III. Summary of Public Comments Received and Agency Response to Comments

During the public comment period provided, EPA received no comments in response to the April 7, 2010 Federal Register notice (75 FR 17735; FRL–8819–1) announcing the Agency’s receipt of the requests for voluntary cancellations of products listed in Unit II., Table 1.

IV. Cancellation Order

Pursuant to FIFRA section 6(f), EPA hereby approves the requested cancellations of methidathion registrations identified in Unit II., Table 1. Accordingly, the Agency hereby orders that the product registrations identified in Unit II., Table 1 are canceled. The effective date of the cancellations that are the subject of this notice is December 30, 2012. Any distribution, sale, or use of existing stocks of the products identified in Unit II., Table 1, in a manner inconsistent with any of the provisions for disposition of existing stocks set forth in Unit VI. of this notice will be a violation of FIFRA.

V. What is the Agency’s Authority for Taking this Action?

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may, at any time, request that any of its pesticide registrations be canceled or amended to terminate one or more uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of the request in the Federal Register. Thereafter, following the public comment period, the EPA Administrator may approve such a request. The notice of receipt for this action was published for comment on April 7, 2010. The comment period closed on May 7, 2010.

VI. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products which are currently in the United States and were packaged, labeled, and released for shipment prior to the effective date of the action. The existing stock provisions for the products subject to this order are as follows:

After December 31, 2012, registrants are prohibited from selling or distributing existing stocks of products containing methidathion labeled for all uses.

After December 31, 2014, persons other than registrants are prohibited from selling or distributing existing stocks of products containing methidathion labeled for all uses.

Supplementary Information: I. Information About IRIS

EPA’s IRIS is a human health assessment program that evaluates quantitative and qualitative risk information on effects that may result from exposure to chemical substances found in the environment. Through the IRIS Program, EPA provides the highest quality science-based human health assessments to support the Agency’s regulatory activities. The IRIS database contains information for more than 540 chemical substances that can be used to support the first two steps (hazard identification and dose-response evaluation) of the risk assessment process. When supported by available data, IRIS provides oral reference doses (RfDs) and inhalation reference concentrations (RfC) for chronic noncancer health effects and cancer assessments. Combined with specific exposure information, government and private entities use IRIS to help characterize public health risks of chemical substances in a site-specific...
