

regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This proposed rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

#### Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023-01, and Commandant Instruction M16475.ID which guides the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321-4370f), and have made a preliminary determination that this action is one of a category of actions which do not individually or cumulatively have a significant effect on the human environment because it simply promulgates the operating regulations or procedures for drawbridges. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 271

[EPA-R10-RCRA-2010-0947; FRL-9236-9]

### Oregon; Correction of Federal Authorization of the State's Hazardous Waste Management Program

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** The EPA Region 10 proposes to approve a correction to the State of Oregon's federally authorized RCRA hazardous waste management program. On January 7, 2010, EPA published a final rule under docket EPA-R10-RCRA 2009-0766 granting final authorization for changes the State of Oregon made to its federally authorized RCRA Hazardous Waste Management Program. These authorized changes included, among others, the Federal Recycled Used Oil Management Standards; Clarification rule, promulgated on July 30, 2003. During a post-authorization review of the State of Oregon's regulations, EPA identified that the Oregon Administrative Rules (OAR), related to the federal used oil management requirements (OAR 340-100-0002), had not been updated to include the adoption of the Federal Recycled Used Oil Management Standards; Clarification rule. Therefore, the State did not have an effective state rule and EPA inaccurately referenced this rule in the State's Final Authorization Action published and effective on January 7, 2010. This action will correct the State of Oregon's federally authorized program, by removing the inaccurate authorization reference to the federal Recycled Used Oil Management Standards; Clarification rule.

**DATES:** Comments on this proposed action must be received in writing on or before January 10, 2011.

**SUPPLEMENTARY INFORMATION:** In the Rules section of this **Federal Register**, EPA is approving Oregon's Authorization of State Hazardous Waste Management Program Revision though a direct final rule without prior proposal because the Agency views this as a noncontroversial action and anticipates no adverse comments to this action. Unless we get written adverse comments which oppose this approval during the comment period, the direct final rule will become effective on the date it establishes, and we will not take further action on this proposal. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule. EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time. For additional information, see the direct rule which is located in the Rules section of this **Federal Register**.
