39 CFR Part 111

Express Mail Open and Distribute and Priority Mail Open and Distribute

AGENCY: Postal ServiceTM.

ACTION: Proposed rule.

SUMMARY: The Postal Service proposes to revise Mailing Standards of the United States Postal Service, Domestic Mail Manual (DMM®) 705.16 to require the use of a single-ply address label containing a service barcode with unique Service Type Code “723” or a “DB” prefix along with new “Tag 257, Tag 267, or Label 257S, on all Express Mail Open and Distribute containers. The Postal Service also proposes to revise the service commitment for Express Mail Open and Distribute as a guaranteed end of day product; and to add a five-pound minimum weight requirement for Express Mail Open and Distribute and Priority Mail® Open and Distribute sacks.

DATES: Submit comments on or before October 18, 2010.

ADDRESSES: Mail or deliver written comments to the Manager, Mailing Standards, U.S. Postal Service, 475 L’Enfant Plaza, SW., Room 4446, Washington, DC 20260–4446. SUPPLEMENTARY INFORMATION:

Express Mail

Express Mail Open and Distribute service is designed to provide mailers with expedited service to destination delivery units and other mail processing facilities. Currently, Express Mail Open and Distribute service follows the same mailing requirements and delivery standards as Express Mail service.

The requirement to use the Express Mail Label 11 series with a 13-digit barcode prevents the Postal Service from differentiating between Express Mail and Express Mail Open and Distribute products.

The delivery standards for Express Mail service are intended for residential/business customers and as a result are delivered by 12 noon or 3 p.m. Express Mail Open and Distribute is a product that is delivered to a processing facility or delivery unit for further processing of the contents.

To account for the Express Mail Open and Distribute product, the Postal Service is proposing to require mailers to place a single-ply address label with a service barcode on all Express Mail Open and Distribute containers and to submit an electronic file. The service barcode is required to be a US 128 or Code 39 barcode with a “DB” prefix, or concatenated GS1–128 (eVS approved mailers) symbology with a unique Service Type Code (STC) “723”. The text, “USPS SCAN ON ARRIVAL,” must appear above the barcode. This scan information is exclusive to the Open and Distribute service and will assist in facilitating correct scan behavior.

This proposed requirement is in accordance with instructions for barcode specifications, electronic file format and testing, and the certification process in Publication 91, Confirmation Services Technical Guide.

The Postal Service also proposes to replace Tag 157 with Tag 257 (DDU), to assist in the verification of the arrival at the destination facility for all Express Mail Open and Distribute containers.

Generally, the Postal Service processing window is 12 noon to 6 a.m. The window to dispatch mail from plants to delivery units is from 4 a.m. to 9 a.m. To better align the Express Mail Open and Distribute product with processing and dispatch windows, without loss of service, we are proposing to change the service commitment to end of day (11:59 p.m.).

Express Mail and Priority Mail

In addition, processing facilities currently receive Express Mail Open and Distribute and Priority Mail Open and Distribute sacks containing mail that weighs less than five pounds, making it difficult to identify that the sack contains mail.

The handling of low volume sacks in plants has been indentified as
 problematic with the Open and Distribute product. Because of the risk of sacks being mishandled as empty equipment, limiting our effort to meet service commitments, we are proposing to establish a five-pound minimum weight requirement for all Express Mail Open and Distribute and Priority Mail Open and Distribute sacks.

The proposed changes to Express Mail Open and Distribute and Priority Mail Open and Distribute will provide better visibility of the product and enable the Postal Service to monitor service performance based on the product. Although we are exempt from the notice and comment requirements of the Administrative Procedure Act (5 U.S.C. 553(b), (c)) regarding proposed rulemaking by 39 U.S.C. 410(a), we invite public comments on the following proposed revisions to Mailing Standards of the United States Postal Service, Domestic Mail Manual (DMM), incorporated by reference in the Code of Federal Regulations. See 39 CFR Part 111.1.

SUPPLEMENTARY INFORMATION: This
advance notice of proposed
rulemaking is intended to provide information and assistance to mailers in planning for
future mailings and preparing for
system changes necessary to adopt the
new IMpb format and electronic files.
The subsequent proposed rule to this
advance notice, will provide standards
for the optional use of IMpb no later
than January of 2011, and will propose
the mandatory use of IMpb barcodes on
all domestic packages in January 2012.
The Postal Service looks forward to
receiving and considering industry
feedback on its proposed timeline prior
to publishing final standards.

The term “package” is used to
encompass any domestic mailpiece
meeting the characteristics in DMM
sections 101.3, 401.1, and all Express
Mail® and Priority Mail® mailpieces,
regardless of their shape, including flat–
rate items.

Piece–level package information is
needed in the shipping industry to
expand product lines, increase
competitiveness, provide greater
visibility to mailers and the Postal
Service, and to create a more
comprehensive service performance
measurement tool. Today, without the
purchase of an extra service such as
Delivery Confirmation® Signature
Confirmation®, or insurance and package
tracking and delivery information is
limited. Barcodes are not currently
