signature form, MSRB, in response to this comment, amended the original proposed rule change to clarify that such records are only required to be kept for those documents that are unable to be obtained. MSRB also notes that all documents would be required to be final, operative versions of such documents. While this requirement does not necessarily require that the document be signed, MSRB notes that signatures would provide a clear indication that the document reflects a final version.

Other Comments. ICI recommended that the proposed rule change include a "catch-all" category to require dealers to report information "about new products that fall outside of the scope of the ARS and VRDO disclosure requirements." MSRB agrees that new products may benefit from the transparency offered for ARS and VRDO by the SHORT System, yet technically fall outside of the definitions of such products, and plans to review in the future whether changes to the SHORT System and associated rules could accommodate future products without subsequent system and rule modifications.

ICI also suggested that VRDO "credit enhancement" data and documentation be required to be reported. MSRB believes that such information should not be limited to VRDOs and notes a separate MSRB initiative to display on EMMA information offered by credit ratings agencies would provide additional access to credit enhancement features associated with municipal securities on a market-wide basis.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or
