When the applicant has submitted a timely application for renewal, the existing CoC will not expire until the application for renewal has been determined by the NRC.

(c) The application must be accompanied by a safety analysis report (SAR). The SAR must include the following:

(1) Design bases information as documented in the most recently updated final safety analysis report (FSAR) as required by § 72.248;

(2) Time-limited aging analyses that demonstrate that structures, systems, and components important to safety will continue to perform their intended function for the requested period of extended operation; and

(3) A description of the AMP for management of issues associated with aging that could adversely affect structures, systems, and components important to safety.

(d) The design of a spent fuel storage cask will be renewed if the conditions in subpart G of this part and § 72.238 are met, and the application includes a demonstration that the storage of spent fuel has not, in a significant manner, adversely affected structures, systems, and components important to safety.

(e) In approving the renewal of the design of a spent fuel storage cask, the NRC may revise the CoC to include terms, conditions, and specifications that will ensure the safe operation of the cask during the renewal term, including but not limited to, terms, conditions, and specifications that will require the implementation of an AMP.

Removal of Expired Federal Aviation Administration Regulations and References

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; technical amendment.

SUMMARY: The Federal Aviation Administration (FAA) is making minor technical changes to its regulations by removing expired Special Federal Aviation Regulations (SFARs) or cross-references, as well as other expired or obsolete regulations. None of these changes are substantive in nature since the regulations in question have expired and are not currently in effect. This technical amendment is necessary to update our regulations. The rule will not impose any additional burden or restriction on persons or organizations affected by these regulations.

DATES: Effective February 16, 2011.

SUPPLEMENTARY INFORMATION:

Background

The FAA periodically issues temporary regulations in 14 CFR called Special Federal Aviation Regulations (SFARs). These SFARs are typically necessary for a finite period of time, and usually specify an expiration date within the regulatory text. Additionally, certain subparts have specified expiration dates within the regulatory text. Currently, 14 CFR contains several SFARs, subparts, and sections that have become unnecessary or have expiration dates that have passed. To maintain an accurate body of regulations, we are removing and/or amending SFAR Nos. 36, 80, 92–5, 93, 98, 101–1; Subparts J and M of part 21; Subpart B of part 93; §§ 91.146(b), 121.360, 135.153, 183.61(a)(1), 183.63, and corresponding references. Under the Administrative Procedure Act, an agency doesn’t have to issue a notice of proposed rulemaking when the agency for good cause finds that public notice and procedure are “impracticable, unnecessary, or contrary to the public interest.” See 5 U.S.C. 553(b). Because this technical amendment simply removes obsolete regulations and references, we find that publishing the changes for public notice and comment is unnecessary.

The Administrative Procedure Act also states that an agency must publish a substantive rule not less than 30 days before its effective date, except as otherwise provided by the agency for good cause. See 5 U.S.C. 553(d). We find that this technical amendment imposes no additional burden or requirement on the regulated industry, and is not substantive in nature. Moreover, we find that there is good cause to make the changes effective immediately upon publication in the Federal Register. It is in the public interest to remove these obsolete references from our regulations immediately.

This regulation is editorial in nature and imposes no additional burden on any person or organization. Therefore, we have determined the action: (1) Is not a significant rule under Executive Order 12866; and (2) is not a significant rule under Department of Transportation Regulatory Policy and
Procedures. No impact is expected as a result of removing these regulations and a full regulatory evaluation is not required. In addition, the FAA certifies the rule will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
