RIN 0648-AW77

Endangered and Threatened Species; Designation of Critical Habitat for Atlantic Salmon (*Salmo salar*) Gulf of Maine Distinct Population Segment; Final Rule

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration, Commerce.

ACTION: Final rule.

SUMMARY: We, the National Marine Fisheries Service (NMFS), issue a final rule to revise the regulatory language that appeared in a final rule that published in the **Federal Register** of June 19, 2009. The final rule designated critical habitat for the Atlantic salmon (*USalmo salar*) Gulf of Maine Distinct Population Segment (GOM DPS) under the Endangered Species Act (ESA). We designated as critical habitat 45 specific areas occupied by Atlantic salmon at the time of listing that comprise approximately 19,571 km of perennial river, stream, and estuary habitat and 799 square km of lake habitat within the range of the GOM DPS and in which are found those physical and biological features essential to the conservation of the species. We excluded approximately 1,256 km of river, stream, and estuary habitat and 100 square km of lake habitat from critical habitat pursuant to the ESA. We issue this final rule to revise the designated critical habitat for the expanded GOM DPS of Atlantic salmon to exclude all trust and fee holdings of the Penobscot Indian Nation, and we correct the table to add an "E" to indicate that Belfast Bay is

excluded from critical habitat under the ESA for reasons of economics.

DATES: Effective August 10, 2009.

FOR FURTHER INFORMATION CONTACT: Dan Kircheis, National Marine Fisheries Service, Maine Field Station, 17 Godfrey Drive, Orono, ME 04473 at (207) 866-7320, or Marta Nammack at (301) 713-1401 ext. 180.

SUPPLEMENTARY INFORMATION: In the proposed rule to designate critical habitat for the expanded GOM DPS of Atlantic salmon (73 FR 51747; September 5, 2008), we proposed to exclude under section 4(b)(2) of the ESA all tribal lands from the critical habitat designation, based on Secretarial Order 3206 that recognizes Tribes as having the governmental authority and the desire to protect and manage their resources in a manner that is most beneficial to them.

In the final rule to designate critical habitat for the expanded GOM DPS of Atlantic salmon (74 FR 29300; June 19, 2009), we included as critical habitat Trust and Fee lands owned by the Penobscot Indian Nation, based on our interpretation of comments that we received from the Penobscot Indian Nation. In their comments, the Penobscot Indian Nation stated that "the Nations Trust landholdings are adequately identified and appropriately excluded from Critical Habitat Designation." Then they stated, "Given the extent of important salmon habitat located within the Penobscot Indian Reservation the Penobscot Nation asks that the services do not exclude any portion of the Penobscot Indian Reservation from the designation as Critical Habitat. The bed, banks, and islands that make up the Penobscot Indian Reservation are indeed "critical" to the survival of wild Atlantic salmon in the Penobscot River watershed. In fact, the Penobscot Nation believes that the recovery of the species will not be possible without adequate access to the Atlantic salmon habitat that is contained within the Penobscot Indian Reservation." We interpreted this to mean that all of the Penobscot Indian Nation's land should be included as critical habitat.

On June 22, 2009, we received notice from the Tribe that we incorrectly included Trust and Fee lands as critical habitat when they were seeking to include reservation lands. This final rule corrects the final rule published on June 19, 2009 (74 FR 29300) to exclude all areas that are Trust and Fee lands of the Penobscot Indian Nation. Critical habitat on Penobscot Indian lands will remain designated only for those lands that make up the Penobscot Reservation.

The exclusion of the Trust and Fee lands from the designation of critical habitat does not diminish the number of functional habitat units below those needed for the recovery of the species in the Penobscot Bay salmon habitat recovery unit.

The effect of this correction is to exclude 1,400 instead of 1,256 km of river, stream, and estuary habitat and 127 instead of 100 sq km of lake habitat from critical habitat pursuant to section 4(b)(2) of the ESA.

Recent information provided by the Penobscot on Tribal ownership of lands within the occupied range designated as critical habitat discloses that the Penobscot Tribe hold approximately 60,500 acres (244.8 sq km) of Fee lands and lands held in Trust within the areas occupied by GOM DPS. We have determined that all the rivers, streams, lakes, and estuaries of approximately 9,500 acres (38.4 sq km) of land held for the Passamaquoddy tribe already disclosed in the final rule and approximately 60,500 acres (244.8 sq km) of Fee lands and lands held in Trust by the Penobscot Nation (not disclosed in the final rule) within the areas occupied by the GOM DPS are excluded from critical habitat designation based on the principles of the Secretarial Order discussed above. The rivers, lakes, and streams within the approximately 4,400-acre (17.8 sq km) Penobscot Reservation are included as critical habitat per request of the Penobscot Nation.

We do not believe that exclusion of Penobscot Tribal Trust lands and Passamaquoddy tribal lands, including their lands in the Downeast Coastal Salmon Habitat Recovery Unit (SHRU), will reduce the conservation value or functional habitat units of Atlantic salmon habitat within those particular areas, given the ongoing cooperative efforts between the Tribes and the agencies. The Penobscot Indian Nation and the Passamaquoddy Tribe own lands within the range of the GOM DPS and have actively pursued or participated in activities to further promote the health and continued existence of Atlantic salmon and their habitats. The Penobscot Indian Nation has developed and maintained its own water quality standards that state "it is the official policy of the Penobscot Nation that all waters of the Tribe shall be of sufficient quality to support the ancient and historical traditional and customary uses of such tribal waters by members of the Penobscot Nation." The Tribe is also currently participating in the Penobscot River Restoration Project that has the intended goal of restoring 11 species of diadromous fish, including

Atlantic salmon. The Passamaquoddy Tribe has continued to maintain efforts to balance agricultural practices with natural resources. In a tract of Tribal land in Township 19, which accounts for approximately 12 km of the 28 km of rivers and streams on Passamaquoddy land that contain physical and biological features essential to salmon, the Tribe has established an ordinance to govern its water withdrawals for these lands. This ordinance states, "it is important to the Tribe that its water withdrawals at T. 19 do not adversely affect the Atlantic salmon in any of its life stages, or its habitat," and restricts water withdrawals to avoid adverse impact on the Atlantic salmon.

The benefits of excluding Tribal lands from critical habitat include maintenance of a long-term working relationship between the Tribes and government agencies that promotes environmental conservation and Atlantic salmon conservation and the continued promotion of established national policies, our Federal trust obligations, and our deference to the Tribes in management of natural resources on their lands.

Also, in § 226.217(b)(2)(i) of the June 19, 2009, final rule (74 FR 29300), we inadvertently left out the "E" in the table to indicate that the Belfast Bay HUC 10 watershed was excluded from critical habitat based on economic impacts. This final rule corrects that omission.

Correction

In FR Doc. E9-14268 appearing on page 29300 in the **Federal Register** of Friday, June 19, 2009, the following corrections are made:

On page 29330, under the heading *Other Relevant Impacts: Tribal Lands*, third column, the first paragraph is corrected to read: "Secretarial Order

3206 recognizes that Tribes have governmental authority and the desire to protect and manage their resources in the manner that is most beneficial to them. Pursuant to the Secretarial Order, and consistent with the Federal government's trust responsibilities, the Services must consult with the affected Indian Tribes when considering the designation of critical habitat in areas that may impact tribal trust resources, tribally-owned fee lands, or the exercise of tribal rights."

Classification

The determinations made by the agency in the Classification section in the final rule published June 19, 2009 (74 FR 29300), with respect to Executive Order 12866, the Coastal Zone Management Act, the Regulatory Flexibility Act, the Information Quality Act, the Paperwork Reduction Act, the National Environmental Policy Act, Federalism, and Takings are unaltered by this correction.

The Assistant Administrator for Fisheries, NOAA (AA) finds good cause pursuant to 5 U.S.C. 553(b)(B) to waive prior notice and the opportunity for public comment because it is "unnecessary". Exclusion of the Penobscot Nation's Trust and fee lands was part of the proposed rule on which public comment was solicited. The only comment received on this aspect of the proposed rule was from the Penobscot Nation. As such, this correction is considered a minor rule regarding which the public is not particularly interested. This correction actually responds to a further comment from the Penobscot Nation which pointed out that the agency had misinterpreted the intent of its comment on the proposed rule.

The AA further finds pursuant to 5 U.S.C. 553(d)(3) good cause to waive the

thirty (30) day delayed effectiveness period because it relieves a burden. Activities that are funded, authorized, or carried out by a Federal agency, such as agriculture, development, and transportation, on Tribal lands might be negatively impacted by the designation. If the activity may affect critical habitat, then the Federal agency would be required to consult with NMFS under ESA section 7 to ensure that the activity does not destroy or adversely modify critical habitat. Implementing this correction as soon as possible would remove this burden that might impact Federal activities on Tribal lands.

* * * * *

(4) Habitat that meets the definition of critical habitat in occupied habitat areas on Passamaquoddy Tribal Indian lands and Fee lands or lands held in Trust by the Penobscot Indian Reservation within the range of the GOM DPS are excluded from designation. Per request of the Penobscot Tribe, critical habitat does include occupied habitat that makes up the Penobscot Indian Reservation. The Indian lands specifically excluded from critical habitat are those defined in the Secretarial Order 3206, including:

(i) Lands held in Trust by the United States for the benefit of any Indian Tribe;

(ii) Lands held in trust by the United States for the benefit of any Indian Tribe or individual subject to restrictions by the United States against alienation;

(iii) Fee lands, either within or outside the reservation boundaries, owned by the tribal government; and

(iv) Fee lands within the reservation boundaries owned by individual Indians.

The rivers, streams, lakes, and estuaries on approximately 9,500 acres (38.4 sq km) of lands held by the Passamaquoddy Tribe and approximately 60,500 acres (244.8 sq km) of Fee lands and land held in Trust

for the Penobscot Tribe within the areas occupied by the GOM DPS are excluded from critical habitat designation based on the principles of the Secretarial Order discussed above. Per request of the Penobscot Nation, the rivers, lakes, and streams within the approximately 4,400-acre (17.8 sq km) Penobscot Reservation are included as critical habitat.
