DEPARTMENT OF THE INTERIOR
Fish and Wildlife Service
50 CFR Part 20
RIN 1018–AX06
Migratory Bird Hunting; Migratory Bird Hunting Regulations on Certain Federal Indian Reservations and Ceded Lands for the 2010–11 Early Season
AGENCY: Fish and Wildlife Service, Interior.
ACTION: Final rule.
SUMMARY: This rule prescribes special early-season migratory bird hunting regulations for certain Tribes on Federal Indian reservations, off-reservation trust lands, and ceded lands. This rule responds to Tribal requests for U.S. Fish and Wildlife Service (hereinafter Service or we) recognition of Tribal authority to regulate hunting under established guidelines. This rule allows the establishment of season bag limits and, thus, harvest, at levels compatible with populations and habitat conditions.
DATES: This rule takes effect on September 1, 2010.
SUPPLEMENTARY INFORMATION: The Migratory Bird Treaty Act (MBTA) of July 3, 1918 (40 Stat. 755; 16 U.S.C. 703 et seq.), authorizes and directs the Secretary of the Department of the Interior, having due regard for the zones of temperature and for the distribution, abundance, economic value, breeding habits, and times and lines of flight of migratory game birds, to determine when, to what extent, and by what means such birds or any part, nest, or egg thereof may be taken, hunted, captured, killed, possessed, sold, purchased, shipped, carried, exported, or transported.
In the August 6, 2010, Federal Register (75 FR 47682), we proposed special migratory bird hunting regulations for the 2010–11 hunting season for certain Indian Tribes, under the guidelines described in the June 4, 1985, Federal Register (50 FR 23467). The guidelines respond to Tribal requests for Service recognition of their reserved hunting rights, and for some Tribes, recognition of their authority to regulate hunting by both Tribal members and nonmembers on their reservations. The guidelines include possibilities for:
(1) On-reservation hunting by both Tribal members and nonmembers, with hunting by nontribal members on some reservations to take place within Federal frameworks but on dates different from those selected by the surrounding State(s);
(2) On-reservation hunting by Tribal members only, outside of usual Federal frameworks for season dates and length, and for daily bag and possession limits; and
(3) Off-reservation hunting by Tribal members on ceded lands, outside of usual framework dates and season length, with some added flexibility in daily bag and possession limits.
In all cases, the regulations established under the guidelines must be consistent with the March 10–September 1 closed season mandated by the 1916 Migratory Bird Treaty with Canada. We have successfully used the guidelines since the 1985–86 hunting season. We finalized the guidelines beginning with the 1988–89 hunting season (August 18, 1988, Federal Register [53 FR 31612]).
In the May 13, 2010, Federal Register (75 FR 27144), we requested that Tribes desiring special hunting regulations in the 2010–11 hunting season submit a proposal including details on:
(a) Harvest anticipated under the requested regulations;
(b) Methods that would be employed to measure or monitor harvest (such as bag checks, mail questionnaires, etc.);
(c) Steps that would be taken to limit level of harvest, where it could be shown that failure to limit such harvest would adversely impact the migratory bird resource; and
(d) Tribal capabilities to establish and enforce migratory bird hunting regulations.
No action is required if a Tribe wishes to observe the hunting regulations established by the State(s) in which an Indian reservation is located. On August 6, 2010, we published a proposed rule (75 FR 47682) that included special migratory bird hunting regulations for 30 Indian Tribes, based on the input we received in response to the May 13, 2010, proposed rule. All the regulations contained in this final rule were either submitted by the Tribes or approved by the Tribes and follow our proposals in the August 6 proposed rule.
Although the May 13 proposed rule included generalized regulations for both early- and late-season hunting, this rulemaking addresses only the early-season proposals. Therefore, it includes information for only 24 Tribes. The letter designations for the paragraphs pertaining to each Tribe in this rule are discontinuous because they follow the letter designations for the 30 Tribes discussed in the August 6 proposed rule, which set forth paragraphs (a) through (dd). Late-season hunting will be addressed in late September. As a general rule, early seasons begin during September each year and have a primary emphasis on such species as mourning and white-winged doves. Late seasons begin about October 1 or later each year and have a primary emphasis on waterfowl.
Population Status and Harvest
The following paragraphs provide preliminary information on the status of waterfowl and information on the status and harvest of migratory shore and upland game birds excerpted from various reports. For more detailed information on methodologies and results, you may obtain complete copies of the various reports at the address indicated under ADDRESSES or from our Web site at http://www.fws.gov/migratorybirds/NewsPublicationsReports.html.
Waterfowl Breeding and Habitat Survey
Federal, provincial, and State agencies conduct surveys each spring to estimate the size of breeding populations and to evaluate the conditions of the habitats. These surveys are conducted using fixed-wing aircraft, helicopters, and ground crews and encompass principal breeding areas of North America, covering an area over 2.0 million square miles. The traditional survey area comprises Alaska, Canada, and the northcentral United States, and includes approximately 1.3 million square miles. The eastern survey area includes parts of Ontario, Quebec, Labrador, Newfoundland, Nova Scotia, Prince Edward Island, New Brunswick, New York, and Maine, an area of approximately 0.7 million square miles.
Overall, habitat conditions during the 2010 Waterfowl Breeding Population and Habitat Survey were characterized by average to below-average moisture and a mild winter and early spring across the entire traditional (including the northern locations) and eastern survey areas. The total pond estimate (Prairie Canada and U.S. combined) was
Traditional Survey Area (U.S. and Canadian Prairies and Parklands)

Conditions across the Canadian prairies were similar to 2009. Portions of southern Alberta, Saskatchewan, and Manitoba improved, but a large area along the Alberta and Saskatchewan border remained dry, and moisture levels in portions of Manitoba declined from last year. The 2010 estimate of ponds in Prairie Canada was 3.7 ± 0.2 million. This was similar to last year’s estimate (3.6 ± 0.1 million) and to the 1955–2009 average (3.4 ± 0.03 million). Residual water remains in the Parklands and these were classified as fair to good. Most of the Prairie-Parkland region of Canada received abundant to historically high levels of precipitation during and after the survey, which, while possibly flooding some nests, will produce excellent brood-rearing habitat for success for many nesting species and lessen the impact of the normal summer drawdown, leading to beneficial wetland conditions next spring.

Wetland numbers and conditions remained fair to good in the eastern U.S. prairies, but habitat conditions declined through the western Dakotas and Montana. The 2010 pond estimate for the north-central United States was 2.9 ± 0.1 million, essentially unchanged from last year’s estimate (2.9 ± 0.1 million) and 87 percent above the long-term average (1.6 ± 0.02 million). Fall and winter precipitation in the eastern Dakotas generally improved good habitat conditions already present. However, wetlands in the western Dakotas and Montana were not recharged, resulting in a deterioration of conditions from 2009 at the time the survey was conducted.

Bush (Alaska, Northern Manitoba, Northern Saskatchewan, Northwest Territories, Yukon Territory, Western Ontario)

In the bush regions of the traditional survey area, spring breakup was early. Unlike in 2009, the majority of habitats were ice-free for arriving waterfowl. Habitat of most of the bush region, with the exception of Alaska and the Northwest Territories where conditions were normal, was classified as fair due to below-average moisture, but the early spring should benefit waterfowl across the entire area.

Eastern Survey Area

The boreal forest and Canadian Maritimes of the eastern survey area experienced an early spring as well. Much of southern Quebec and Ontario were classified as poor to fair due to dry conditions, with the exception of an area of adequate moisture in western-central Ontario. More northern boreal forest locations benefited from near-normal precipitation and early ice-free conditions. Although winter precipitation from southwestern Ontario along the St. Lawrence River Valley and into Maine was below average, waterfowl habitat was classified as good to excellent, as in 2009. The James and Hudson Bay Lowlands of Ontario (strata 57–59) were not surveyed in 2010, but reports indicated an early spring in these locations as well.

Breeding Population Status

In the traditional survey area, which includes strata 1–18, 20–50, and 75–77, the total duck population estimate was 40.9 ± 0.7 [SE] million birds. This estimate was similar to last year’s estimate of 42.0 ± 0.7 million birds and was 21 percent above the long-term average (1955–2009). Estimated mallard (Anas platyrhynchos) abundance was 8.4 ± 0.3 million birds, which was similar to the 2009 estimate of 8.5 ± 0.2 million birds and 12 percent above the long-term average. Estimated abundance of gadwall (A. strepera; 3.0 ± 0.2 million) was similar to the 2009 estimate and 67 percent above the long-term average. Estimated abundance of American wigeon (A. americana; 2.4 ± 0.1 million) was similar to 2009 and the long-term average. The estimated abundance of green-winged teal (A. crecca) was 3.5 ± 0.2 million, which was similar to the 2009 estimate and 78 percent above their long-term average of 1.9 ± 0.02 million. The estimate of blue-winged teal abundance (A. discors) was 6.3 ± 0.4 million, which was 14 percent below the 2009 estimate and 36 percent above their long-term average of 4.7 ± 0.04 million. The estimate for northern pintails (A. acuta; 3.5 ± 0.2 million) was similar to the 2009 estimate and 13 percent below the long-term average of 4.0 ± 0.04 million. Estimates of northern shovelers (A. clypeata; 4.1 ± 0.2 million) and redheads (Aythya americana; 1.1 ± 0.1 million) were similar to their 2009 estimates and were 76 percent and 63 percent above their long-term averages of 2.3 ± 0.02 million and 0.7 ± 0.01 million, respectively. The canvasback estimate (A. valisineria; 0.6 ± 0.05 million) was similar to the 2009 estimate and to the long-term average. The scaup estimate (A. affinis and A. marila combined; 4.2 ± 0.2 million) was similar to the 2009 estimate and 16 percent below the long-term average of 5.1 ± 0.05 million.

The eastern survey area was restratified in 2005 and is now composed of strata 51–72. Estimates of mallards, scaup, scoters (black [Melanitta nigra], white-winged [M. fusca], and surf [M. perspicillata]), green-winged teal, American wigeon, bufflehead (Bucephala albeola), ring-necked duck (Aythya collaris), and godeneyes (common [B. clangula] and Barrow’s [B. islandica]) all were similar to their 2009 estimates and long-term averages. The mergangers (red-breasted [Mergus serrator], common [M. merganser], and hooded [Lophodytes cullulatus]) estimate was 386.4 thousand, which was 15 percent below the 2009 estimate, and 14 percent below the long-term average of 450.8 thousand. The American black duck (Anas rubripes) estimate was similar to the 2009 estimate and 7 percent below the long-term average of 478.9 thousand.

Fall Flight Estimate

The mid-continent mallard population is composed of mallards from the traditional survey area (revised in 2008 to exclude Alaska mallards), Michigan, Minnesota, and Wisconsin, and was estimated to be 10.3 ± 0.9 million in 2010. This was similar to the 2009 estimate of 10.3 ± 0.9 million.

Status of Geese and Swans

We provide information on the population status and productivity of North American Canada goose (Branta canadensis), brant (B. bernicla), snow goose (Chen caerulescens), Ross’ goose (C. rossii), emperor goose (C. canagica), white-fronted goose (Anser albifrons), and tundra swans (Cygnus columbianus). Temperatures in much of central and northern Canada from January through April were in excess of 5 °C warmer than average. Substantially above-average temperatures continued into May and June in important goose habitats within eastern Canada. The resulting accelerated snowmelt contributed to favorable nesting conditions for many mid-latitude and arctic nesting goose populations in 2010. Persistent snow cover significantly delayed goose nesting activities only in the Queen Maud Gulf, Victoria Island, and Wrangel Island regions. Well-above or near-average wetland abundance in the U.S. and Canadian prairie regions and mild spring temperatures in many other temperate regions will likely improve production of Canada goose that nest at southern latitudes. Primary abundance indices for both populations of tundra swans decreased in 2010 from 2009 levels. Primary abundance indices decreased for 15 goose populations and
increased for 12 goose populations in 2010 compared to 2009. The following populations displayed significant positive trends during the most recent 10-year period (P < 0.05): Mississippi Flyway Giant, Short Grass Prairie, Aleutian, and Eastern Prairie Canada goose; Western Arctic/Wrangell Island, and Western Central Flyway light goose; and Pacific white-fronted goose. No population showed a significant negative 10-year trend. The forecast for the production of geese and swans in North America for 2010 is regionally variable, but production for many populations will be much improved this year compared to the poor production widely experienced in 2009.

Waterfowl Harvest and Hunter Activity

National surveys of migratory bird hunters were conducted during the 2008 and 2009 hunting seasons. About 1.2 million waterfowl hunters harvested 13,635,700 (±4 percent) ducks and 3,792,600 (±5 percent) goose in 2008, and about 1.1 million waterfowl hunters harvested 13,139,800 (±4 percent) ducks and 3,327,000 (±5 percent) goose in 2009. Mallard, green-winged teal, gadwall, blue-winged/cinnamon teal, and wood duck (Aix sponsa) were the 5 most-harvested duck species in the United States, and Canada goose was the predominant goose species in the goose harvest. Coot hunters (about 31,100 in 2008 and 2009) harvested 275,900 (±43 percent) coots in 2008 and 219,000 (±34 percent) in 2009.

Comments and Issues Concerning Tribal Proposals

For the 2010–11 migratory bird hunting season, we proposed regulations for 30 Tribes and/or Indian groups that followed the 1985 guidelines and were considered appropriate for final rulemaking. Some of the Tribal proposals had both early- and late-season elements. However, as noted earlier, only those with early-season proposals are included in this final rulemaking; 24 Tribes have proposals with early seasons. The comment period for the proposed rule, published on August 6, 2010, closed on August 16, 2010. Because of the necessary brief comment period, we will respond to any comments on the proposed rule and/or these regulations postmarked by August 16, but not received prior to final action by us, in the September late-season final rule. At this time, we have not received any comments.

NEPA Consideration

NEPA considerations are covered by the programmatic document “Final Supplemental Environmental Impact Statement: Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FSES 88–14),” filed with the Environmental Protection Agency on June 9, 1988. We published a notice of availability in the Federal Register on June 16, 1988 (53 FR 22582). We published our Record of Decision on August 18, 1988 (53 FR 31341). In addition, an August 1985 environmental assessment entitled “Guidelines for Migratory Bird Hunting Regulations on Federal Indian Reservations and Ceded Lands” is available from the address indicated under the caption ADDRESSES.

In a notice published in the September 8, 2005, Federal Register (70 FR 53376), we announced our intent to develop a new Supplemental Environmental Impact Statement (SEIS) for the migratory bird hunting program. Public scoping meetings were held in the spring of 2006, as detailed in a March 9, 2006, Federal Register (71 FR 12216). We released the draft SEIS on July 9, 2010 (75 FR 39577). The draft SEIS is available by either writing to the address indicated under ADDRESSES or by viewing on our Web site at http://www.fws.gov/migratorybirds.

Endangered Species Act Consideration

Section 7 of the Endangered Species Act, as amended (16 U.S.C. 1531–1543; 87 Stat. 884), provides that, “The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act” and shall “insure that any action authorized, funded, or carried out * * * is not likely to jeopardize the continued existence of any endangered species or threatened species or result in the destruction or adverse modification of [critical] habitat. * * *.” Consequently, we conducted formal consultations to ensure that actions resulting from these regulations would not likely jeopardize the continued existence of endangered or threatened species or result in the destruction or adverse modification of their critical habitat. Findings from these consultations are included in a biological opinion, which concluded that the regulations are not likely to jeopardize the continued existence of any endangered or threatened species. Additionally, these findings may have caused modification of some regulatory measures previously proposed, and the final frameworks reflect any such modifications. Our biological opinions resulting from this section 7 consultation are available for public inspection at the address indicated under ADDRESSES.

Executive Order 12866

The Office of Management and Budget has determined that this rule is significant and has reviewed this rule under Executive Order 12866. OMB bases its determination of regulatory significance upon the following four criteria:

(a) Whether the rule will have an annual effect of $100 million or more on the economy or adversely affect an economic sector, productivity, jobs, the environment, or other units of the government.

(b) Whether the rule will create inconsistencies with other Federal agencies’ actions.

(c) Whether the rule will materially affect entitlements, grants, user fees, loan programs, or the rights and obligations of their recipients.

(d) Whether the rule raises novel legal or policy issues.

An economic analysis was prepared for the 2008–09 season. This analysis was based on data from the 2006 National Hunting and Fishing Survey, the most recent year for which data are available (see discussion in Regulatory Flexibility Act section below). This analysis estimated consumer surplus for three alternatives for duck hunting (estimates for other species are not quantified due to lack of data). The alternatives are (1) Issue restrictive regulations allowing fewer days than those issued during the 2007–08 season, (2) Issue moderate regulations allowing more days than those in alternative 1, and (3) Issue liberal regulations identical to the regulations in the 2007–08 season. For the 2008–09 season, we chose alternative 3, with an estimated consumer surplus across all flyways of $205–$270 million. At this time, we are proposing no changes to the season frameworks for the 2010–11 season, and as such, we will again consider these three alternatives. However, final frameworks will depend on population status information available later this year. For these reasons, we have not conducted a new economic analysis, but the 2008–09 analysis is part of the record for this rule and is available at http://www.fws.gov/migratorybirds/NewReportsPublications/SpecialTopics/SpecialTopics.html#HuntingRegs or at http://www.regulations.gov.

Regulatory Flexibility Act

The regulations have a significant economic impact on substantial numbers of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). We analyzed the economic impacts of the annual hunting...
regulations on small business entities in detail as part of the 1981 cost-benefit analysis. This analysis was revised annually from 1990–95. In 1995, the Service issued a Small Entity Flexibility Analysis (Analysis), which was subsequently updated in 1996, 1998, 2004, and 2008. The primary source of information about hunter expenditures for migratory game bird hunting is the National Hunting and Fishing Survey, which is conducted at 5-year intervals. The 2008 Analysis was based on the 2006 National Hunting and Fishing Survey and the U.S. Department of Commerce’s County Business Patterns, from which it was estimated that migratory bird hunters would spend approximately $1.2 billion at small businesses in 2008. Copies of the Analysis are available upon request from the Division of Migratory Bird Management (see FOR FURTHER INFORMATION CONTACT) or from our Web site at http://www.fws.gov/migratorybirds/NewReportsPublications/SpecialTopics/SpecialTopics.html#HuntingRegs or at http://www.regulations.gov at Docket No. FWS–R9–MB–2010–0040.

Small Business Regulatory Enforcement Fairness Act
This rule is a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act. For the reasons outlined above, this rule has an annual effect on the economy of $100 million or more. However, because this rule establishes hunting seasons, we do not consider the effective date under the exemption contained in 5 U.S.C. 808(1).

Paperwork Reduction Act
We examined these regulations under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.). The various recordkeeping and reporting requirements imposed under regulations established in 50 CFR part 20, subpart K, are utilized in the formulation of migratory game bird hunting regulations. Specifically, OMB has approved the information collection requirements of our Migratory Bird Surveys and assigned control number 1018–0023 (expires 4/30/2013). A Federal agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Unfunded Mandates Reform Act
We have determined and certify, in compliance with the requirements of the Unfunded Mandates Reform Act, 2 U.S.C. 1502 et seq., that this rulemaking will not impose a cost of $100 million or more in any given year on local or State government or private entities. Therefore, this rule is not a “significant regulatory action” under the Unfunded Mandates Reform Act.

Civil Justice Reform—Executive Order 12988
The Department, in promulgating this rule, has determined that this rule will not unduly burden the judicial system and that it meets the requirements of sections 3(a) and 3(b)(2) of Executive Order 12988.

Takings Implication Assessment
In accordance with Executive Order 12630, this rule, authorized by the Migratory Bird Treaty Act, does not have significant takings implications and does not affect any constitutionally protected property rights. This rule will not result in the physical occupancy of property, the physical invasion of property, or the regulatory taking of any property. In fact, these rules allow hunters to exercise otherwise unavailable privileges and, therefore, reduce restrictions on the use of private and public property.

Energy Effects—Executive Order 13211
Executive Order 13211 requires agencies to prepare Statements of Energy Effects when undertaking certain actions. While this rule is a significant regulatory action under Executive Order 12666, it is not expected to adversely affect energy supplies, distribution, or use. Therefore, this action is not a significant energy action and no Statement of Energy Effects is required.

Government-to-Government Relationship With Tribes
In accordance with the President’s memorandum of April 29, 1994, “Government-to-Government Relations With Native American Tribal Governments” (59 FR 22951, Executive Order 13175, and 512 DM 2), we have evaluated the possible effects on Federally recognized Indian Tribes and have determined that there are no effects on Indian trust resources. However, in the May 13 Federal Register, we solicited proposals for special migratory bird hunting regulations for certain Tribes on Federal Indian reservations, off-reservation trust lands, and ceded lands for the 2010–11 migratory bird hunting season. The resulting proposals were contained in a separate proposed rule (75 FR 47681, August 6, 2010). By virtue of these actions, we have consulted with Tribes affected by this rule.

Federalism Effects
Due to the migratory nature of certain species of birds, the Federal Government has been given responsibility over these species by the Migratory Bird Treaty Act. We annually prescribe frameworks from which the States make selections regarding the hunting of migratory birds, and we employ guidelines to establish special regulations on Federal Indian reservations and ceded lands. This process preserves the ability of the States and Tribes to determine which seasons meet their individual needs. Any State or Indian Tribe may become more restrictive than the Federal frameworks at any time. The frameworks are developed in a cooperative process with the States and the Flyway Councils. This process allows States to participate in the development of frameworks from which they will make selections, thereby having an influence on their own regulations. These rules do not have a substantial direct effect on fiscal capacity, change the roles or responsibilities of Federal or State governments, or intrude on State policy or administration. Therefore, in accordance with Executive Order 13132, these regulations do not have significant federalism effects and do not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Regulations Promulgation
The rulemaking process for migratory game bird hunting must, by its nature, operate under severe time constraints. However, we intend that the public be given the greatest possible opportunity to comment. Thus, when the preliminary proposed rulemaking was published, we established what we believed were the longest periods possible for public comment. In doing this, we recognized that when the comment period closed, time would be of the essence. That is, if there were a delay in the effective date of these regulations after this final rulemaking, States and Tribes would have insufficient time to select season dates and limits; to communicate those
Doves

Season Dates: Open September 1, through September 15, 2010; then open November 12, through December 26, 2010.

Daily Bag and Possession Limits: For the early season, daily bag limit is 10 mourning or white-winged doves, singly, or in the aggregate. For the late season, the daily bag limit is 10 mourning doves. Possession limits are twice the daily bag limits after the first day of the season.

General Conditions: All persons 14 years and older must be in possession of a valid Colorado River Indian Reservation hunting permit before taking any wildlife on Tribal lands. Any person transporting game birds off the Colorado River Indian Reservation must have a valid transport declaration form. Other Tribal regulations apply, and may be obtained at the Fish and Game Office in Parker, Arizona.

(b) Confederated Salish and Kootenai Tribes, Flathead Indian Reservation, Pablo, Montana (Tribal Hunters).

Tribal Members Only

Ducks (Including Mergansers)

Season Dates: Open September 1, 2010, through March 9, 2011.

Daily Bag and Possession Limits: The Tribe does not have specific bag and possession restrictions for Tribal members. The season on harlequin duck is closed.

Coots

Season Dates: Same as ducks.

Daily Bag and Possession Limits: Same as ducks.

Geese

Season Dates: Same as ducks.

Daily Bag and Possession Limits: Same as ducks.

General Conditions: Tribal and nontribal hunters must comply with all basic Federal migratory bird hunting regulations contained in 50 CFR part 20 regarding manner of taking. In addition, shooting hours are sunrise to sunset, and each waterfowl hunter 16 years of age or older must carry on his/her person a valid Migratory Bird Hunting and Conservation Stamp (Duck Stamp) signed in ink across the stamp face. Special regulations established by the Confederated Salish and Kootenai Tribes also apply on the reservation.

(c) Fond du Lac Band of Lake Superior Chippewa Indians, Cloquet, Minnesota (Tribal Members Only).

Ducks

1854 and 1837 Ceded Territories

Season Dates: Begin September 18 and end November 28, 2010.

Daily Bag Limit: 10 geese.

Coots and Common Moorhens (Common Gallinules)

1854 and 1837 Ceded Territories

Season Dates: Begin September 18 and end November 28, 2010.

Daily Bag Limit: 20 coots and common moorhens, singly or in the aggregate.

Sora and Virginia Rails: All Areas

Season Dates: Begin September 1 and end November 28, 2010.

Daily Bag Limit: 25 sora and Virginia rails, singly or in the aggregate.

Common Snipe: All Areas

Season Dates: Begin September 1 and end November 28, 2010.

Daily Bag Limit: Eight common snipe.

Woodcock: All Areas

Season Dates: Begin September 1 and end November 28, 2010.

Daily Bag Limit: Three woodcock.

Mourning Dove: All Areas

Season Dates: Begin September 1 and end October 30, 2010.

Daily Bag Limit: 30 mourning doves.

General Conditions:

1. While hunting waterfowl, a Tribal member must carry on his/her person a valid Tribal waterfowl hunting permit.

2. Except as otherwise noted, Tribal members will be required to comply with Tribal codes that will be no less restrictive than the provisions of Chapter 10 of the Model Off-Reservation Code. These regulations parallel Federal requirements in 50 CFR part 20 as to hunting methods, transportation, sale, exportation, and other conditions generally applicable to migratory bird hunting.

3. Band members in each zone will comply with State regulations providing
for closed and restricted waterfowl hunting areas.

4. There are no possession limits on any species, unless otherwise noted above. For purposes of enforcing bag and possession limits, all migratory birds in the possession or custody of band members on ceded lands will be considered to have been taken on those lands unless tagged by a Tribal or State conservation warden as having been taken on reservation. All migratory birds that fall on reservation lands will not count as part of any off-reservation bag or possession limit.

(d) Grand Traverse Band of Ottawa and Chippewa Indians, Suttons Bay, Michigan (Tribal Members Only).

All Seasons in Michigan, 1836 Treaty Zone

Ducks

Daily Bag Limit: 20 ducks, which may include no more than 5 pintail, 3 canvasback, 5 black ducks, 1 hooded merganser, 5 wood ducks, 3 redheads, and 9 mallards (only 4 of which may be hens).

Canada and Snow Geese

Season Dates: Open September 1, through November 30, 2010; and open January 1, 2010, through February 8, 2011.

Daily Bag Limit: 10 geese.

Other Geese (White-Fronted Geese and Brant)

Season Dates: Open September 20, through November 30, 2010.

Daily Bag Limit: Five geese.

Sora Rails, Common Snipe, and Woodcock

Season Dates: Open September 1, through November 14, 2010.

Daily Bag Limit: 10 rails, 10 snipe, and 5 woodcock.

Mourning Doves

Season Dates: Open September 1, through November 14, 2010.

Daily Bag Limit: 10 mourning doves.

General Conditions: A valid Grand Traverse Band Tribal license is required and must be in possession before taking any wildlife. All other basic regulations contained in 50 CFR part 20 are valid. Other Tribal regulations apply, and may be obtained at the Tribal office in Suttons Bay, Michigan.

The 2010–11 waterfowl hunting season regulations apply to all treaty areas (accept where noted):
early-season, and open October 2, 2010, through January 31, 2011, for the late-season. During this period, days to be hunted are specified by the Kalispel Tribe. Nontribal hunters should contact the Tribe for more detail on hunting days.

**Daily Bag and Possession Limits:**

- **Canada Geese:** for the early season, and 3 light geese and 4 dark geese, for the late season. The daily bag limit is 2 brant (when the State’s season is open) and is in addition to dark goose limits for the late-season. The possession limit is twice the daily bag limit.

**Tribal Hunters Within Kalispel Ceded Lands**

**Ducks**

- **Season Dates:** Open September 1, 2010, through January 31, 2011.

**General**

1. All Tribal members are required to obtain a valid Tribal resource card and 2010–11 hunting license.
2. Except as modified by the Service rules adopted in response to this proposal, these amended regulations parallel all Federal regulations contained in 50 CFR part 2.9.
3. **Particular regulations of note include:**
   - Nontoxic shot will be required for all waterfowl hunting by Tribal members.
   - Tribal members in each zone will comply with Tribal regulations providing for closed and restricted waterfowl hunting areas. These regulations generally incorporate the same restrictions contained in parallel State regulations.
   - Possession limits for each species are double the daily bag limit, except on the opening day of the season, when the possession limit equals the daily bag limit, unless otherwise noted above.
   - **Tribal members hunting in Michigan will comply with Tribal codes that contain provisions parallel to Michigan law regarding duck blinds and decoys.**
   - The Little Traverse Bay Bands of Odawa Indians, Petoskey, Michigan (Tribal Members Only).
