Chlorinated Isocyanurates From the People’s Republic of China: Notice of Extension of Time Limit for the Final Results of the 2008–2009 Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

DATES: Effective Date: September 17, 2010.

FOR FURTHER INFORMATION CONTACT: Brandon Petelin or Charles Riggle, AD/CVD Operations, Office 8, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482–8173 or (202) 482–0650, respectively.

SUPPLEMENTARY INFORMATION:

Background

On May 14, 2010, the Department of Commerce (“Department”) published its preliminary results of review of the antidumping order on chlorinated isocyanurates from the People’s Republic of China (“PRC”). This review covers the period June 1, 2008, through May 31, 2009. The final results of review are currently due no later than September 11, 2010.

Extension of Time Limit for Final Results of Review

Pursuant to section 751(a)(3)(A) of the Tariff Act of 1930, as amended (“the Act”), the Department shall issue the final results of an administrative review within 120 days after the date on which the preliminary results are published. However, if it is not practicable to complete the review within this time period, section 751(a)(3)(A) of the Act allows the Department to extend the time period to a maximum of 180 days. Completion of the final results of this review within the 120-day period is not practicable because the Department needs additional time to analyze and address complicated surrogate value issues, including the most appropriate methodology for valuing labor, for the final results. Because it is not practicable to complete this review within the time specified under the Act, we are extending the time period for issuing the final results of the administrative review by 30 days in accordance with section 751(a)(3)(A) of the Act. Therefore, the final results will be due Monday, October 11, 2010, which is 150 days from publication of the preliminary results. However, October 11, 2010, falls on a federal holiday, and it is the Department’s long-standing practice to issue a determination on the next business day when the statutory deadline falls on a federal holiday. Accordingly, the deadline for completion of the preliminary results of the review is now no later than October 12, 2010.

This notice is published in accordance with sections 751(a)(3)(A) and 777(i) of the Act.

Susan H. Kuhbach,
Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations

Certain Frozen Warmwater Shrimp From the People’s Republic of China: Extension of Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (“Department”) is extending the time limit for the preliminary results of the administrative review of certain frozen warmwater shrimp from the People’s Republic of China (“PRC”). The review covers the period February 1, 2009, through January 31, 2010.

We determine that it is not practicable to complete the preliminary results of the administrative review on certain frozen warmwater shrimp from the PRC within the original time limit because the Department requires additional time to analyze questionnaire responses, issue supplemental questionnaires, and to evaluate surrogate value submissions for purposes of these preliminary results. Therefore, the Department is extending the time limit for completion of the preliminary results of the administrative review by 120 days. The preliminary results will now be due no later than February 28, 2011. The final results continue to be due 120 days after

Magnesium Metal From the Russian Federation: Final Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On May 13, 2010, the Department of Commerce published the preliminary results of the administrative review of the antidumping duty order on magnesium metal from the Russian Federation. The review covers two manufacturers/exporters, PSC VSMPO-AVISMA Corporation (AVISMA) and Solikamsk Magnesium Works (SMW). The period of review (POR) is April 1, 2008, through March 31, 2009. Based on our analysis of the comments received we have made no changes in the margin for AVISMA. Therefore, the final results do not differ from the preliminary results. The final margin for AVISMA is listed below in the section entitled “Final Results of the Review.”

DATES: Effective Date: September 17, 2010.

FOR FURTHER INFORMATION: Hermes Pinilla or Minoo Hatten, AD/CVD Operations, Office 5, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482–3477 or (202) 482–1690, respectively.

SUPPLEMENTARY INFORMATION:

Background

On May 13, 2010, the Department of Commerce (the Department) published the preliminary results of the administrative review of the antidumping duty order on magnesium metal from the Russian Federation. See Magnesium Metal From the Russian Federation: Preliminary Results of Antidumping Duty Administrative Review, 75 FR 26922 (May 13, 2010) (Preliminary Results). We invited interested parties to comment on the Preliminary Results. At the request of certain parties, we held a public hearing, with a closed session, on July 28, 2010. The Department has conducted this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of the Order

The merchandise covered by the order is magnesium metal (also referred to as magnesium), which includes primary and secondary pure and alloy magnesium metal, regardless of chemistry, raw material source, form, shape, or size. Magnesium is a metal or alloy containing by weight primarily the element magnesium. Primary magnesium is produced by decomposing raw materials into magnesium metal. Secondary magnesium is produced by recycling magnesium-based scrap into magnesium metal. The magnesium covered by the order includes blends of primary and secondary magnesium.

The subject merchandise includes the following pure and alloy magnesium metal products made from primary and/or secondary magnesium, including, without limitation, magnesium cast into ingots, slabs, rounds, billets, and other shapes, and magnesium ground, chipped, crushed, or machined into raspings, granules, turnings, chips, powder, briquettes, and other shapes: (1) Products that contain at least 99.95 percent magnesium, by weight (generally referred to as “ultra-pure” magnesium); (2) products that contain less than 99.95 percent but not less than 99.8 percent magnesium, by weight (generally referred to as “pure” magnesium); and (3) chemical combinations of magnesium and other material(s) in which the magnesium content is 50 percent or greater, but less that 99.8 percent, by weight, whether or not conforming to an “ASTM Specification for Magnesium Alloy.”

The scope of the order excludes: (1) magnesium that is in liquid or molten form and (2) mixtures containing 90 percent or less magnesium in granular or powder form by weight and one or more of certain non-magnesium granular materials to make magnesium-based reagent mixtures, including lime, calcium metal, calcium silicon, calcium carbide, calcium carbonate, carbon, slag coagulants, fluor spar, nepheline syenite, feldspar, aluminum, colemanite, water, and sodium hydroxide; (2) products that contain more than 99.8 percent magnesium, by weight; and (3) non-magnesium-based reagent mixtures, including lime, calcium metal, calcium silicon, calcium carbide, calcium carbonate, carbon, slag coagulants, fluor spar, nepheline syenite, feldspar, aluminum, colemanite, water, and sodium hydroxide.
