26, 2009. GSA utilizes the MAS program to establish long-term Governmentwide contracts with responsible firms to provide Federal, State, and local government customers with access to a wide variety of commercial supplies (products) and services.

The MAS Panel was established to develop advice and recommendations on MAS program pricing policies, provisions, and procedures in the context of current commercial pricing practices. The Panel is developing recommendations for MAS program pricing provisions for the acquisition of (1) professional services; (2) products; (3) total solutions which consist of professional services and products; and (4) non professional services. In developing the recommendations, the Panel will, at a minimum, address these 5 questions for each of the 4 types of acquisitions envisioned above: (1) Where does competition take place?; (2) If competition takes place primarily at the task/delivery order level, does a fair and reasonable price determination at the MAS contract level really matter?; (3) If the Panel consensus is that competition is at the task order level, are the methods that GSA uses to determine fair and reasonable prices and maintain the price/discount relationship with the basis of award customer(s) adequate?; (4) If the current policy is not adequate, what are the recommendations to improve the policy/guidance; and (5) If fair and reasonable price determination at the MAS contract level is not beneficial and the fair and reasonable price determination is to be determined only at the task/delivery order level, then what is the GSA role?

The meeting will be held at U.S. General Services Administration, 2011 Crystal Drive, Room 2300, Arlington, VA 22202. The location is within walking distance of the Farragut West and Farragut North metro stops. The start time for the meeting is 9 a.m., and the meeting will adjourn no later than 5 p.m.

**National Institutes of Health**

**Proposed Collection; Comment Request; 24-Hour Dietary Recall Method Comparison and the National Cancer Institute (NCI) Observational Feeding Studies**

**SUMMARY:** In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the National Cancer Institute (NCI), National Institutes of Health (NIH) will publish periodic summaries of proposed projects to be submitted to the Office of Management and Budget (OMB) for review and approval.

**Proposed Collection:** Title: 24-hour Dietary Recall Method Comparison and the National Cancer Institute (NCI) Observational Feeding Studies. Type of Information Collection Request: NEW. Need and Use of Information Collection: The objective of the two studies is to compare the performance of the newly developed computerized Automated Self-Administered 24-Hour Recall (ASA24) approach to collecting 24-hour recall (24HR) data with the current standard, the interviewer-administered Automated Multiple Pass Method (AMPM). The ultimate goal is to determine to what extent the new automated instrument can be used instead of the more expensive interviewer-administered instrument in the collection of dietary intake data.

**Frequency of Response:** Twice. **Affected Public:** Individuals. **Type of Respondents:** For the 24-hour Dietary Recall Method Comparison study, approximately 1,200 adult members from three health maintenance organization plans (in Minnesota, California, and Michigan) between ages 20 and 70 years. For the NCI Observational Feeding Study, approximately 90 adult residents from the Washington, DC metropolitan area between ages 20 and 70 years. The annual reporting burden is estimated at 919 hours (see table below). This amount to an estimated $32,482 burden hours over the 2-year data collection period with a total cost to the respondents $32,482.

There are no Capital costs, Operating costs, and/or Maintenance Costs to report.
