The Proposal

The FAA is considering an amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 to establish Class D airspace and modify existing Class E airspace at Columbus, GA. Due to a decrease in air traffic volume at Columbus Metropolitan Airport a less restrictive Class D airspace would be established with specific dates and times established in advance by a Notice to Airmen. The existing Class E surface area would be modified to be coincident with the newly established Class D airspace. The existing Class E airspace extending upward from 700 feet above the surface would be modified for the safety and management of IFR operations. Lawson Army Airfield, Columbus, GA, would be removed from the Class E2 and E5 airspace description, and would be re-established under separate rulemaking.

Class D airspace designations, Class E2 surface airspace designations and Class E5 designations are published in Paragraphs 5000, 6002 and 6005, respectively, of FAA Order 7400.9T, signed August 27, 2009, and effective September 15, 2009, which is incorporated by reference in 14 CFR

71.1. The Class D and E airspace designations listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This proposed rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This proposed regulation is within the scope of that authority as it would establish Class D airspace and modify existing Class E airspace at Columbus Metropolitan Airport, Columbus, GA.
