

POLICY JUSTIFICATION**Canada – T55-GA-714A Engines**

The Government of Canada has requested a possible sale of 36 T55-GA-714A engines, spare and repairs parts, support and test equipment, personnel training and training equipment, publications and technical data, engine qualification review, U.S. Government and contractor engineering, technical, and logistics support services, and other related elements of logistics support. The estimated cost is \$71 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the military capabilities of Canada and the Canadian military's interoperability with U.S. forces. Canadian deployments in support of peacekeeping and humanitarian operations have enhanced global political and economic stability and have served U.S. national security interests.

This proposed sale will allow Canada to strengthen its homeland defense, deter regional threats, and improve humanitarian and disaster mobilization and response. The proposed sale would improve Canada's ability to meet current and future requirements for troop movement, medical evacuations, aircraft recovery, parachute drops, search and rescue, disaster relief, fire-fighting, and heavy construction. Canada will have no difficulty absorbing these helicopter engines into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractor will be Honeywell International in Phoenix, Arizona. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Canada.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
