NATIONAL SCIENCE FOUNDATION

Committee Management Renewals

The NSF management officials having responsibility for three advisory committees listed below have determined that renewing these groups for another two years is necessary and in the public interest in connection with the performance of duties imposed upon the Director, National Science Foundation (NSF), by 42 U.S.C. 1861 et seq. This determination follows consultation with the Committee Management Secretariat, General Services Administration.

Committees:
Advisory Committee for Environmental Research and Education, #9487.
Proposal Review Panel for Industrial Innovations and Partnerships, #28164.
Proposal Review Panel for Emerging Frontiers in Research and Innovation, #34558.

Effective date for renewal is March 1, 2010. For more information, please contact Susanne Bolton, NSF, at (703) 292–7488.

Susanne Bolton,
Committee Management Officer.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–266 and 50–301; NRC–2010–0078]

FPL Energy Point Beach, LLC; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Renewed Facility Operating License Nos. DPR–24 and DPR–27 issued to FPL Energy Point Beach, LLC (the licensee) for operation of the Point Beach Nuclear Plant, Units 1 and 2 located in the Town of Two Creeks, Manitowoc County, Wisconsin.

On July 14, 2009, the Nuclear Regulatory Commission published a Notice of Consideration of Issuance, Proposed No Significant Hazards Consideration Determination, and Opportunity for Hearing in the Federal Register (74 FR 34048) for a proposed amendment that would change the legal name of the licensee and owner from “FPL Energy Point Beach, LLC” to “NextEra Energy Point Beach, LLC.”

On January 19, 2010, the licensee submitted a supplement which expanded the original scope of work. The proposed revisions would correct an administrative error within a License Condition contained in Appendix C of the Renewed Facility Operating Licenses. The correction changes “FPLE Group Capital” to the appropriately titled “FPL Group Capital.”

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission’s regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission’s regulations in Title 10 of the Code of Federal Regulations (10 CFR), Section 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided an analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?
Response: No.
This request is for administrative changes only. No actual facility equipment or accident analyses will be affected by the proposed changes and no failure modes not bounded by previously evaluated accidents will be created. Therefore, this request will not create the possibility of a new or different kind of accident from any accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?
Response: No.
This request is for administrative changes only. No actual facility equipment or accident analyses will be affected by the proposed changes and no failure modes not bounded by previously evaluated accidents will be created. Therefore, this request will not create the possibility of a new or different kind of accident from any accident previously evaluated.
