of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency’s estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Interested persons are invited to submit written comments concerning this rule. Comments must be sent to the Docket Clerk, Marketing Order Administration Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, SW, STOP 0237, Washington, DC 20250–0237; Fax: (202) 720–8938; or Internet: http://www.regulations.gov. Comments should reference the docket number and the date and page number of this issue of the Federal Register.

All comments received will be available for public inspection during regular business hours at the same address, or can be viewed at: http://www.regulations.gov. All responses to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record.

Dated: April 7, 2010.

David R. Shipman,
Acting Administrator, Agricultural Marketing Service.

BILLING CODE 3410–02–P

DEPARTMENT OF AGRICULTURE

National Agricultural Library

Notice of Intent to Seek Approval To Collect Information

AGENCY: USDA, Agricultural Research Service, National Agricultural Library.

ACTION: Notice and request for comments.

SUMMARY: This notice announces the National Agricultural Library’s (NAL) intent to request the approval of the Food Safety Education and Training Materials Sharing form from people who work in the food safety education and training fields.

DATES: Comments on this notice must be received by June 16, 2010 to be assured of consideration.

ADDRESSES: Address all comments concerning this notice to Tara Smith, U.S. Department of Agriculture, National Agricultural Library, 10301 Baltimore Avenue, Room #304, Beltsville, Maryland 20705. Comments may be sent by fax to (301) 504–7680, or by e-mail to tara.smith@ars.usda.gov.

FOR FURTHER INFORMATION CONTACT: Tara Smith, telephone (301) 504–5515.

SUPPLEMENTARY INFORMATION:

Title: Food Safety Education and Training Materials Sharing Form.

OMB Number: 0518–XXXX.

Expiration Date: Three years from the date of approval.

Type of Request: Approval for data collection from individuals working in the areas of food safety education and training.

Abstract: The Food Safety Education and Training Materials Sharing form contains three sections and is used to collect information about materials developed to support food safety education (e.g. DVDs, posters, curriculum, kits) for inclusion in NAL’s Food Safety Education and Training Materials Database. The questionnaire collects the name and email address of the person submitting the form, information on the resource/education material developed (e.g. title, target audience focus, a description, publisher/distributor information and information on the author) to determine if a readability formula was used or if the project is associated with a grant or other funded mechanism.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 15 minutes per respondent.

Respondents: Individuals working in the areas of food safety education and training.

Estimated Number of Respondents: 35 per year.

Estimated Total Annual Burden on Respondents: 525 minutes or 8.75 hours.

Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (b) the accuracy of the Agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and the assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who respond, including the use of appropriate automated, electronic, mechanical, or other technology. Comments should be sent to the address in the preamble. All responses to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record.

Dated: March 18, 2010.

Caird E. Rexroad, Jr.,
Associate Administrator, ARS.

BILLING CODE 3410–03–P

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

Cooperative Conservation Partnership Initiative

AGENCY: Commodity Credit Corporation and Natural Resources Conservation Service, Department of Agriculture.

ACTION: Notice of request for proposals.

SUMMARY: Section 2707 of the Food, Conservation, and Energy Act of 2008 (2008 Act) establishes the Cooperative Conservation Partnership Initiative (CCPI) by amending section 1243 of the Food Security Act of 1985 [16 U.S.C. 3843]. The Secretary of Agriculture has delegated the authority to administer CCPI to the Chief of the Natural Resources Conservation Service (NRCS), who is Vice President of the Commodity Credit Corporation (CCC). NRCS is an agency of the Department of Agriculture (USDA). The CCPI is a voluntary conservation initiative that enables the use of certain conservation programs along with resources of eligible partners to provide financial and technical assistance to owners and operators of agricultural and nonindustrial private forest lands. In fiscal year (FY) 2010, NRCS will make Environmental Quality Incentives Program (EQIP), Conservation Stewardship Program (CSP), and Wildlife Habitat Incentive Program (WHIP) funds available to owners and operators of agricultural and nonindustrial private forest lands who participate in approved CCPI project areas.

The purpose of this notice is to solicit proposals from potential partners who seek to enter into partnership agreements with NRCS to provide assistance to producers enrolled in the various programs listed above, and to inform agricultural producers of the potential availability of program funds through approved projects.

DATES: Effective Date: The notice of request is effective April 12, 2010.
Eligible partners may submit proposals by mail or via courier.
- **By mail:** Proposals must be postmarked May 27, 2010.
- **By courier:** Proposals must be delivered by May 27, 2010.

**ADDRESSES:** Written proposals should be submitted to the addresses identified below, with copies to the appropriate NRCS State Conservationist whose names and addresses are identified as an attachment to this notice. If a project is multi-State in scope, potential partners must send each State Conservationist in the proposed project area the proposal for review.
- **By mail:** Gregory K. Johnson, Director, Financial Assistance Programs Division, Department of Agriculture, Natural Resources Conservation Service, “National CCPI Proposal,” 1400 Independence Avenue, SW., Room 5239 South Building, Washington, DC 20250. (Note: Registered or Certified Mail to a Post Office Box will not be accepted.)
- **By courier:** Gregory K. Johnson, Director, Financial Assistance Programs Division, Department of Agriculture, Natural Resources Conservation Service, “National CCPI Proposal,” 1400 Independence Ave., SW., Room 5239 South Building, Washington, DC 20250. Proposals will be accepted between 9 a.m. and 4 p.m. Eastern time, Monday through Friday, except Federal holidays. Please ask the guard at the entrance to the South Building to call (202) 720–1845.

Note: Proposals submitted by fax, e-mail, or after the deadline date listed in this notice will not be considered.

**FOR FURTHER INFORMATION CONTACT:**
- Gregory Johnson, Director, Financial Assistance Programs Division, Department of Agriculture, Natural Resources Conservation Service, 1400 Independence Avenue, SW., Room 5239 South Building, Washington, DC 20250; Telephone: (202) 720–1845; fax: (202) 720–4265; or e-mail: CCPI@wdc.usda.gov. Additional information regarding CCPI is available at the following NRCS Web page: http://www.nrcs.usda.gov/programs/CCPI/.
- Persons with disabilities who require alternative means for communication (Braille, large print, audio tape, etc.) should contact the USDA TARGET Center at: (202) 720–2600 (voice and TDD).

**SUPPLEMENTARY INFORMATION:**

**Revisions to the CCPI Notice**

The fiscal year (FY) 2010 notice of request for proposals includes significant additions in comparison with the notice issued in FY 2009. Generally, the basic authority, procedures, and program requirements have not changed. Partners who responded to the FY 2009 notice reported difficulty in understanding where and how to apply, confusion about administration and purpose of the new CCPI authority and requirements of partners, misunderstanding that CCPI was not a grant program for partners, lack of knowledge about NRCS resource concerns and conservation practices that needed to be addressed through the partnership, frustration in NRCS terminology used in the notice, and other concerns. As the result of these concerns, the agency is revising this notice to provide better explanation of the program and requirements for proposal submission. This notice includes more explanation of the program, added definitions, clarification of the requirements and criteria to be addressed in the proposal, links to resources to help partners apply, and other general improvements. While the FY 2010 notice is longer than the FY 2009, the actual requirements for submission of the proposal are not significantly different and pose no additional burden or workload.

**Availability of Funding**

Effective on the publication date of this notice, NRCS announces the availability of at least $5 million in financial assistance to support new projects during FY 2010. NRCS will implement CCPI by entering into partnership agreements with eligible State and local governments, federally recognized Indian tribes, producer associations, farmer cooperatives, institutions of higher education, and nongovernmental organizations with a history of working cooperatively with producers.

NRCS will implement CCPI by entering into partnership agreements with eligible entities to provide financial and technical assistance to owners and operators of agricultural and nonindustrial private forest lands to address priority natural resource concerns. Eligible partners must submit complete proposals to Gregory K. Johnson, Director, Financial Assistance Programs Division. Proposals are submitted by eligible partners, and project evaluation will be based upon a competitive process and the criteria established in this notice. Once the Chief approves and announces the proposals selected, agricultural producers within the approved project areas may submit an application directly to NRCS for one or more of the following programs that may be approved for the project: EQIP, CSP, or WHIP.

The following are eligible to submit a proposal and enter into a partnership agreement with NRCS: Federally recognized Indian tribes; State and local units of government; producer associations; farmer cooperatives; and institutions of higher education or nongovernmental organizations with a history of working cooperatively with producers. Nongovernmental organizations are entities as defined by the Internal Revenue Service and as cited in the definitions section of this notice. This is not a grant program, and all Federal funds made available through this request for proposals will be paid directly to producers through program contract agreements. No technical assistance funding may be provided to a partner through the CCPI partner agreement. However, if requested by a partner, the State Conservationist may consider development of a separate contribution agreement with a qualified partner to provide funding for delivery of technical services to producers participating in an approved CCPI project.

Individual agricultural producers are not CCPI eligible entities and may not submit proposals, nor may they apply for program benefits through this proposal submission process. No Federal CCPI funding may be used to cover partner’s administrative expenses. Administrative activities include any indirect or direct costs relating to submitting or implementing the project proposal. This notice provides information about CCPI and instructions for submitting partner proposals. Project approval and development of partnership agreements for projects will be based on competitive evaluation and the criteria established in this notice.

**Definitions**

**Agricultural land** means cropland, grassland, rangeland, pasture, and other agricultural land on which agricultural and forest-related products or livestock are produced and resource concerns may be addressed. Other agricultural lands may include cropped woodland, marshes, incidental areas included in the agricultural operation, and other types of agricultural land used for production of livestock.

**Agricultural operation** in reference to CSP means all agricultural land and other land, as determined by NRCS, whether contiguous or noncontiguous:

1. Which is under the effective control of the producer for the term of the proposed contract; and
(2) Which is operated by the producer with equipment, labor, management, and production or cultivation practices that are substantially separate from other operations.

Animal waste storage or treatment facility means a structural conservation practice used for storing or treating animal waste.

Applicant means a person, legal entity, joint operation, or tribe that has an interest in an agricultural or forestry operation, as defined in 7 CFR part 1400, who has requested to participate in EQIP, CSP, or WHIP.

Beginning Farmer or Rancher means a person or legal entity who:

(1) Has not operated a farm or ranch, or who has operated a farm or ranch for not more than 10 consecutive years. This requirement applies to all members of an entity who will materially and substantially participate in the operation of the farm or ranch.

(2) In the case of a contract with an individual or a single entity who is a farm or rancher, material and substantial participation requires that the individual provide substantial day-to-day labor and management of the farm or ranch consistent with the practices in the county or State where the farm is located.

(3) In the case of a contract with an entity or joint operation, all members must materially and substantially participate in the operation of the farm or ranch. Material and substantial participation requires that each of the members provide some amount of the management or labor necessary for day-to-day activities, such that if each of the members did not provide these inputs, operation of the farm or ranch would be seriously impaired.

Chief means the Chief of the Natural Resources Conservation Service, or designee.

Conservation Activity Plan means a resource-specific conservation plan prepared by a certified Technical Service Provider (TSP) as authorized by the 2008 Act for financial assistance payment through EQIP for eligible land of the producer.

Conservation activities related to CSP means conservation systems, practices, or management measures needed to address a resource concern or improve environmental quality through the treatment of natural resources, and includes structural, vegetative, and management activities, as determined by NRCS. In general and for other programs, the term conservation activities includes any kind of measure, treatment, or activity associated with an agricultural operation which may or may not be associated with an NRCS conservation practice or program support.

Conservation Measurement Tool means procedures developed by NRCS to estimate the level of environmental benefit to be achieved by a producer using the proxy of conservation performance improvement.

Conservation practice means one or more conservation improvements and planning activities including structural practices, land management practices, vegetative practices, forest management practices, and other improvements that achieve the program purposes that are planned and installed in accordance with standards and specifications contained in the NRCS Field Office Technical Guide (FOTG). Only EQIP may provide financial assistance for support of the activity of conservation planning. Conservation practices funded through CCPI are subject to requirements of each of the authorized programs:

Conservation Stewardship Program means a record of the participant’s decisions that describes the schedule of operations and conservation activities to be implemented, managed, maintained, or improved. Associated supporting information that identifies and inventories resource concerns and existing conservation activities, establishes benchmark data, and documents the participant’s conservation objectives will be maintained with the plan.

Conservation system means a combination of conservation practices, management measures, and enhancements used to address natural resource and environmental concerns in a comprehensive, holistic, and integrated manner.

Contract as defined in the EQIP and CSP regulation means a legal document that specifies the rights and obligations of any participant accepted to participate in EQIP or CSP. A program contract is a binding agreement for the transfer of assistance from USDA the participant to share in the costs of applying conservation practices.

Cost-share agreement as defined in the WHIP regulation means a legal document that specifies the rights and obligations of any participant accepted into WHIP. A WHIP cost-share agreement is a binding agreement for the transfer of assistance from USDA to the participant to share in the costs of applying conservation.

Conservation Stewardship Program means a program administered by NRCS in accordance with 7 CFR part 1470, which provides for technical and financial assistance to encourage producers to address resource concerns in a comprehensive manner by undertaking additional conservation activities and improving, maintaining, and managing existing conservation activities.

Cropland means land used primarily for the production of adapted crops for harvest, including but not limited to land in row crops or close-grown crops, forage crops that are in a rotation with row or close-grown crops, permanent hayland, horticultural crops, vineyards, cropped woodland, marshes, cranberry bogs, and other lands used for crop production.

Cropped woodland and marshes means woodland and marshes in which at least 50 percent of the area is actively managed to produce an agricultural product. The crop may be grown symbiotically within the system, such as ginseng and wild rice, or harvested directly from the trees, such as maple syrup. Once established, the agricultural product is harvested annually.

Designated conservationist means an NRCS employee whom the State Conservationist has designated as responsible for administration of NRCS programs at the local level.

Enhancement means a type of conservation activity associated with CSP used to treat natural resources and improve conservation performance. Enhancements are installed at a level of management intensity that exceeds the sustainable level for a given resource concern, and those directly related to a practice standard are applied in a manner that exceeds the minimum treatment requirements of the standard.

Environmental Quality Incentives Program means a program administered by NRCS in accordance with 7 CFR part 1466 (http://www.nrcs.usda.gov/programs/equip) which provides technical and financial assistance to eligible producers for the installation and implementation of conservation practices and activities on private agricultural and nonindustrial forest lands.

Field Office Technical Guide means the official local NRCS source of...
resource information, conservation practice standards, specifications, and interpretation of guidelines, criteria, and requirements for planning and applying conservation practices and conservation management systems. It contains natural resource quality criteria to be achieved to provide for the conservation and sustainability of soil, water, air, plant, and animal resources applicable to the geographic area where resource concerns are addressed. The FOTG can be accessed online at: http://www.nrcs.usda.gov/technical/efotg/. Financial assistance means a payment made to the program participant.

**Joint operation** means a general partnership, joint venture, or other similar business arrangement in which the members are jointly and severally liable for the obligations of the organization.

**Limited Resource Farmer or Rancher** means:
1. A person with direct or indirect gross farm sales of not more than $155,200 in each of the previous 2 years (adjusted for inflation using Prices Paid by Farmer Index as compiled by the National Agricultural Statistical Service); and
2. Has a total household income at or below the national poverty level for a family of four, or less than 50 percent of county median household income in each of the previous 2 years (to be determined annually using Department of Commerce data).

**Local working group** means the advisory body pursuant to 16 U.S.C. 3861 et seq., or another plan determined appropriate by the State Conservationist. The plan must comply with Federal, State, tribal, and local laws, regulations, and permit requirements.

**Hayland** means a subcategory of cropland managed for the production of forage crops that are machine harvested. The crop may be grasses, legumes, or a combination of both.

**Indian land** means:
- An inclusive term describing all lands held in trust by the United States for individual Indians or tribes, or all lands, titles to which are held by individual Indians or tribes, subject to Federal restrictions against alienation or encumbrance, or all lands that are subject to the rights of use, occupancy, and benefit of certain tribes.
- For purposes of this notice, the term Indian land also includes land for which the title is held in fee status by Indian tribes, and the U.S. Government owned land under Bureau of Indian Affairs jurisdiction.

**Indian tribe** means any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.) that is federally recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

**Joint agreement** means a business arrangement where two or more participants cooperate to carry out conservation practices that can best be accomplished by combining resources. Such agreements must be formally documented and signed by all applicable parties.

**Partnership agreement** means a multi-year agreement between NRCS and the partner. The CCPI partnership agreement describes the activities and resources, such as technical or financial assistance, that may be provided by NRCS and the partner to help producers meet the objectives of CCPI in an approved project area. The CCPI partnership agreement does not transfer financial or technical assistance funding to a partner, nor provide for the administrative expenses of the partner. Individual producers may not enter into partnership agreements under CCPI authority.

**Pastureland** means grazing lands comprised of introduced or domesticated native forage species that are used primarily for the production of livestock. They receive periodic renovation and cultural treatments such as tillage, fertilization, mowing, weed control, and may be irrigated. They are not grown in rotation with crops.

**Payment** means financial assistance provided to a program participant under the terms of the contract or cost-share agreement. Payments and payment rates are established by program rule. Payments are only provided to assist with implementation of approved conservation practices and activities listed in the FOTG and must meet all other applicable program requirements.

**Priority resource concern** means a resource concern that is identified by the State Conservationist, with advice from the State Technical Committee and local work groups, as a priority for a State or the specific geographic areas within a State.

**Producer** means a person, legal entity, or joint operation who has an interest in the agricultural operation, according to
7 CFR part 1400, or who is engaged in agricultural production or forestry management.

Projects of special environmental significance means projects, as defined in 7 CFR 1466(d) and approved by the Chief, which meet the following criteria:

(1) Site-specific evaluations have been completed, documenting that the project will have substantial positive impacts on critical resources in or near the project area (e.g., impaired water bodies or at-risk species);

(2) The project clearly addresses a national priority and/or State, tribal, or local priorities, as applicable; and

(3) The project assists the participant in complying with Federal, State, and local regulatory requirements.

Rangeland means land on which the historic climax plant community is predominantly grasses, grass-like plants, forbs, or shrubs and includes lands revegetated naturally or artificially when routine management of that vegetation is accomplished mainly through manipulation of grazing. Rangelands include natural grasslands, savannas, shrublands, most deserts, tundra, alpine communities, coastal marshes, and wet meadows.

Resource concern means a specific natural resource problem that represents a significant concern in a State or region, and is identified in the proposal to be addressed through the implementation of conservation practices by producers. Resource concerns used by NRCS are found in section III of each State or local FOTG which can be viewed at: http://www.nrcs.usda.gov/technical/efotg/. Examples of natural resource concerns include soil quality, water conservation, water quality, plant condition, air quality, domestic animals, fish and wildlife habitat, and other subcategories of resource concerns.

Resource-conserving crop means a crop that is one of the following:

(1) A perennial grass, legume, or grass/legume grown for use as forage, seed for planting, or green manure.

(2) A high residue producing crop.

(3) A cover crop following an annual crop.

Resource-conserving crop rotation means a crop rotation that:

(1) Includes at least one resource conserving crop as determined by the State Conservationist.

(2) Reduces erosion.

(3) Improves soil fertility and tilth.

(4) Interrupts pest cycles.

(5) Reduces depletion of soil moisture or otherwise reduces the need for irrigation in applicable areas.

Socially Disadvantaged Farmer or Rancher means a farmer or rancher who has been subjected to racial or ethnic prejudices because of their identity as a member of a group without regard to their individual qualities. Those groups include African Americans, American Indians or Alaskan natives, Hispanics, Asians, and native Hawaiians or other Pacific Islanders.

State Conservationist means the NRCS employee who is authorized to implement conservation programs administered by NRCS and who directs and supervises NRCS activities in a State, the Caribbean Area, or the Pacific Islands Area.

State Technical Committee means a committee established by the USDA Secretary in a State pursuant to 16 U.S.C. 3861 and described in 7 CFR part 610. Information regarding these committees can be found at: http://www.nrcs.usda.gov/programs/StateTech/.

Technical assistance means technical expertise, information, and tools necessary for the conservation of natural resources on land active in agricultural, forestry, or related uses. The term includes: (1) Technical services provided directly to farmers, ranchers, and other eligible entities, such as conservation planning, technical consultation, and assistance with design and implementation of conservation practices; and (2) technical infrastructure including activities, processes, tools, and agency functions needed to support delivery of technical services, such as technical standards, resource inventories, training, data, technology, monitoring, and effects analyses. Information regarding technical assistance can be found at: http://www.nrcs.usda.gov/programs/cta/.

Technical Service Provider means an individual, private-sector entity, or public agency certified by NRCS, in accordance with 7 CFR part 652, to provide technical services to program participants in lieu of or on behalf of NRCS.

Wildlife Habitat Incentive Program means a program administered by NRCS in accordance with 7 CFR part 636, which provides for technical and financial assistance to protect, restore, develop, and enhance wildlife habitat.

Overview of the Cooperative Conservation Partnership Initiative

Background

The CCPI is a voluntary conservation initiative that enables the use of certain conservation programs along with resources of eligible partners to provide financial and technical assistance to owners and operators of agricultural and nonindustrial private forest lands and will enhance conservation outcomes. Depending upon the program available, the assistance provided enables participants to implement conservation practices and enhancements, including the development and adoption of innovative conservation practices and management approaches. The partner is not required to provide financial or technical resources toward the project (match); however, proposals that include or offer partner provided resources will be given higher priority consideration in the evaluation process. CCPI financial assistance is delivered directly to producers in approved project areas through program contracts or cost-share agreements; no CCPI funding may be used to cover the partner’s administrative expenses. CCPI uses the funds, policies, and processes of EQIP, CSP, and WHIP to deliver assistance to owners and operators of agricultural and nonindustrial private forest land to implement approved conservation practices and activities. Under CCPI, NRCS enters into partnership agreements with eligible entities that want to enhance conservation outcomes on agricultural and nonindustrial private forest land. As part of the partnership agreement, approved partners may also help facilitate the submission of producers’ program applications, or they may provide additional technical or financial assistance to participating agricultural producers or provide other resources as defined in the partnership agreement. A primary intent of CCPI is to leverage non-Federal government resources along with NRCS program resources to achieve resource conservation objectives. The purposes of the CCPI partnership agreement are to:

(1) Address conservation priorities involving agriculture and nonindustrial private forest land on local, State, multi-State, or regional levels;

(2) Encourage producers to cooperate in meeting applicable Federal, State, and local regulatory requirements related to production;

(3) Encourage producers to cooperate in the installation and maintenance of conservation practices; and

(4) Promote the development and demonstration of innovative conservation practices and delivery methods, including practices associated with specialty crop and organic production and precision agriculture operations.

Partners who may enter into partnership agreements with NRCS include federally recognized Indian tribes, State and local units of
government, producer associations, farmer cooperatives, institutions of higher education, and nongovernmental organizations with a history of working cooperatively with producers to effectively address conservation priorities related to agricultural production and nonindustrial private forest land. Individual agricultural producers are not an eligible partner entity and may not submit CCPI proposals. Potential entity partners may submit proposals that request assistance for a specified project area that may be defined by geo-political boundaries, watershed boundaries, or resource concern. The written proposal must describe the area to be covered by the project, conservation priorities in the area, conservation objectives to be achieved, and the number of producers including nonindustrial private forest landowners who are likely to participate; a description of the partner or partners collaborating to achieve the objectives of the agreement, and the roles, responsibilities, and capabilities of the partner(s); the resources requested from the Chief and the partner; the plan for monitoring, evaluating, and reporting on progress made towards achieving the objectives of the agreement; and other information that may be required.

Once a partnership proposal is selected and the project announced, eligible individual producers located within the project area may apply directly to NRCS for funding under the appropriate conservation program. Individual applications from eligible producers will be evaluated and ranked to ensure that producer applications selected for funding are most likely to achieve project objectives. All Federal funds made available through this CCPI request for proposals will be provided directly to eligible participants through EQIP and CSP program contracts and WHIP cost-share agreements. Producers interested in applying must meet the eligibility requirements of the program for which they are applying.

No technical or financial assistance funding may be provided to a partner through the CCPI partner agreement. However, if requested by a partner, the State Conservationist or Chief may consider development of a separate funding agreement with a qualified partner for delivery of technical services to producers participating in an approved CCPI project.

During FY 2010, an objective of CCPI is to deliver EQIP, CSP, and WHIP assistance to producers to achieve high-priority conservation objectives in geographic areas defined by the partner. Where flexibility is needed to meet project objectives, the partner may request that program adjustments be allowed, provided such policy adjustments are within the scope of the applicable programs’ statutory and regulatory program authorities. An example of a program adjustment may be to expedite the applicable program ranking process in a situation where a partner has identified the producers approved to participate in the project. Other examples of program adjustments may include flexibility in payment rate, or using a single area-wide plan of operations rather than individual plans of operations.

Submitting Proposals

Potential partners must submit proposals to Gregory K. Johnson, Director, Financial Assistance Programs Division, addressing all questions and items listed in the “Proposal Requirements” section of this notice. The proposals must be submitted by the date and time identified in this notice. The proposal must include sufficient detail to allow agency reviewers to understand the partner’s priority resource concerns, objectives, and expected outcomes.

Incomplete proposals and those that do not meet the requirements set forth in this notice will not be considered, and notification of elimination will be mailed to the applicant. State Conservationists are expected to provide guidance to potential partners regarding resource concerns that may be addressed in the proposed project area, local working group and State Technical Committee natural resource priorities, approved conservation practices and activities, and other program requirements the partner should consider when developing a proposal. No agency form is provided; potential partners must provide a narrative proposal following the requirements set forth in this notice.

NRCS will review and evaluate the proposals based on the criteria set forth in this notice. Positive consideration will be given to proposals that provide for outreach to beginning farmers or ranchers, socially disadvantaged farmers or ranchers, limited resource farmers or ranchers, and Indian tribes within the area covered by the project. Priority consideration will also be given to proposals that both achieve program purposes, including regional efforts that cross State boundaries, and further the Nation’s efforts with renewable energy production, energy conservation, mitigating the effects of climate change, facilitating climate change adaptation, or fostering carbon sequestration. CCPI proposals submitted to NRCS become the property of the agency for use in the administration of the program, may be filed or disposed of by the agency, and will not be returned to the potential partner. Once proposals have been submitted for review and ranking, there will be no further opportunity to change or re-submit the proposal.

Partner Entity Eligibility

Those eligible to participate as partners include federally recognized Indian tribes, State and local units of government, producer associations, farmer cooperatives, institutions of higher education, or nongovernmental organizations with a history of working cooperatively with producers to effectively address conservation priorities related to agricultural production and nonindustrial private forest land. Individual producers are not eligible to submit proposals under CCPI authorities.

Land Eligibility

The following land is eligible for enrollment in the CCPI:

- Private agricultural and nonindustrial private forest land
- Land meeting the covered programs (EQIP, CSP, and WHIP) eligibility rules

Eligible land is defined for each program in regulation:

- EQIP: 7 CFR 1466.8(c)
- CSP: 7 CFR 1470.6(b)
- WHIP: 7 CFR 636.4(b)

Producer Application and Program Contracts

Producers interested in participating in an approved CCPI project may apply for assistance at their local USDA service center. The designated conservationist will help the producer determine which program (EQIP, CSP, or WHIP) is appropriate based on the practices and activities the applicant seeks to install or perform to meet the approved partner project objectives. Producers seeking to participate in a CCPI project must meet all program-specific eligibility requirements. The requirements that apply to the contract or cost-share agreement are determined by the program selected. For information on program payment limitations and benefits or other program requirements that may apply to land and producers enrolled in EQIP, CSP, and WHIP, consult the appropriate programs’ regulation as stated in this notice. Additional information can be found at NRCS Web site at: http://www.nrcs.usda.gov/programs.

An agricultural producer may elect to use a TSP for technical assistance associated with conservation planning or practice design and implementation. Producers...
Proposal Requirements

For consideration of a proposal, a potential partner must submit five copies of the written proposal and one electronic copy. Projects may not exceed 5 years in length. The proposal must be in the following format and contain the information set forth below:

Proposal Format: There are no forms required or associated with the CCPI proposal process. Five copies of the proposal should be typewritten or printed on 8½” x 11” white paper. The text of the application should be in a font no smaller than 12-point, with one-inch margins. One additional copy of the proposal shall be in a format such as Microsoft Word or PDF on one CD ROM. If submitting more than one project proposal, submit a separate complete document for each project. Consult the NRCS national CCPI Web site for an example of an acceptable CCPI proposal document at: http://www.nrcs.usda.gov/programs/ccpi/. The entire project proposal may not exceed 12 pages in length including summary, maps, reference materials, and related reports.

Proposal Summary

The basic format for the CCPI proposal is a narrative written response to the questions and information requested in this notice. The proposal must include the following:

1. Proposal Cover and Summary: The first two pages of the proposal must include:
   (a) Project Title.
   (b) Project director/manager name, telephone number, and e-mail address.
   (c) Name of lead partner entity submitting proposal and other collaborating partners.
   (d) Mailing address and telephone numbers for lead partner submitting proposal.
   (e) Short general description/summary of project and description of resource issues to be addressed. Identify the specific natural resource concerns to be addressed.
   (f) List of approved FOTG conservation practices, enhancements, and conservation activity plans that will be used to address those resource concerns.
   (g) Specify the geographic location: State; county(s); congressional districts; and whether proposal is a national multi-State or within-State proposal.
   Include a general location map.
   (b) Project proposal start and end dates (not to exceed a period of 5 years).
   (i) Total amount of CCPI financial assistance being requested for project.

2. Project Natural Resource Objectives and Actions:
   The proposal must include the project objectives and the natural resource concerns that will be addressed. A complete list of NRCS approved natural resource concerns may be found on the CCPI Web site at: http://www.nrcs.usda.gov/programs/ccpi/.
   (a) Identify and provide detail about the natural resource concern(s) to be addressed and how the proposal objectives will address those concerns. Objectives should be specific, measurable, achievable, results-oriented, and include a timeline for completion.
   (b) For each objective, identify the actions to be completed to achieve the objective and to address the identified natural resource concern. Note which actions are to be addressed through this project using NRCS program assistance and which are being addressed through alternate non-Federal funding sources or other resources provided.

3. Detailed Proposal Criteria:
   Potential partners must fully describe their project and demonstrate their history of working with agricultural producers to address resource issues. Information provided in the proposal must include:
   (a) A description of the partner or partners’ history of working with agricultural producers to address the conservation objectives to be achieved.
   (b) A detailed description of the geographic area covered by the proposal, conservation priorities in the area, conservation objectives to be achieved, lands to be treated, and the expected level of participation by producers.
   (1) Include a detailed map showing the project area. Describe the location and size of the proposed project area. Are the size and scope of the project and the proposed practices to address resource concerns reasonable and achievable?
   (2) Outline on the maps the areas which need conservation treatment and identify the number of acres involved. What kinds of conservation practices or enhancements needed to treat priority resource concerns in each area? Are specific areas or conservation practices prioritized in the project area so they will best address specific resource concerns? Which priority areas need to be addressed first?
   (c) A description of how the partner(s) will collaborate to achieve the objectives of the agreement and the roles, responsibilities, and capabilities of the partner(s). Proposals that include resources from other than the submitter of the proposal must include a letter or other documentation from the other partners confirming this commitment of resources. Proposals that demonstrate efforts to collaborate with other partners and producers are likely to provide increased environmental benefits, meet the objectives of CCPI, and receive higher ranking consideration in the evaluation process.
   (d) A description of the project duration which cannot exceed 5 years in length, plan of action, and project implementation schedule that details when the potential partner anticipates finishing the project and submitting a final report.
   (e) A description of the resources (financial and technical assistance) requested from each of the applicable NRCS programs (EQIP, WHP, and CSP) and the non-Federal resources provided by the partner that will be leveraged by the Federal contribution. A primary intent of CCPI is to leverage other non-Federal resources along with NRCS program resources to achieve project objectives. The partner is not required to provide financial or technical resources (match) toward the project; however, proposals that include or offer non-Federal resources will be given higher priority through the evaluation process.
   Partners need to clearly state, by project objective, how they intend to leverage Federal funds along with partner resources. The funding and time contribution by agricultural producers to implement agreed-to conservation practices in program contracts may not be considered any part of a match from the potential partner for purposes of CCPI. One purpose of CCPI is to leverage non-Federal resources from partners above and beyond those contributions made by individual producers.
   (f) A description of the plan for monitoring, evaluating, and reporting on progress made toward achieving the objectives of the agreement. Priority will be given to projects where the partner can provide resources or services or conduct activities to monitor and evaluate effects of conservation practices and activities implemented through the project.
   (g) Identify potential criteria to be used by NRCS to prioritize and rank agricultural producers’ CCPI applications in the project area. Potential partners should collaborate with NRCS in the State where the
project is proposed to develop meaningful criteria that NRCS can use to evaluate and rank producer program applications. For approved projects, this joint effort will help NRCS select producer applications which will best accomplish the projects' intended conservation goals and address priority resource issues identified by the partner in the proposal. Additional information regarding the process NRCS uses to evaluate and rank individual producer applications is found in each of the authorized programs' regulations. Proposals which include specific ranking criteria may be obtained from State NRCS office where the project will be located.

(h) An estimate of the percentage of producers, including nonindustrial private forest landowners, in the project area that may participate in the project along with an estimate of the total number of producers located in the project area. Producer participation is a requirement for delivery of CPPI program benefits. How will the partner encourage participation to guarantee success of the project? Does the project include any tribal producers, beginning farmers or ranchers, socially disadvantaged farmers or ranchers, or limited resource farmers or ranchers? If so, how many are expected to participate? Are there groups of producers who may submit joint applications to address resource issues of common interest and need?

(i) A listing and description of the conservation practices, conservation activity plans, enhancements, and partner activities to be implemented during the project timeframe and the general sequence of implementation of the project. Also address technical assistance efforts that will be made by the partner and those that the partner requests NRCS implement using eligible approved conservation practices, enhancements, and project financial assistance funding. In this section, list all the NRCS conservation practices and enhancements the partner wishes NRCS to offer to producers through the CPPI project. Information about approved NRCS practices is found in the FOTG at: http://www.nrcs.usda.gov/technical/efotg/ and descriptions of practices at: http://www.nrcs.usda.gov/technical/standards/. For each conservation practice, estimate the amount of practice extent (foot, acres, number, etc.) the partner expects producers to implement each fiscal year during the life of the project and the amount of financial assistance requested to support implementation of each practice through producer contracts. Information on eligible enhancements can be found at the CSP Web site at: http://www.nrcs.usda.gov/programs/new_csp/csp.html. Indicate whether the project will address regulatory compliance and any other outcomes that partner expects to complete during the project period. Describe any activities that are innovative or include outcome-based performance measures implemented by the partner.

(j) A description of the amount of CPPI financial assistance funds needed annually for producer contracts that will be used to implement the conservation practices and enhancements identified in previous sections. This section of the proposal must include the total amount of financial assistance funds requested for each fiscal year of the project (for multi-State projects, provide the funds or acres by State as appropriate) to be made available for producer contracts and cost-share agreements.

(k) A description of any requested policy adjustments, by program, with an explanation of why the adjustment is needed in order to achieve the objectives of the project. If a partner is requesting specific program flexibilities that depend on detailed participant or project information, the proposal must provide the needed information. Partners should contact their State Conservationist, or designee, to determine the specific information that may be required.

(l) A description of how the partner will provide for outreach to beginning farmers or ranchers, limited resource farmers or ranchers, socially disadvantaged farmers or ranchers, and Indian tribes.

(m) A description of how the proposal's objectives may provide additional benefits to address renewable energy production, energy conservation, mitigating the effects of climate change, facilitating climate change adaptation, or fostering carbon sequestration, if applicable.

(4) State Conservationist Letter of Review:

Potential partners must include a copy of the letter showing that the written proposal was sent to the approved State Conservationist(s). If a project is multi-State in scope, all State Conservationists in the proposed project area must be sent the proposal for review. A list of NRCS State Conservationists, addresses, and phone numbers is included as an attachment at the end of this notice. The State Conservationist(s) will review the proposal to address:

(a) Potential duplication of efforts with other projects or existing programs.

(b) Adherence to, and consistency with, program regulation including requirements related to land and producer eligibility and use of approved NRCS resource concerns and conservation practices, enhancements, and other program requirements.

(c) Expected benefits for project implementation in their State(s).

(d) Other issues or concerns the State Conservationist is aware of that should be considered by the Chief.

(e) A general recommendation for support or denial of project approval.

State Conservationists must submit letters of review to Gregory K. Johnson, Director, Financial Assistance Programs Division no later than 10 calendar days after the deadline for proposal submission. Prior to submission of the proposal, potential partners are strongly encouraged to consult with the appropriate State Conservationist(s) during proposal development to obtain guidance as to appropriate resource concerns to address conservation practices needed and other details of the project proposal. All CPPI proposals become the property of NRCS for use in the administration of the program, may be filed or disposed of by the agency, and will not be returned to the partner. Once proposals have been submitted to the agency for review and ranking, there will be no further opportunity to change or re-submit the proposal document.

Acknowledgement of Submission and Notifications

Partners whose proposals have been selected will receive a letter of official notification. Upon notification of selection, the partner should contact the State Conservationist listed in the letter to develop the required partnership agreement and other project implementation requirements. Potential partners should note that, depending upon available funding and agency priorities, NRCS may offer a reduced amount of program financial assistance from what was requested in the proposal. Applicants of CPPI proposals not selected will be notified by official letter.

Withdrawal of Proposals

Partner proposals may be withdrawn by written notice to the Director, Financial Assistance Programs Division at any time prior to selection.

Ranking Considerations

The Chief or designee will evaluate proposals using a national competitive
process. A higher priority may be given to proposals that:
(a) Have a high percentage of producers actively farming or managing working agricultural or nonindustrial private forest lands included in the proposed project area;
(b) Significantly leverage non-Federal financial and technical resources and coordinate with other local, State, or Federal efforts;
(c) Deliver high percentages of applied conservation practices to address water quality, water conservation, or State, regional, or national conservation initiatives;
(d) Provide innovation in approved conservation practices, conservation methods, and delivery, including outcome-based performance measures and methods;
(e) Complete the application of the conservation practices and activities on all of the covered program contracts or cost-share agreements in 5 years or less;
(f) Assist the participants in meeting local, State, and Federal regulatory requirements;
(g) Provide for monitoring and evaluation of conservation practices, enhancements, and activities;
(h) Provide for matching financial funds or technical assistance to assist participants with the implementation of their EQIP and CSP contracts or WHIP cost-share agreements;
(i) Further the Nation’s efforts with renewable energy production, energy conservation, mitigating the effects of climate change, facilitating climate change adaptation, or fostering carbon sequestration;
(j) Provide for outreach to, and participation of, beginning farmers and ranchers, socially disadvantaged farmers or ranchers, limited resource farmers or ranchers, and Indian tribes within the proposed project area; and
(k) Identify other factors and criteria which best achieve the purposes of CCPI.

Partnership Agreements
Upon selection and approval, NRCS will enter into a partnership agreement with the partner. The partnership agreement will not obligate funds, but will address:
(a) The role of the partner;
(b) The role of NRCS;
(c) The responsibilities of the partner as it relates to the monitoring and evaluation;
(d) The frequency and duration of monitoring and evaluation to be completed by the partner;
(e) The format and frequency of reports (semi-annual, annual, and final) required as a condition of the partnership agreement;
(f) Budget which includes other funding sources (if applicable) for financial and technical assistance;
(g) The specified project schedule and timeframe; and
(h) Other requirements deemed necessary by NRCS to further the purposes of the CCPI project.

Once a proposal is selected, the partnership agreement is signed, and subject to the availability of funding, NRCS begins entering into EQIP and CSP contracts or WHIP cost-share agreements directly with eligible producers including nonindustrial private forest landowners who are participating in the project and located in the approved geographic area. Producers applicants must meet all program eligibility requirements. The program used will depend upon the type of conservation practices to be applied. Participants may have multiple contracts through CCPI if more than one covered program is needed to accomplish the project objectives.

Waiver Authority
To assist in the implementation of CCPI projects through EQIP, CSP, or WHIP, the Chief may waive the applicability of the Adjusted Gross Income Limitation, on a case-by-case basis in accordance with 7 CFR 1400.500(d)(2). Such waiver requests must be submitted in writing from the program applicant, addressed to the Chief, and submitted through the local designated conservationist.

Signed the 5th day of April, 2010, in Washington, DC.

Dave White,
Vice President, Commodity Credit Corporation and Chief, Natural Resources Conservation Service.

DEPARTMENT OF AGRICULTURE

Forest Service

Shasta County Resource Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Shasta County Resource Advisory Committee (RAC) will meet at the USDA Service Center in Redding, California, on April 28, 2010, from 8:30 a.m. to 12 noon. The purpose of this meeting is to discuss project updates and proposals, information on monitoring efforts and a timeline for the upcoming year.

DATES: Wednesday, April 28 at 8:30 a.m.

ADDRESSES: The meeting will be held at the USDA Service Center, 3644 Avtech Parkway, Redding, California 96002.

FOR FURTHER INFORMATION CONTACT: Resource Advisory Committee Coordinator Rita Vollmer at (530) 226–2595 or rvollmer@fs.fed.us.

SUPPLEMENTARY INFORMATION: The meeting is open to the public. Public input sessions will be provided and individuals will have the opportunity to address the Shasta County Resource Advisory Committee.

J. Sharon Heywood,
Forest Supervisor, Shasta-Trinity National Forest.

DEPARTMENT OF COMMERCE

Environmental Technologies Trade Advisory Committee (ETTAC)

AGENCY: International Trade Administration, U.S. Department of Commerce.

ACTION: Notice of open meeting.

SUMMARY: The Environmental Technologies Trade Advisory Committee (ETTAC) will hold its quarterly meeting to discuss environmental technologies trade liberalization, industry competitiveness issues, and general Committee administrative items.

FOR FURTHER INFORMATION CONTACT: Ellen Bohon, Office of Energy and Environmental Technologies Industries (OEEI), International Trade Administration, U.S. Department of Commerce at (202) 482–0359. This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to OEEI at (202) 482–5225.

SUPPLEMENTARY INFORMATION: The meeting will take place from 9 a.m. to 3:30 p.m. This meeting is open to the public and time will be permitted for public comment from 3–3:30 p.m. Written comments concerning ETTAC affairs are welcome anytime before or after the meeting. Minutes will be available within 30 days of this meeting.

The ETTAC is mandated by Public Law 103–392. It was created to advise the U.S. government on environmental trade policies and programs, and to help it to focus its resources on increasing the exports of the U.S. environmental industry. ETTAC operates as an advisory committee to the Secretary of Commerce and the Trade Promotion Coordinating Committee (TPCC). ETTAC was originally chartered in May of 1994. It was most recently re-chartered until September 2010.

Dated: April 7, 2010.

Edward A. O’Malley,
Director, Office of Energy and Environmental Industries.
