§ 111.52 Administrative collection of claims.

(a) The Commission shall act to collect all claims or debts. These collection activities will be undertaken promptly and follow up action will be taken as appropriate in accordance with 31 CFR 901.1.

(c) The Commission will refer debts to the U.S. Department of the Treasury no later than 180 days after the debt has become delinquent. On behalf of the Commission, the U.S. Department of the Treasury will attempt to collect the debt, in accordance with the statutory and regulatory requirements and authorities applicable to the debt and action. This may include referral to another debt collection center, or a private collection contractor. See 31 CFR 285.12 (Transfer of debts to Treasury for collection). This requirement does not apply to any debt that:

(1) Is in litigation or foreclosure;
(2) Will be disposed of under an approved asset sale program;
(3) Has been referred to a private collection contractor for a period of time acceptable to the U.S. Department of the Treasury; or
(4) Will be collected under internal offset procedures within three years after the debt first became delinquent.

(d) The U.S. Department of the Treasury is authorized to charge a fee for services rendered regarding referred or transferred debts. The Commission will add the fee to the debt as an administrative cost, in accordance with 11 CFR 111.55.

§ 111.53 Litigation by the Commission.

(a) The Commission shall assess interest, penalties, and administrative costs on debts owed to the United States Government, pursuant to 31 U.S.C. 3717. Interest, penalties, and administrative costs will be assessed in accordance with 31 CFR 901.2(h).

(b) The Commission shall waive collection of interest and administrative costs on a debt or any portion of the debt that is paid within thirty days after the date on which the interest begins to accrue.

(c) The Commission may waive collection of interest, penalties, and administrative costs if it:

(1) Determines that collection is against equity and good conscience or not in the best interest of the United States, including when an administrative offset or installment agreement is in effect; or,
(2) Determines that waiver is appropriate under the criteria for compromise of debts set forth at 31 CFR 902.2(a).

(d) The Commission is authorized to impose interest and related charges on debts not subject to 31 U.S.C. 3717, in accordance with common law.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Model 747 Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Supplemental notice of proposed rulemaking (NPRM); reopening of comment period.

SUMMARY: The FAA is revising an earlier NPRM for an airworthiness directive (AD) that applies to certain Model 747 airplanes. The original NPRM would have superseded an existing AD that currently requires repetitive inspections of the body station (BS) 2598 bulkhead, and corrective actions if necessary. The existing AD also currently requires a terminating modification for the repetitive inspections and a post-modification inspection of the modified area. The original NPRM proposed to continue to require those actions using revised service information. For certain airplanes, the original NPRM proposed to require new repetitive inspections, an interim modification, and post-interim modification inspections. For certain airplanes, the original NPRM also proposed to require replacing any previously repaired aft inner chord and reinstalling the terminating modification. The original NPRM resulted from reports of cracked aft inner chords on airplanes after certain requirements of the existing AD were done. This new action revises the original NPRM for airplanes that are converted to the Model 747–400 large cargo freighter (LCF) configuration by reducing the threshold and repeat intervals of certain post-modification inspections. This new action also revises the original NPRM for all airplanes by proposing that certain inspections of the upper aft outer chords and diagonal brace attachment fittings, flanges, and rods continue after the terminating modification. We are proposing this supplemental NPRM to prevent fatigue cracking of the BS 2598 bulkhead structure, which could result in inability of the structure to carry horizontal stabilizer flight loads, and loss of controllability of the airplane.

DATES: We must receive comments on this supplemental NPRM by March 22, 2010.

ADDRESSES: You may send comments by any of the following methods:
- Hand Delivery: U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except federal holidays.

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the ADDRESSES section. Include “Docket No. FAA–2008–0981; Directorate Identifier 2008–NM–073–AD” at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to http://www.regulations.gov, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

We proposed to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) with a notice of proposed rulemaking (NPRM) for an AD (the “original NPRM”) to supersede AD 2006–05–06, amendment 39–14503 (71 FR 12125, March 9, 2006). The original NPRM applied to certain Model 747 airplanes. The original NPRM was published in the Federal Register on September 23, 2008 (73 FR 54751). The original NPRM proposed to require repetitive inspections of the body station (BS) 2598 bulkhead, and corrective actions if necessary; and a terminating modification for the repetitive inspections and a post-modification inspection of the modified area. The original NPRM proposed to require those actions using revised service information. For certain airplanes, the original NPRM proposed to require new repetitive inspections, an interim modification, and post-interim modification inspections. For certain airplanes, the original NPRM also proposed to require replacing any previously repaired aft inner chord and reinstalling the terminating modification.

Actions Since Original NPRM was Issued

Since we issued the original NPRM, Boeing informed us that the compliance times of certain post-modification inspections need to be revised for Model 747–400 series airplanes that have been modified to operate in a freighter configuration. These airplanes are referred to as large cargo freighters, or LCF. Boeing states that higher operating
