DEPARTMENT OF AGRICULTURE
Animal and Plant Health Inspection Service

7 CFR Part 301
[Docket No. APHIS–2008–0083]
Gypsy Moth Generally Infested Areas; Illinois, Indiana, Maine, Ohio, and Virginia

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are adopting as a final rule, with several changes, an interim rule that amended the regulations to add areas in Illinois, Indiana, Maine, Ohio, and Virginia to the list of generally infested areas based on the detection of infestations of gypsy moth in those areas. This document corrects errors in the listing of generally infested areas in Maine in the interim rule. The interim rule was necessary to prevent the artificial spread of the gypsy moth to noninfested areas of the United States.

DATES: Effective Date: December 16, 2010.

FOR FURTHER INFORMATION CONTACT: Ms. Julie S. Spaulding, Forest Pest Programs Manager, Emergency and Domestic Programs, Plant Protection and Quarantine, APHIS, 4700 River Road Unit 137, Riverdale, MD 20737; (301) 734–5332.

SUPPLEMENTARY INFORMATION:

Background

The gypsy moth (Lymantria dispar) is a destructive pest of forest and shade trees. The gypsy moth regulations (contained in 7 CFR 301.45 through 301.45–12 and referred to below as the regulations) restrict the interstate movement of regulated articles from generally infested areas to prevent the artificial spread of the gypsy moth.

In accordance with §301.45–2 of the regulations, generally infested areas are, with certain exceptions, those States or portions of States in which a gypsy moth general infestation has been found by an inspector, or each portion of a State that the Administrator deems necessary to regulate because of its proximity to infestation or its inseparability for quarantine enforcement purposes from infested localities. Less than an entire State will be designated as a generally infested area only if: (1) The State has adopted and is enforcing a quarantine or regulation that imposes restrictions on the intrastate movement of regulated articles that are substantially the same as those that are imposed with respect to the interstate movement of such articles; and (2) the designation of less than the entire State as a generally infested area will be adequate to prevent the artificial interstate spread of infestations of the gypsy moth. Section 301.45–3 of the regulations lists generally infested areas.

In an interim rule effective and published in the Federal Register on September 21, 2009 (74 FR 48001–48002, Docket No. APHIS–2008–0083), we amended §301.45–3(a) by adding 3 counties in Illinois, 1 county in Indiana, 32 townships in Maine, 1 county in Ohio, and 1 county in Virginia to the list of generally infested areas. We took that action because, in cooperation with the States of Illinois, Indiana, Maine, Ohio, and Virginia, the United States Department of Agriculture conducted surveys that detected multiple life stages of the gypsy moth in Cook, Du Page, and McHenry Counties, IL; St. Joseph County, IN; several townships in Aroostook, Franklin, Penobscot, Piscataquis, and Somerset Counties, ME; Morrow County, OH; and Montgomery County, VA.

Comments on the interim rule were required to be received on or before November 20, 2009. We did not receive any comments.

However, a drafting error in the amendatory instructions in the interim rule caused the previously designated as generally infested in the five counties in Maine to be removed from §301.45–3. We are correcting this error in this final rule and adding the areas back into the listing of generally infested areas in Maine. In addition, there were several typographical errors in the listing of the townsships. The complete list of generally infested areas in Aroostook, Franklin, Penobscot, Piscataquis, and Somerset Counties, ME, can be found in the regulatory text at the end of this document.

Therefore, for the reasons given in the interim rule and in this document, we are adopting the interim rule as a final rule, with the changes discussed in this document.

This action also affirms the information contained in the interim rule concerning Executive Order 12866 and the Regulatory Flexibility Act. Executive Orders 12372 and 12988, and the Paperwork Reduction Act.

Further, for this action the Office of Management and Budget has waived its review under Executive Order 12866.

Effective Date

Pursuant to the administrative procedure provisions in 5 U.S.C. 553, we find good cause for making this rule effective less than 30 days after publication in the Federal Register. The interim rule adopted as final by this rule became effective on September 21, 2009. This rule corrects the descriptions of generally infested areas in Maine that were incorrectly set out in the interim rule. Immediate action is necessary to correct those errors in order to prevent the artificial spread of gypsy moth to noninfested areas of the United States. Therefore, the Administrator of the Animal and Plant Health Inspection Service has determined that this rule should be effective upon publication in the Federal Register.

List of Subjects in 7 CFR Part 301

Agricultural commodities, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Transportation.

Accordingly, the interim rule amending 7 CFR part 301 that was published at 74 FR 48001–48002 on September 21, 2009, is adopted as a final rule with the following changes:

PART 301—DOMESTIC QUARANTINE NOTICES

1. The authority citation for part 301 continues to read as follows:
§ 301.45–3 Generally infested areas.

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Model 777–200, –300, and –300ER Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Model 777–200, –300, and –300ER series airplanes. This AD requires installing Teflon sleeving under the clamps of certain wire bundles routed along the fuel tank boundary structure, and cap sealing certain penetrating fasteners of the main and center fuel tanks. This AD results from fuel system reviews conducted by the manufacturer. We are issuing this AD to prevent electrical arcing on the fuel tank boundary structure or inside the fuel tanks, which could result in a fire or explosion.

DATES: This AD is effective January 20, 2011.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in the AD as of January 20, 2011.

ADDRESSES: For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, Washington 98124–2207; telephone 206–544–5000, extension 1, fax 206–766–5680; e-mail me.boecom@boeing.com; Internet https://www.myboeingfleet.com.

Examining the AD Docket

You may examine the AD docket on the Internet at http://www.regulations.gov or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (telephone 800–647–5527) is the Document Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a supplemental notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to include an airworthiness directive (AD) that would apply to certain Model 777–200, –300, and –300ER series airplanes. That supplemental NPRM was published in the Federal Register on June 19, 2010 (75 FR 34663). The original NPRM (72 FR 3956, January 29, 2007) proposed to require installing Teflon sleeving under...
