Covered Area

The area encompassed under the HCP and ITP application is a 0.33-acre parcel of property that contains 0.33 acres of suitable, currently undeveloped Florida Scrub-jay habitat. The Project area is located in Brevard County, Florida. The Florida Scrub-jay is geographically isolated from other species of scrub-jays found in Mexico and the western United States. The Florida Scrub-jay is found exclusively in peninsular Florida and is restricted to xeric uplands (predominately in oak-dominated scrub).

Next Steps

We will evaluate the ITP renewal application, including the existing HCP and any comments we receive, to determine whether the application meets the requirements of section 10(a)(1)(B) of the Act and our implementing regulations at 50 CFR 17.32(b). We will also evaluate whether reissuance of the section 10(a)(1)(B) ITP complies with section 7 of the Endangered Species Act by conducting an intra-Service section 7 consultation. We will use the results of this consultation, in combination with the above findings, in our final analysis to determine whether or not to issue the ITP. If we determine that the requirements are met, we will issue the ITP for the incidental take of the Florida Scrub-jay.

Authority

We provide this notice under section 10 of the Act (16 U.S.C. 1531 et seq.) and NEPA regulations (40 CFR 1506.6).

The conference was held in Washington, DC, on April 21, 2010, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determinations in these investigations to the Secretary of Commerce on May 17, 2010. The views of the Commission are contained in USITC Publication 4153 (June 2010), entitled Certain Aluminum Extrusion from China: Investigation.
