DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2010–0386; Airspace Docket No. 10–AWA–1]

Revocation of Class C Airspace, Establishment of Class D Airspace, and Modification of Class E Airspace; Columbus, GA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action removes the Columbus, GA, Class C airspace area; establishes Class D airspace to replace the Class C airspace area; and amends the existing Class E surface area and 700 foot Class E airspace at Columbus, GA. The FAA is taking this action because Columbus Metropolitan Airport no longer meets the criteria required to qualify for a Class C airspace designation. Reconfiguring the airspace facilitates more efficient use of airspace in the Columbus, GA, area. A minor correction to the geographic coordinates for Lawson Army Airfield (AAF) also will be made.

DATES: Effective Date: 0901 UTC, January 13, 2011. The Director of the Federal Register approves this incorporation by reference action under 1 CFR part 51, subject to the annual revision of FAA Order 7400.9 and publication of conforming amendments.

FOR FURTHER INFORMATION CONTACT: Paul Gallant, Airspace Regulations and ATC Procedures Group, Office of Airspace Services, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 267–8783.

SUPPLEMENTARY INFORMATION:

History
On May 18, 2010, the FAA published in the Federal Register a notice of proposed rulemaking to remove the Columbus, GA, Class C airspace area, establish the Columbus, GA, Class D airspace area and modify the existing Class E surface area and the 700 foot Class E airspace area at Columbus, GA (75 FR 27670). Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal. No comments were received.

This rule includes a minor correction to the description of geographic coordinates of the AAF, Fort Benning, GA, listed in the description of paragraph 6005. With the exception of this correction and editorial changes, this amendment is the same as that proposed in the NPRM.

The Rule
This action amends Title 14 Code of Federal Regulations (14 CFR) part 71 by removing the Columbus Metropolitan Airport Class C airspace area; establishing a new part-time Class D airspace area to replace the former Class C airspace; and modifying the existing Class E surface area and Class E airspace extending upward from 700 feet above the surface at Columbus, GA. The radius of the Class E surface area at the airport will be reduced from 5 nautical miles (NM) to 4.4 NM to match the radius of the dimensions of the Class D airspace area, while the radius of the Class E airspace extending upward from 700 feet above the surface at Columbus Metropolitan Airport will be reduced from 10 NM to 6.8 NM. Columbus Metropolitan Airport no longer meets the air traffic volume and passenger enplanements requirements for a Class C airspace designation.

Class C airspace areas, Class D airspace areas, Class E surface areas and Class E airspace extending upward from 700 feet above the surface, are published in paragraphs 4000, 5000, 6002, and 6005, respectively, of FAA Order 7400.9U dated August 18, 2010, and effective September 15, 2010, which is incorporated by reference in 14 CFR 71.1. The Class C, D and E airspace area amendments proposed in this document will be published subsequently in the Order.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. The FAA’s authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle 1, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency’s authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends a portion of the terminal airspace structure to enhance the safe and efficient use of the NAS in the vicinity of Columbus, GA.

Environmental Review
The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1E, “Environmental Impacts: Policies and Procedures,” paragraph 311a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

List of Subjects in 14 CFR Part 71
Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

§71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9U, Airspace Designations and Reporting Points, dated August 18, 2010, and effective September 15, 2010, is amended as follows:

Paragraph 4000 Class C Airspace.

* * * *

ASO GA C Columbus Metropolitan Airport, GA [Removed]

Paragraph 5000 Class D Airspace.

* * * *

ASO GA D Columbus, GA [New] Columbus Metropolitan Airport, GA

14 CFR Part 97

[Docket No. 30748; Amdt. No. 3395]

Standard Instrument Approach Procedures, and Takeoff Minimums and Obstacle Departure Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) and associated Takeoff Minimums, and ODP are specified in the amendatory provisions.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of October 18, 2010.

The amendment is based on the criteria for change considerations, and the amendment provides the affected CFR sections and specifies the types of SIAP contained in FAA Form 8260, as modified by the National Flight Data Center (NFD/NOTAMs). The availability of each SIAP contained in FAA form documents is unnecessary. This amendment provides the affected CFR sections and specifies the types of SIAP and the corresponding effective dates. This amendment also identifies the airport and its location, the procedure and the amendment number.

The Rule

This amendment to 14 CFR part 97 is effective upon publication of each separate SIAP as amended in the Federal Register. For safety and timeliness of change considerations, this amendment incorporates only specific changes contained for each SIAP as modified by the National Flight Data Center (NFD/NOTAMs). The SIAPs, as modified by FDC P–NOTAM, and contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Procedures.
