SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for an extension of a currently approved information collection.

The Cooperative Game Fish Tagging Program (CGFTP) was initiated in 1954 by Woods Hole Oceanographic Institution (WHOI). In 1973 the CGFTP became a cooperative effort between WHOI and the NOAA National Marine Fisheries (NMFS) as part of a comprehensive research program resulting from passage of the Migratory Game Fish Study Act of 1959 (Pub. L. 86–359) and other legislative acts under which the NMFS operates, including 16 U.S.C. Section 760e. In 1980 sole control of the CGFTP was handed over to the NMFS. The CGFTP was later renamed the Cooperative Tagging Center (CTC). The CTC attempts to determine the migratory patterns and other biological information of billfish, tunas, and swordfish by having fishermen tag and release their catch, so that fish can be subsequently recaptured.

The primary objectives of a tagging program are to obtain scientific information on fish growth and movements necessary to assist in stock assessment and management. This is accomplished by the random recapture of tagged fish by fishermen and the subsequent voluntary submission of the appropriate data.

II. Method of Collection

The recapture cards will be sent out to the constituents who will fill in the cards with the pertinent information when and if they recapture a tagged fish and mail the cards back to NMFS offices.
