I. Background

On September 27, 2007, the President signed into law the Food and Drug Administration Amendments Act of 2007 (FDAAA) (Public Law 110–85). This law amends the Federal Food, Drug, and Cosmetic Act (the act) by creating a new section 417 (21 U.S.C. 350f), Reportable Food Registry. Section 417 of the act requires the Secretary of Health and Human Services (the Secretary) to establish within FDA a Reportable Food Registry. The congressionally-identified purpose of the Reportable Food Registry is to provide a “reliable mechanism to track patterns of adulteration in food [which] would support efforts by the Food and Drug Administration to target limited inspection resources to protect the public health” (Section 1005(a)(4) of FDAAA). The Secretary has delegated to the Commissioner of the Food and Drug Administration the responsibility for administering the act, including section 417. To further the development of the Reportable Food Registry, section 417 of the act requires FDA to establish an electronic portal by which instances of reportable food must be submitted to FDA by responsible parties and may be submitted by public health officials. After receipt of reports through the electronic portal, FDA is required to review and assess the information submitted for purposes of identifying reportable food, submitting entries to the Reportable Food Registry, issuing an alert or notification as FDA deems necessary, and exercising other existing public health authorities under the Reportable Food Registry, section 417 of the act have been approved under OMB Control No. 0910–0645.
