Fisheries of the Northeastern United States; Atlantic Mackerel, Squid, and Butterfish Fisheries; Scoping Process

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of intent to prepare an environmental impact statement (EIS); notice of initiation of scoping process; notice of scoping meetings; request for comments.

SUMMARY: The Mid-Atlantic Fishery Management Council (Council) announces its intent to prepare an amendment (Amendment 14) to the Fishery Management Plan (FMP) for Atlantic Mackerel, Squid, and Butterfish (MSB) and to prepare an EIS to analyze the impacts of any proposed management measures. This amendment may address one or more of the following issues: The implementation of catch share systems for the squid fisheries; the need for additional fishery monitoring to determine the significance of river herring and shad incidental catch in the MSB fisheries; and the effectiveness and impacts of management measures to minimize bycatch and/or incidental catch of river herrings and shad. The Council is initiating a public process to determine the scope of alternatives to be addressed in the amendment and EIS. NMFS and the Council are alerting the interested public of the commencement of the scoping process and providing for public participation in compliance with environmental documentation requirements.

DATES: Public comments on Amendment 14 scoping must be received no later than 5 p.m., eastern standard time, on July 9, 2010.

ADDRESSES: Written comments on Amendment 14 may be sent by any of the following methods:

• E-mail to the following address: info@mafmc.org. Include “Scoping Comments on MSB 14” in the subject line;

• Mail to Dan Furlong, Executive Director, Mid-Atlantic Fishery Management Council, 800 North State Street, Suite 201, Dover, DE 19901. Mark the outside of the envelope “Scoping Comments on MSB 14,” or

• Fax to Dan Furlong, (302) 674–5399. Include “Scoping Comments on MSB 14” in the fax.

Requests for copies of the scoping document and other information should be directed to Dan Furlong, Executive Director, Mid-Atlantic Fishery Management Council, 800 North State Street, Suite 201, Dover, DE 19901, toll-free telephone: (877) 446–2362. The scoping document is also accessible via the Internet at http://www.mafmc.org/fmp/msb.htm.

FOR FURTHER INFORMATION CONTACT: Dan Furlong, Executive Director, Mid-Atlantic Fishery Management Council. Toll-free telephone: (877) 446–2362.

SUPPLEMENTARY INFORMATION:

Background

The Council initiated Amendment 14 to the MSB FMP for two reasons: (1) There are concerns among some stakeholders that there may be too much harvesting capacity in the squid (both Loligo and Illex) fisheries and that uncontrolled activation of latent capacity could cause negative economic effects for participants. Implementation of catch shares may address some of these concerns; and (2) There is concern by some stakeholders that more should be done to monitor and/or minimize the incidental catch of river herrings (blueback and alewife) and shads (American and hickory) in the MSB fisheries, especially given the currently low levels of monitoring in the MSB fisheries and the likely poor stock status of shads and river herrings.

Related to the first concern, this amendment may address one or more of the following issues: The implementation of catch share systems for the squid fisheries to further refine the existing management process, the biological and socio-economic outcomes of a catch share system and how such outcomes depend on specific program design features, and the possible need for changes to existing information collection processes if a catch share system is implemented. Related to the second concern, the amendment may address: The need for additional fishery monitoring to determine the significance of river herring and shad incidental catch in the MSB fisheries, and the effectiveness and impacts of possible management measures to minimize bycatch and/or incidental catch of river herrings and shad in the MSB fisheries.

The Council will gather information during the scoping period. This is the first and best opportunity for members of the public to raise concerns related to the scope of issues that will be considered in Amendment 14. The Council needs your input both to identify management issues and develop effective alternatives. Your comments early in the amendment development process will help us address issues of public concern in a thorough and appropriate manner. Comments can be made in writing or made verbally during the scoping hearings. The Council announced the scoping meeting dates in a separate Federal Register notice published on May 27, 2010 (75 FR 29725). If the Council decides to move forward with Amendment 14, the Council will develop a range of management alternatives to be considered and prepare an EIS to analyze the impacts of the management alternatives being considered as required by the National Environmental Policy Act. Impacts may be direct, indirect, or cumulative. A draft EIS will be distributed for public review. During a 45–day public:
comment period, which will include public hearings, the public may
comment on the draft EIS. Following a
review of the comments, the Council
will then choose final preferred
management measures for submission
with the final EIS to the Secretary of
Commerce for publishing of a proposed
and then final rule, both of which have
additional comment periods.

SUPPLEMENTARY INFORMATION: The Gulf
of Mexico, South Atlantic, and
Caribbean Fishery Management
Councils, in conjunction with NOAA
Fisheries and the Atlantic and Gulf
States Marine Fisheries Commissions
have implemented the Southeast Data,
Assessment and Review (SEDAR)
process, a multi-step method for
determining the status of fish stocks in the
Southeast Region. SEDAR is a three-
step process including: (1) Data
Workshop, (2) Assessment Process
utilizing webinars and (3) Review
Workshop. The product of the Data
Workshop is a data report which
compiles and evaluates potential
datasets and recommends which
datasets are appropriate for assessment
analyses. The product of the Assessment
Process is a stock assessment report
which describes the fisheries, evaluates
the status of the stock, estimates
biological benchmarks, projects future
population conditions, and recommends
research and monitoring needs. The
assessment is independently peer
reviewed at the Review Workshop. The
product of the Review Workshop is a
Summary documenting Panel opinions
regarding the strengths and weaknesses
of the stock assessment and input data.

Participants for SEDAR Workshops are
appointed by the Gulf of Mexico, South
Atlantic, and Caribbean Fishery
Management Councils and NOAA
Fisheries Southeast Regional Office and
Southeast Fisheries Science Center.
Participants include data collectors and
database managers; stock assessment
scientists, biologists, and researchers;
constituency representatives including
fishermen, environmentalists, and
NGO’s; International experts; and staff
of Councils, Commissions, and state and
federal agencies.

SEDAR 22 Assessment webinars II
through IV:

Using datasets recommended from the
Data Workshop, participants will
employ assessment models to evaluate
stock status, estimate population
benchmarks and management criteria,
and project future conditions.
Participants will recommend the most
appropriate methods and configurations
for determining stock status and
estimating population parameters.

Meeting Schedule:
Webinar II: July 1, 2010, from 1 p.m.
