specifically to address their particular activity (approved under OMB Control No. 1018–0093). From information in the application, we create a master file or annual program file that contains all the information necessary for us to make the required legal acquisition and nondetriment findings. The applicant can then submit FWS Form 3–200–74 to request authorization to carry out multiple, identical activities over the next 6 months. On FWS Form 3–200–74, we request information only about the number of additional documents the applicant requires to carry out activities approved under the previous application process. By referencing information in the master file or annual program file, we can quickly issue partially completed CITES documents (with certain specific areas left blank for completion by the applicant).

United States facilities, such as farms and aquaculture operations, produce several native U.S. taxa listed in CITES Appendices II and III in closed and semi-closed production systems. By registering a production facility and setting up a master file, we can expedite issuing of export permits for that facility. The registration is valid for 1 year. We use FWS Form 3–200–75 (Registration of a Production Facility for Export of Certain Native Species (CITES)) to collect information on annual production levels, method of producing specimens, source of the parental and founder stock, and method of transport for international trade. This information allows us to issue documents on a very short turnaround time, and we do not need to collect additional information prior to the issuance of export documents.

Comments: On February 23, 2010, we published in the Federal Register (75 FR 8102) a notice of our intent to request that OMB renew this ICR. In that notice, we solicited comments for 60 days, ending on April 26, 2010. We did not receive any comments.

We again invite comments concerning this information collection on:

• Whether or not the collection of information is necessary, including whether or not the information will have practical utility;

• The accuracy of our estimate of the burden for this collection of information;

• Ways to enhance the quality, utility, and clarity of the information to be collected; and

• Ways to minimize the burden of the collection of information on respondents.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask OMB in your comment to withhold your personal identifying information from public review, we cannot guarantee that it will be done.

Dated: June 11, 2010.

Hope Grey,
Information Collection Clearance Officer, Fish and Wildlife Service.

BILLING CODE 4310–55–S

DEPARTMENT OF THE INTERIOR
Fish and Wildlife Service

Proposed Information Collection; OMB Control Number 1018–0023; Migratory Bird Surveys

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice; request for comments.

SUMMARY: We (Fish and Wildlife Service) will ask the Office of Management and Budget (OMB) to approve the information collection (IC) described below. As required by the Paperwork Reduction Act of 1995 and as part of our continuing efforts to reduce paperwork and respondent burden, we invite the general public and other Federal agencies to take this opportunity to comment on this IC. This IC is scheduled to expire on February 28, 2011. We may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: To ensure that we are able to consider your comments on this IC, we must receive them by August 17, 2010.

ADDRESSES: Send your comments on the IC to Hope Grey, Information Collection Clearance Officer, Fish and Wildlife Service, MS 222–ARLSQ, 4401 North Fairfax Drive, Arlington, VA 22203 (mail); or hope.grey@fws.gov (e-mail).

FOR FURTHER INFORMATION CONTACT: To request additional information about this IC, contact Hope Grey by mail or e-mail (see ADDRESSES) or by telephone at (703) 358–2482.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Migratory Bird Treaty Act (16 U.S.C. 703–711) and the Fish and Wildlife Act of 1956 (16 U.S.C. 742d) designate the Department of the Interior as the key agency responsible for (1) the wise management of migratory bird populations frequenting the United States, and (2) setting hunting regulations that allow appropriate harvests that are within the guidelines that will allow for those populations’ well-being. These responsibilities dictate that we gather accurate data on various characteristics of migratory bird harvest. Based on information from harvest surveys, we can adjust hunting regulations as needed to optimize harvests at levels that provide a maximum of hunting recreation while keeping populations at desired levels.

Under the Migratory Bird Harvest Program, State licensing authorities collect the name and address information needed to provide a sample frame of all licensed migratory bird hunters. Since Federal regulations require that the States collect this information, we are including the associated burden in our approval request to OMB.

The Migratory Bird Hunter Survey is based on the Migratory Bird Harvest Information Program, under which each State annually provides a list of all migratory bird hunters in the State. We randomly select migratory bird hunters; send them either a waterfowl questionnaire, a dove and band-tailed pigeon questionnaire, a woodcock questionnaire, or a snipe, rail, gallinule and coot questionnaire; and ask them to report their harvest of those species. The resulting estimates of harvest per hunter are combined with the complete list of migratory bird hunters to provide estimates of the total harvest of those species.

The Parts Collection Survey estimates the species, sex, and age composition of the harvest, and the geographic and temporal distribution of the harvest. Randomly selected successful hunters who responded to the Migratory Bird Hunter Survey the previous year are asked to complete and return a postcard if they are willing to participate in the Parts Collection Survey. We provide postage-paid envelopes to respondents before the hunting season and ask them to send in a wing or the tail feathers from each duck or goose they harvest, or a wing from each mourning dove, woodcock, band-tailed pigeon, snipe, rail, or gallinule they harvest. We use the wings and tail feathers to identify the species, sex, and age of the harvested sample. We also ask
respondents to report on the envelope the date and location of harvest for each bird. We combine the results of this survey with the harvest estimates obtained from the Migratory Bird Hunter Survey to provide species-specific national harvest estimates.

The combined results of these surveys enable us to evaluate the effects of season length, season dates, and bag limits on the harvest of each species, and thus help us determine appropriate hunting regulations.

The Sandhill Crane Harvest Survey is an annual questionnaire survey of people who obtained a sandhill crane hunting permit. At the end of the hunting season, we randomly select a sample of permit holders and ask them to report the date, location, and number of birds harvested for each of their sandhill crane hunts. Their responses provide estimates of the temporal and geographic distribution of the harvest as well as the average harvest per hunter, which, combined with the total number of permits issued, enables us to estimate the total harvest of sandhill cranes. Based on information from this survey, we adjust hunting regulations as needed.

III. Request for Comments

We invite comments concerning this IC on:

- Whether or not the collection of information is necessary, including whether or not the information will have practical utility;
- The accuracy of our estimate of the burden for this collection of information;
- Ways to enhance the quality, utility, and clarity of the information to be collected; and
- Ways to minimize the burden of the collection of information on respondents.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this IC. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: June 11, 2010.

Hope Grey,
Information Collection Clearance Officer,
Fish and Wildlife Service.
