DEPARTMENT OF AGRICULTURE

Departmental Management; Public Meeting on BioPreferredSM Intermediate Material and Feedstock Product Designation

AGENCY: Departmental Management, Office of Procurement and Property Management.

ACTION: Notice of public meeting.

SUMMARY: The U.S. Department of Agriculture (USDA) will hold a public meeting on April 1, 2010, for interested stakeholders to discuss the issue of intermediate material and feedstock (IMF) products that contain biobased materials. Intermediate materials and feedstocks represent those products frequently sold business to business, where the receiving business will use the product in some subsequent production or finishing cycle of a finished product. An example of an IMF product is a biobased plastic resin that can be used to produce fibers for fabrics, films for packaging and disposable cutlery.

This issue pertains to the designation by USDA of biobased products for a Federal Procurement preference, as mandated by the 2008 Farm Bill.

Speakers will include representatives from General Services Agency (GSA), Defense Logistics Agency (DLA), and a former government procurement official.

DATES: April 1, 2010, 8:30 a.m. to 1 p.m. (CST).

MEETING LOCATION: Iowa State University—Scheman Building at the intersection of University Boulevard and Lincoln Way, Ames, Iowa 50011.

Pre-registration for the public meeting on April 1, 2010, is not required but would be helpful, particularly if you wish to make a presentation. If you wish to register to attend the public meeting, please do so at this Web site: https://www.ucr.iastate.edu/mnet/biopreferred/sessionregister.html and state whether or not you wish to be recognized to make a formal presentation. The meeting is free of charge.

Directions to the Iowa State Center may be found at http://www.center.iastate.edu/newsite/guests/maps.asp and a map of the Iowa State University campus is accessible at http://www.fpm.iastate.edu/maps. The Scheman building is located just west of the Hilton Coliseum and north of the Jack Trice Stadium on the Campus Map. Parking for the event will be in Lots B1 and C1 just north of the building. The parking is free.

Those unable to attend the public meeting in person may listen to the meeting by calling 866–433–4616. The pass code is “635195”. Participants using the audio bridge may submit questions or comments during the meeting to USDABioInfo@iastate.edu or through the webinar itself, the exact link of which will be sent to participants via email after registering.

FOR FURTHER INFORMATION CONTACT: Ron Buckhalt, BioPreferred Manager, U.S. Department of Agriculture, Office of Procurement and Property Management, 361 Reporters Building, 300 7th Street, SW., Washington, DC 20024, (202) 205–4008, RonB.Buckhalt@DA.USDA.GOV.

SUPPLEMENTARY INFORMATION: Section 9002 of the Farm Security and Rural Investment Act of 2002 (Pub. L. 107–171) established a program for the procurement of USDA designated biobased products by Federal agencies and a voluntary program for the labeling of USDA certified biobased products. The Food, Conservation, and Energy Act of 2008 (2008 Farm Bill) (Pub. L. 110–246) continued these programs and made certain changes to the Federal procurement preference program. USDA refers to the procurement preference program and the voluntary labeling program together as the BioPreferredSM Program.

Due to the changes mandated by the 2008 Farm Bill, and the passage of five years since USDA first published the Guidelines for Designated Biobased Products for Federal Procurement (Guidelines) (7 CFR 2902), USDA intends to revise the Guidelines in 2010. USDA is holding three public meetings to gather input from interested stakeholders on what should be considered when revising the Guidelines. The first meeting, which occurred in January in Washington, DC, addressed evaluation of environmental impacts associated with the manufacture, use, and disposal of biobased products. The second meeting, held in February in Riverside, CA addressed the designation of complex assembly products under the BioPreferred program.

The purpose of the April 1, 2010, meeting, which is the third of the three meetings, will be to stimulate discussion and gather input from stakeholders on how USDA can effectively implement the designation of intermediate material and feedstock products for Federal preferred procurement status under the BioPreferred program as required by the 2008 Farm Bill.

Under the current Guidelines, USDA designates “finished” products by collecting information on available biobased products, manufacturers, and distributors to determine potential product categories and tests products for biobased content using ASTM International Standard Test Methods for Determining the Biobased Content of Solid, Liquid, and Gaseous Samples Using Radiocarbon Analysis, D–6866. USDA also evaluates environmental and human health benefits and lifecycle costs of categories using the Building for Environmental and Economic Sustainability (BEES) model developed by the National Institute of Standards and Technology.

To set the stage before opening the forum for public comment, USDA has invited to the public meeting speakers from USDA, the Environmental Protection Agency (EPA), and individuals from academia and industry who are well-versed in biobased materials, manufacturing and products. USDA is seeking answers to a series of questions about intermediate material and feedstock products and their role in designating biobased products for Federal Procurement.

These questions include:

• How should intermediate products be defined?
• The proposed rule for the Voluntary Labeling Program states that intermediate products and feedstocks do not include raw agricultural and forestry materials. How should “raw agricultural materials” be defined?
• What types of intermediate products should be included, and how should they be categorized?

• What are the costs of categories using the Building for Environmental and Economic Sustainability (BEES) model developed by the National Institute of Standards and Technology.

• How might USDA use this model to evaluate the benefits of biobased products compared to synthetic materials?

• What are the potential environmental impacts associated with the manufacturing, use, and disposal of biobased products?

• What are the economic benefits of using biobased products?

• What are the potential human health benefits of using biobased products?

• How can USDA work with stakeholders to develop a comprehensive framework for designating intermediate material and feedstock products for Federal procurement?

Task Force on Childhood Obesity: Request for Information

ACTION: Joint request for comments.

SUMMARY: Across the country, childhood obesity has reached epidemic rates. On February 9, 2010, President Obama signed a Presidential Memo establishing a Task Force on Childhood Obesity that directs Federal agencies to create a comprehensive interagency national action plan to solve the challenge of childhood obesity within a generation. The Presidential Memo directs the Task Force to focus on four pillars: Ensuring access to healthy, affordable food; increasing physical activity in schools and communities; providing healthier food in schools; and empowering parents with information and tools to make good choices for themselves and their families. This notice announces a request for public comments to assist the Task Force in making recommendations on public and private sector actions that can be taken to solve the problem.

DATES: To be assured of consideration, written comments must be submitted or postmarked on or before March 26, 2010.

ADDRESSES: Comments may be submitted through the Federal eRulemaking Portal at http://www.regulations.gov. Follow the online instructions for submitting comments. Comments may also be submitted by fax or by mail to: Director, Office of Executive Secretariat, U.S. Department of Agriculture, 1400 Independence Avenue, SW., Room 116–A Whitten Building, Washington, DC 20250 (FAX: 202–720–7166); however, respondents are strongly encouraged to submit comments through http://www.regulations.gov, as it will simplify the review of their input and help to ensure that it receives full consideration. All comments submitted in response to this notice will be included in the record and will be made available to the public. Please be advised that the substance of the comments and the identity of the individuals or entities submitting the comments will be subject to public disclosure. All comments will be made available publicly on the internet at http://www.regulations.gov.

FOR FURTHER INFORMATION CONTACT: Aloxia Green, Office of the Executive Secretariat, United States Department of Agriculture, 202–720–1570.

SUPPLEMENTARY INFORMATION: Nearly one-third of children in America are overweight or obese—a rate that has tripled in adolescents and more than doubled in younger children since 1980. One-third of all individuals born in the year 2000 or later will eventually suffer from diabetes over the course of their lifetime, while too many others will face chronic obesity-related health problems such as heart disease, high blood pressure, cancer, and asthma. Without effective intervention, many more children will endure serious illnesses that will put a strain on our health-care system and reduce their quality of life.

President Obama has set a goal to solve the problem of childhood obesity within a generation so that children born today will reach adulthood at a healthy weight. To reach that goal, President Obama signed a Presidential Memorandum on February 9, 2010, establishing a Task Force on Childhood Obesity that directs Federal agencies to create a comprehensive interagency national action plan to solve the challenge of childhood obesity within a generation. The Task Force is chaired by the Assistant to the President for Domestic Policy and composed of senior Federal officials representing the White House, the Office of Management and Budget, and the Departments of Interior, Agriculture, Health and Human Services, and Education, as well as senior officials of other executive departments, agencies, or offices designated by the chair. The Presidential Memorandum directs the Task Force to make recommendations that include, but are not limited to, meeting four objectives: (1) Ensuring access to healthy, affordable food; (2) increasing physical activity in schools and communities; (3) providing healthier food in schools; and (4) empowering parents with information and tools to make good choices for themselves and their families.

The specific responsibilities of the Task Force are to:

1. Detail a coordinated strategy by executive departments and agencies to meet the objectives of the Task Force and identify areas for reform to ensure complementary efforts and avoid duplication, both across the Federal Government and between other public or nongovernmental actors;

2. Include comprehensive, multi-sectoral strategies from each member executive department, agency, or office and describe the status and scope of its efforts to achieve this goal;

3. Identify key benchmarks and provide for regular measurement, assessment, and reporting of executive branch efforts to combat childhood obesity;

4. Describe a coordinated action plan for identifying relevant evidence gaps and conducting or facilitating needed research to fill those gaps;

5. Assist in the assessment and development of legislative, budgetary, and policy proposals that can improve the health and well-being of children, their families, and communities; and

6. Describe potential areas of collaboration with other public or nongovernmental actors, taking into consideration the types of implementation or research objectives the Federal Government, other public actors, or nongovernmental actors may be particularly well-situated to accomplish.

In addition, the Presidential Memo directs the Task Force to conduct outreach with representatives of private and nonprofit organizations, State, tribal, and local authorities, and other interested persons who can assist with the Task Force’s development of a detailed set of recommendations to solve the problem of childhood obesity.
