FEDERAL TRADE COMMISSION

Public Workshop: Debt Collection 2.0: Protecting Consumers as Technologies Change

AGENCY: Federal Trade Commission (“FTC” or the “Commission”).

ACTION: Public Workshop and Request for Public Comments and Participation.

SUMMARY: The FTC announces that it will hold a public workshop on April 28, 2011, to address consumer protection issues that have arisen as debt collectors avail themselves of advances in technology. The workshop will explore developments in technology that debt collectors use to gather, store, and manage information about consumers; to comply with the law; to communicate with consumers; and to receive payment. The workshop will provide an opportunity for government regulators, industry members, technologists, consumer advocates, and researchers, to discuss the costs and benefits of these technologies for debt collectors and consumers. It will also address whether and how collectors may use such technologies consistent with applicable laws, including the Fair Debt Collection Practices Act and Section 5 of the FTC Act, what consumer protection concerns arise from use of these technologies, and what actions, if any, the Commission and other policymakers should take to respond to those concerns. This notice poses a series of questions on which the Commission seeks comment.

The event is open to the public, and there is no fee for attendance.
