Revisions of the North Inlet-Winyah Bay National Estuarine Research Reserve and San Francisco Bay National Estuarine Research Reserve.

The revised management plan for the North Inlet-Winyah Bay, SC National Estuarine Research Reserve outlines the administrative structure; the education, training, stewardship, and research programs of the reserve; and the plans for future land acquisition and facility development to support reserve operations. The goals described in this plan provide a framework that supports program integration for collaborative management of the San Francisco Bay National Estuarine Research Reserve.

Since the last approved management plan in 2003, the reserve has hired a full complement of core staff; established a research lab, fully operational System-wide Monitoring Program, and Graduate Research Fellowship Program; added a Coastal Training Program that delivers science-based information to key decision makers; developed education programs focused on sharing estuarine research with non-academic audiences; and constructed facilities to support essential functions of the reserve at its headquarters on the Romberg Tiburon Center campus of San Francisco State University. These facilities include office space for staff, classroom space, laboratory, and meeting facilities. The reserve has also constructed facilities and interpretive exhibits at its components sites, China Camp State Park and Rush Ranch Open Space Preserve, that support on-site research and educational programs. This plan can be accessed at http://www.sfbaynerr.org.
