SYSTEM MANAGER AND ADDRESS:

NOTIFICATION PROCEDURE:
If you wish to determine whether a record exists regarding you in the system of records, contact the systems manager at the address listed under SYSTEM MANAGER AND ADDRESS. Your request must meet the requirements of 34 CFR 5b.5, including proof of identity.

RECORD ACCESS PROCEDURE:
If you wish to gain access to your record in the system of records, contact the system manager at the address listed under SYSTEM MANAGER AND ADDRESS. Your request must meet the requirements of 34 CFR 5b.5, including proof of identity.

SYSTEM MANAGER AND ADDRESS:
Office of the Chief Financial Officer
DC 20202–2600.

RECORD SOURCE CATEGORIES:
The collection of records information is obtained from the grantee, participants, and employers.

When the Department determines a participant will not fulfill a payback obligation through service and must instead repay some or all of the financial assistance the participant received, the Department will forward information to the Department’s Accounts Receivable Group in the Office of the Chief Financial Officer (OCFO).

EXEMPTIONS CLAIMED FOR THE SYSTEM:
None.

FOR FURTHER INFORMATION CONTACT: Mr. Josh Gesick, Senior Systems Engineer, National Renewable Energy Laboratory, MS R585, 1617 Cole Boulevard, Golden, CO 80401; Dr. Ned Stetson, Technology Development Manager, Fuel Cell Technology Program, EE–2H, 1000 Independence Ave., SE., Washington, DC 20585, (202) 586–9995. More information on DOE’s hydrogen storage program, targets and current research information can be found at http://www1.eere.energy.gov/hydrogenandfuelsystems/storage/. The format of the workshop is intended to be interactive with short introductory presentations followed by extensive discussions among the attendees. Numerous breakout sessions are scheduled for both days. The detailed agenda is available online at http://www1.eere.energy.gov/hydrogenandfuelsystems/wkshp_compressedcryo.html.

The purpose of the compressed hydrogen workshop is to identify strategies to lower the cost of high pressure hydrogen storage systems. Discussion will focus on determining research strategies and technical pathways to lower costs while maintaining performance and safety. Introductory presentations include automotive and manufacturing perspectives, and overviews of carbon fiber development and recent costs analyses. The cryo-compressed hydrogen workshop will be held on Tuesday, February 15th. The objective is to determine and prioritize the research needs and technical pathways for each approach while highlighting those aspects which should be common to both system types as well as identifying the unique requirements and issues that should be addressed. Introductory presentations will include perspectives from automotive and other potential users of the technology and overviews on hydrogen sorption technology and recent analyses and progress on cryo-compressed cryo-sorption technology.
