first, until the inspection required by paragraph (f)(2) of this AD is done.

(2) For airplanes on which the inspection specified in paragraph (f)(1)(i) of this AD is done: Within 4,500 flight cycles from the effective date of this AD, do the inspection and applicable corrective actions required by paragraph (f)(1)(i) of this AD. Doing the inspection and applicable corrective actions required by paragraph (f)(1)(i) of this AD terminates the repetitive inspections required by paragraph (f)(1)(ii) of this AD.

**FAA AD Differences**

**Note 1:** This AD differs from the MCAI and/or service information as follows:

**Other FAA AD Provisions**

(g) The following provisions also apply to this AD:

(1) Alternative Methods of Compliance (AMOCs): The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue, SW., Renton, Washington 98057–3356; telephone (425) 227–1138; fax (425) 227–1149. Before using any approved AMOC on any airplane to which the AMOC applies, notify your principal maintenance inspector (PMI) or principal avionics inspector (PAI), as appropriate, or lacking a principal inspector, your local Flight Standards District Office. The AMOC approval letter must specifically reference this AD.

(2) Airworthy Product: For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use the actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(3) Reporting Requirements: For any reporting requirement in this AD, under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.), the Office of Management and Budget (OMB) has approved the information collection requirements and has assigned OMB Control Number 2120–0056.

**Related Information**

**Material Incorporated by Reference**

(i) You must use Airbus Mandatory Service Bulletin A340–71–4007, including Appendix 1, dated April 1, 2009; and Task 71–21–11–210–801–0 of the Airbus A340 Aircraft Maintenance Manual, Revision 68, dated October 1, 2009; as applicable; to do the actions required by this AD, unless the AD specifies otherwise. The Airbus aircraft maintenance manual contains the following effective pages:

**DEPARTMENT OF TRANSPORTATION**

**Federal Aviation Administration**

**14 CFR Part 39**

**RIN 2120–AA64**

Airworthiness Directives; PILATUS AIRCRAFT LTD. Model PC–12/47E Airplanes

**AGENCY:** Federal Aviation Administration (FAA), Department of Transportation (DOT).

**ACTION:** Final rule.

**SUMMARY:** We are superseding an existing airworthiness directive (AD) for the products listed above. This AD results from mandatory continuing airworthiness information (MCAI) issued by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as:

Field reports have indicated that the possibility exists that both Primary Flight Displays (PFDs) could indicate a roll attitude offset of up to 10 degrees in the same direction if an accelerated turn onto the active runway is performed immediately followed by take-off. In addition, annunciating heading splits have been reported. This condition has been reported to correct itself after several minutes.

Additionally, if the aeroplane is operating in geographical latitudes with low horizontal magnetic field strength, incorrect heading may be displayed if the ADAHRS switches from GPS track to magnetometer heading while the aeroplane is on the ground.
This situation, if not corrected, could result in an undesired bank angle, heading splits and/or incorrect heading, which would constitute an unsafe condition.

We are issuing this AD to require actions to correct the unsafe condition on these products.

DATES: This AD becomes effective April 1, 2010.

On April 1, 2010, the Director of the Federal Register approved the incorporation by reference of Honeywell International Inc. Service Bulletin KSG 7200–34–09, Revision 0, dated September 24, 2009; and Pilatus Aircraft Ltd. Pilatus PC–12 Service Bulletin No.: 34–022, dated October 5, 2009, listed in this AD.

As of April 20, 2009 (74 FR 17384, April 15, 2009), the Director of the Federal Register approved the incorporation by reference of Pilatus Aircraft Ltd. Temporary Revision No. 11 to PC–12/47E Pilot’s Operating Handbook, Report No. 02277, dated March 18, 2009, listed in this AD.

ADDRESSES: You may examine the AD docket on the Internet at http://www.regulations.gov or in person at the Docket Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Doug Rudolph, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, ACE–112, Kansas City, Missouri 64106; telephone: (816) 329–4059; fax: (816) 329–4090.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to include an AD that would apply to the specified products. That NPRM was published in the Federal Register on December 10, 2009 (74 FR 65493), and proposed to supersede AD 2009–08–10, Amendment 39–15883 (74 FR 17384, April 15, 2009). That NPRM proposed to correct an unsafe condition for the specified products. The MCAI states that:

Field reports have indicated that the possibility exists that both Primary Flight Displays (PFDs) could indicate a roll attitude offset of up to 10 degrees in the same direction if an accelerated turn onto the active runway is performed immediately followed by take-off. In addition, annunciator heading splits have been reported. This condition has been reported to correct itself after several minutes.

Additionally, if the aeroplane is operating in geographical latitudes with low horizontal magnetic field strength, incorrect heading may be displayed if the ADAHRS switches from GPS track to magnetometer heading while the aeroplane is on the ground.

This situation, if not corrected, could result in an undesired bank angle, heading splits and/or incorrect heading, which would constitute an unsafe condition.

As a short-term interim measure, AD 2009–0028–E has been released in February 2009 to limit at 30° the bank angle during climb. Afterwards, as a result of the ongoing investigation, the problem has been temporarily addressed with some limitations in the take-off procedure. These limitations have been mandated by AD 2009–0080–E which superseded AD 2009–0028–E.

In order to terminate the operational limitations, an updated ADAHRS version with improved software was developed.

For the reasons described above, this AD supersedes AD 2009–0080–E and mandates as a terminating action either an update of the ADAHRS software or the replacement of the ADAHRS unit.

From MSN 1181 and subsequent an improved ADAHRS unit was implemented during production.

You may obtain further information by examining the MCAI in the AD docket.

Comments

We gave the public the opportunity to participate in developing this AD. We have considered the comments received.

Comment Issue No. 1: Limit the Applicability to Manufacturer Serial Numbers (MSN) 545, and 1001 Through 1180

Mr. Scott Lania, Alpha Flying, Inc., requests limiting the applicability to MSN 545, and 1001 through 1180, which have the affected air data, altitude, and heading reference system (ADAHRS) unit installed. Paragraph (f)(4) of the proposed AD addresses the issue of installing one of the affected ADAHRS units on other Pilatus Model PC–12/47E airplanes.

Mr. Lania requests this change in the applicability since Pilatus is installing a new version of the ADAHRS at production on MSN 1181 and subsequent.

The FAA partially agrees with the commenter. We agree that Pilatus is installing a new version of the ADAHRS in production. However, we disagree with changing the applicability of this AD. To prevent future installation of the defective ADAHRS unit on airplanes, the applicability must be for all airplanes, thus preventing the introduction of the unsafe condition on these airplanes. Paragraph (f)(4), which prohibits installation of the affected ADAHRS on other Pilatus Model PC–12/47E airplanes, would not apply unless the applicability was for all airplanes.

We are not changing the final rule AD action based on this comment.

Comment Issue No. 2: Use “Serviceable” or “Modified” in Describing the ADAHRS Unit

Mr. Lania also requests that the word “new” in paragraph (f)(2)(ii) of the Actions and Compliance section of the proposed AD be replaced with the word “serviceable” or “modified.”

Mr. Lania states that when accomplishing the Pilatus service bulletin to comply with this AD, the ADAHRS unit is not being replaced with a new unit; instead, it is being modified with upgraded software and the data plate of the ADAHRS unit is being changed to the new part number (P/N). Mr. Lania concludes that in the accomplishment of this AD on all the affected airplanes, relatively few, if any, of the ADAHRS units will be replaced with new units.

We disagree with the commenter. The word “new” refers to a new Honeywell unit from the manufacturer, so the word “serviceable” is not an appropriate substitution here. We believe the commenter’s intent is to use modified components instead of getting a new ADAHRS unit. The use of modified components is addressed in paragraph (f)(2)(i) of the proposed AD. In paragraph (f)(2)(i) of the proposed AD, the operator may accomplish the Honeywell service bulletin, which changes the P/N after the unit gets new software uploaded.

We are not changing the final rule AD action based on this comment.

Conclusion

We reviewed the available data, including the comments received, and determined that air safety and the public interest require adopting the AD as proposed.

Differences Between This AD and the MCAI or Service Information

We have reviewed the MCAI and related service information and, in general, agree with their substance. But we might have found it necessary to use different words from those in the MCAI to ensure the AD is clear for U.S. operators and is enforceable. In making these changes, we do not intend to differ substantively from the information provided in the MCAI and related service information.

We might also have required different actions in this AD from those in the MCAI in order to follow FAA policies. Any such differences are highlighted in a Note within the AD.

Costs of Compliance

We estimate that this AD will affect 50 products of U.S. registry. We also estimate that it will take about 6 work-
Examining the AD Docket
You may examine the AD docket on the Internet at http://www.regulations.gov; or in person at the Docket Management Facility located in the Symphonies Building, 400 Seventh Street, S.W., Washington, DC 20415, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains the NPRM, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone (800) 647–5527) is in the ADDRESSES section. Comments will be available in the AD docket shortly after receipt.

List of Subjects in 14 CFR Part 39
Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment
Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

§ 39.13 [Amended]

Effective Date
(a) This airworthiness directive (AD) becomes effective April 1, 2010.

Affected ADs
(b) This AD supersedes AD 2009–08–10, Amendment 39–15883.

Applicability
(c) This AD applies to Model PC–12/47E airplanes, all manufacturer serial numbers (MSN), certificated in any category.

Subject
(d) Air Transport Association of America (ATA) Code 34: Navigation.

Reason
(e) The mandatory continuing airworthiness information (MCAI) states: Field reports have indicated that the possibility exists that both Primary Flight Displays (PFDs) could indicate a roll attitude offset of up to 10 degrees in the same direction if an accelerated turn onto the active runway is performed immediately following take-off. In addition, annunciator heading splits have been reported. This condition has been reported to correct itself after several minutes.

Additionally, if the aeroplane is operating in geographical latitudes with low horizontal magnetic field strength, incorrect heading may be displayed if the ADAHRS switches from GPS track to magnetometer heading while the aeroplane is on the ground. This situation, if not corrected, could result in an undesired bank angle, heading splits and/or incorrect heading, which would constitute an unsafe condition.

As a short-term interim measure, AD 2009–0028–E has been released in February 2009 to limit at 30° the bank angle during climb. Afterwards, as a result of the ongoing investigation, the problem has been temporarily addressed with some limitations in the take-off procedure. These limitations have been mandated by AD 2009–0080–E which superseded AD 2009–0028–E.

In order to terminate the operational limitations, an updated ADAHRS version with improved software was developed. For the reasons described above, this AD supersedes AD 2009–0080–E and mandates as a terminating action either an update of the ADAHRS software or the replacement of the ADAHRS unit.

From MSN 1181 and subsequent an improved ADAHRS unit was implemented during production.

Actions and Compliance
(f) Unless already done, do the following actions:
(1) For MSN 545 and MSN 1001 through MSN 1180, before further flight after April 20, 2009 (the effective date of AD 2009–08–10), incorporate Pilatus Aircraft Ltd. Temporary Revision No. 11 to PC–12/47E Pilot’s Operating Handbook (POH), Report No. 02277, dated March 18, 2009, into the Pilatus PC–12/47E POH. The owner/operator holding at least a private pilot certificate as authorized by section 43.7 of the Federal Aviation Regulations 14 CFR 43.7 may do this action. Make an entry in the aircraft records showing compliance with this portion of the AD following 14 CFR 43.9.

(2) For MSN 545 and MSN 1001 through MSN 1180, within 180 days after April 1, 2010 (the effective date of this AD):
(i) Update the air data, attitude, and heading reference system (ADAHRS) software following the accomplishment instructions of Honeywell International Inc. Service Bulletin KSG 7200–34–04, Revision 0, dated September 24, 2009; or

(3) For MSN 545 and 1001 through 1180, before further flight after the actions required by paragraph (f)(2) of this AD, remove Pilatus Aircraft Ltd. Temporary Revision No. 11 to PC–12/47E Pilot’s Operating Handbook, Report No. 02277, dated March 18, 2009.

(4) Do not install an ADAHRS unit with Honeywell P/N 065–00188–5102 (Pilatus
P/N 985.99.12.192) on any affected Model PC–12/47E airplane, as follows:

(i) For MSN 545 and 1001 through 1180 airplanes, as of 180 days after April 1, 2010 (the effective date of this AD); and

(ii) For all other MSNs, as of April 1, 2010 (the effective date of this AD).

FAA AD Differences

Note: This AD differs from the MCAI and/or service information as follows: No differences.

Other FAA AD Provisions

(g) The following provisions also apply to this AD:

(1) Alternative Methods of Compliance (AMOCs): The Manager, Standards Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Doug Rudolph, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4059; fax: (816) 329–4050. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) Airstory Product: For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(3) Reporting Requirements: For any reporting requirement in this AD, under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 et seq.), the Office of Management and Budget (OMB) has approved the information collection requirements and has assigned OMB Control Number 2120–0056.

Related Information

Material Incorporated by Reference

(2) On April 20, 2009 (74 FR 17384, April 15, 2009), the Director of the Federal Register previously approved the incorporation by reference of Pilatus Aircraft Ltd. Temporary Revision No. 11 to PC–12/47E Pilot’s Operating Handbook, Report No. 02277, dated March 18, 2009.

(3) For service information identified in this AD:

(ii) Honeywell service information: contact Honeywell International Inc., 23500 West 105th Street, Olathe, Kansas 66061–8425, U.S.A., CAGE: 22373; telephone: (800) 601–3099 (toll free U.S.A./Canada); telephone: (602) 365–3099 (international direct); telephone: 00–800–601–3099 (EMEA Toll Free); telephone: 420–234–625–500 (EMEA Direct); Internet: http://www.bendixking.com; e-mail: Karen.Attebery@honeywell.com; telephone: (913) 712–2301; fax: (913) 712–2301.

(4) You may review copies of the service information incorporated by reference for this AD at the FAA, Central Region, Office of the Regional Counsel, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the Central Region, call (816) 365–3099 (national direct); telephone: 00–800–601–3099 (EMEA Toll Free); telephone: 420–234–625–500 (EMEA Direct); Internet: http://www.bendixking.com; e-mail: Karen.Attebery@honeywell.com; telephone: (913) 712–2301; fax: (913) 712–2301.

(5) You may also review copies of the service information incorporated by reference for this AD at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call (202) 741–6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

Issued in Kansas City, Missouri, on February 16, 2010.

Kim Smith,
Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 2010–3521 Filed 2–24–10; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

RIN 2120–AA64

Airworthiness Directives; ATR–GIE Avions de Transport Régional Model ATR42 and ATR72 Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule; request for comments.

SUMMARY: We are adopting a new airworthiness directive (AD) for the products listed above. This AD results from mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as:

The Civil Aviation Authority of the United Kingdom (UK) has informed EASA (European Aviation Safety Agency) that significant quantities of Halon 1211 gas, determined to be outside the required specification, have been supplied to the aviation industry for use in fire extinguishing equipment. As a result, this Halon 1211 has subsequently been used to fill certain portable fire extinguishers that are now likely to be installed in or carried on board ATR aeroplanes.

The contaminated nature of this gas, when used against a fire, may provide reduced fire suppression, endangering the safety of the aeroplane and its occupants. In addition, extinguisher activation may lead to the release of toxic fumes, possibly causing injury to aeroplane occupants.

This AD requires actions that are intended to address the unsafe condition described in the MCAI.

DATES: This AD becomes effective March 12, 2010.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in the AD as of March 12, 2010.

We must receive comments on this AD by April 12, 2010.

ADDRESSES: You may send comments by any of the following methods:

• Federal eRulemaking Portal: Go to http://www.regulations.gov. Follow the instructions for submitting comments.

• Fax: (202) 493–2251.
