II. Background

Eligible Public Assistance applicants conducting active research programs, and that have incurred damages to their facility as a result of a declared major disaster, may be eligible for Public Assistance grant funding for replacement or repair of facilities and the equipment and/or furnishings contained within. The cost of performing research itself is not eligible for Public Assistance grant funding. Because research is not identified as an eligible PNP service under 44 CFR 206.221(e), an active research program must support an eligible function such as an educational or medical function in order for the facilities, equipment and/or furnishings to be eligible. The draft updated policy proposes to include insurance considerations for the applicant that may affect Public Assistance funding.

FEMA seeks comment on the proposed policy, which is available online at http://www.regulations.gov in docket ID FEMA–2010–0048. Based on the comments received, FEMA may make appropriate revisions to the proposed policy. Although FEMA will consider any comments received in the drafting of the final policy, FEMA will not provide a response to comments document. When or if FEMA issues a final policy, FEMA will publish a notice of availability in the Federal Register and make the final policy available at http://www.regulations.gov.

II. Background

Sections 403 and 502 of the Stafford Act authorize Federal agencies to provide assistance, including emergency medical care, essential to meeting immediate threats to life and property resulting from a major disaster or emergency, respectively. When the emergency medical delivery system within the designated disaster area is destroyed or severely compromised by a disaster event, assistance for emergency medical care and medical evacuations of disaster survivors from eligible public and private nonprofit hospitals and custodial care facilities is available to eligible Public Assistance applicants through Public Assistance grants, Direct Federal Assistance (DFA), or a combination of both. When the State and local governments lack the capability to perform or contract for eligible emergency medical care or
medical evacuation work, they may request Direct Federal Assistance from FEMA. Usually, FEMA will task the appropriate Federal agencies via mission assignments to perform the requested emergency work. FEMA may task the Department of Health and Human Services to provide emergency medical assistance when requested by the State.

The draft updated policy proposes that labor costs for personnel activated and deployed to support the performance of eligible emergency medical care and medical evacuations of patients be eligible for reimbursement. FEMA seeks comment on the proposed policy, which is available online at http://www.regulations.gov in docket ID FEMA–2010–0049. Recovery Policy, RP9525.7, Labor Costs—Emergency Work

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice of availability; request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA) is accepting comments on RP9525.7, Labor Costs—Emergency Work. This is an existing policy that is scheduled for review to ensure that Recovery Directorate policies are up to date, incorporate lessons learned and are consistent with current laws and regulations. The purpose of this policy is to provide guidance on eligible labor costs for an applicant’s permanent, temporary, and contract employees who perform emergency work (Categories A and B).

II. Background

On October 14, 1993, FEMA published a regulation that made the force account labor straight-time salary for work under Sections 403 and 407 ineligible under the Public Assistance Program. The 1993 regulation did not include emergency work accomplished under Section 502 (Federal Emergency Assistance) of The Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 et seq. The ineligibility of straight-time salaries for emergency work under Section 502 is included as a provision of the FEMA–State Agreement.

Labor (straight-time, overtime, and fringe benefits to the extent the benefits were being paid before the disaster) performed under Section 406 (permanent work) of the Stafford Act remains eligible for reimbursement.

In the draft updated policy, FEMA proposes that labor costs for firefighters and other responders when activated and deployed to perform eligible emergency work be eligible for reimbursement. FEMA also proposes to provide assistance for overtime for firefighters up to 24 hours per day for the first two weeks after a disaster.

FEMA seeks comment on the proposed policy, which is available online at http://www.regulations.gov in docket ID FEMA–2010–0050. Based on the comments received, FEMA may make appropriate revisions to the proposed policy. Although FEMA will consider any comments received in the drafting of the final policy, FEMA will not provide a response to comments document. When or if FEMA issues a final policy, FEMA will publish a notice of availability in the Federal Register and make the final policy available at http://www.regulations.gov.
