sport Fishing and Boating Partnership Council, the Association of Fish and Wildlife Agencies, and RBFF.

The Strategic Plan, which RBFF was created to implement, specifically calls for the implementing organization not to be operated as a "grants-in-aid" organization. The Plan also calls for RBFF to "create an industry 'hard dollar' fund mechanism to promote, extend and expand the outreach program." In response, RBFF will sell advertising on its <http://TakeMeFishing.org> Web site to generate revenue from non-Federal funds to expand its outreach program.

On October 20, 2008, the Service published in the **Federal Register** (73 FR 62310) a notice of availability of RBFF's draft advertising guidelines and requested public comments on those draft guidelines. RBFF designed draft guidelines to determine who can advertise and how the advertising sales will operate. The Service received three comments during the comment period.

RBFF is adopting, without change, the advertising guidelines that the Service published in the **Federal Register** on October 20, 2008 (73 FR 62310). Please refer to that notice for the guidelines, or
