SUPPLEMENTARY INFORMATION:

Background

On September 29, 2010, the Department of Commerce (“Department”) published a notice of initiation of antidumping and countervailing duty administrative reviews and requests for revocation in part for certain frozen fish fillets from the Socialist Republic of Vietnam covering the period August 1, 2009, through July 31, 2010. See Initiation of Antidumping and Countervailing Duty Administrative Reviews and Requests for Revocation in Part, 75 FR 60076 (September 29, 2010). The preliminary results are currently due on May 3, 2011.

Extension of Time Limits for Preliminary Results

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended (“Act”), and 19 CFR 351.213(h)(1) require the Department to issue the preliminary results in an administrative review of an antidumping duty order 245 days after the last day of the anniversary month of the order for which the administrative review was requested. The Department may, however, extend the deadline for completion of the preliminary results of an administrative review to 365 days if it determines it is not practicable to complete the review within the foregoing time period. See section 751(a)(3)(A) of the Act and 19 CFR 351.214(h)(2).

The Department finds that it is not practicable to complete the preliminary results within this time limit. The Department is extending the deadline because it has provided parties additional time to submit surrogate country comments and thus will require additional time to analyze these comments. We are therefore extending the time for the completion of the preliminary results of this review by 120 days to August 31, 2011.

This notice is published in accordance with section 751(a)(3)(A) of the Act and 19 CFR 351.213(h)(2).

Dated: April 7, 2011.
Gary Taverman,
Acting Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

[FR Doc. 2011–8943 Filed 4–12–11; 8:45 am]
certain frozen warmwater shrimp ("shrimp") from the Socialist Republic of Vietnam ("Vietnam"). The Department is conducting a new shipper review ("NSR") of the Order, covering the period of review ("POR") of February 1, 2010, through July 31, 2010. If these preliminary results are adopted in our final results of review, we will instruct U.S. Customs and Border Protection ("CBP") to assess antidumping duties on entries of subject merchandise during the POR for which the importer-specific assessment rates are above de minimis.

DATES: Effective Date: April 13, 2011.

FOR FURTHER INFORMATION CONTACT: Paul Walker, AD/CVD Operations, Office 9, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington DC 20230; telephone: (202) 482–0413.

SUPPLEMENTARY INFORMATION:

Background

On August 26, 2010, pursuant to section 751(a)(2)(B)(i) of the Tariff Act of 1930, as amended (the "Act"), and section 351.214(c) of the Department’s regulations, the Department received a NSR request from Quoc Viet Seafoods Processing Trading and Import-Export Co., Ltd. ("Quoc Viet"). Quoc Viet certified that it was the producer and exporter of the subject merchandise upon which the request was based. On October 1, 2010, the Department published a notice of initiation of the NSR of the Order for Quoc Viet. On September 28, 2010, the Department issued its original antidumping duty questionnaire to Quoc Viet. Between October 22, 2010, and February 3, 2011, Quoc Viet submitted responses to the original and supplemental sections A, C, D and Importer antidumping duty questionnaires.

On January 4, 2011, the Department sent interested parties a letter requesting comments on surrogate country selection and information pertaining to valuing factors of production ("FOPI"). On January 31, 2011, Quoc Viet submitted surrogate country comments and surrogate value ("SV") data. On March 23, 2011, the Department extended the deadline for the preliminary results of this review to April 14, 2011.4

Scope of the Order

The scope of the order includes certain frozen warmwater shrimp and prawns, whether wild-caught (ocean harvested) or farm-raised (produced by aquaculture), head-on or head-off, shell-on or peeled, tail-on or tail-off, deveined or not deveined, cooked or raw, or otherwise processed in frozen form.

The frozen warmwater shrimp and prawn products included in the scope of the order, regardless of definitions in the Harmonized Tariff Schedule of the United States ("HTSUS"), are products which are processed from warmwater shrimp and prawns through freezing and which are sold in any count size.

The products described above may be processed from any species of warmwater shrimp and prawns. Warmwater shrimp and prawns are generally classified in, but are not limited to, the Penaeidae family. Some examples of the farmed and wild-caught warmwater species include, but are not limited to, white leg shrimp (Peneaus vannamei), banana prawn (Peneaus merguiensis), fleshy prawn (Peneaus chinensis), giant river prawn (Macrobrachium rosenbergii), giant tiger prawn (Peneaus monodon), redspotted shrimp (Peneaus brasiliensis), southern brown shrimp (Peneaus subtilis), southern pink shrimp (Peneaus notialis), southern rough shrimp (Trachypena curvirostris), southern white shrimp (Peneaus schmitti), blue shrimp (Peneaus stylirostris), western white shrimp (Peneaus occidentalis) and Indian white prawn (Peneaus indicus).

Frozen shrimp and prawns that are packed with marinade, spices or sauce are included in the scope of the order. In addition, food preparations, which are not "prepared meals," that contain more than 20 percent by weight of shrimp or prawn are also included in the scope of the order. Excluded from the scope are: (1) Breaded shrimp and prawns (HTS subheading 1605.20.1020); (2) shrimp and prawns generally classified in the Pandalidae family and commonly referred to as coldwater shrimp, in any state of processing; (3) fresh shrimp and prawns whether shell-on or peeled (HTS subheadings 0306.23.0020 and 0306.23.0040); (4) shrimp and prawns in prepared meals (HTS subheading 1605.20.0510); (5) dried shrimp and prawns; (6) canned warmwater shrimp and prawns (HTS subheading 1605.20.1040); (7) certain dusted shrimp; and (8) certain battered shrimp. Dusted shrimp is a shrimp-based product: (1) That is produced from fresh (or thawed-from-frozen) and peeled shrimp; (2) to which a “dusting” layer of rice or wheat flour of at least 95 percent purity has been applied; (3) with the entire surface of the shrimp flesh thoroughly and evenly coated with the flour; (4) with the non-shrimp content of the end product constituting between four and 10 percent of the product’s total weight after being dusted, but prior to being frozen; and (5) that is subjected to IQF freezing immediately after application of the dusting layer. Battered shrimp is a shrimp-based product that, when dusted in accordance with the definition of dusting above, is coated with a wet viscous layer containing egg and/or milk, and par-fried.

The products covered by the order are currently classified under the following HTSUS subheadings: 0306.13.0003, 0306.13.0006, 0306.13.0009, 0306.13.0012, 0306.13.0015, 0306.13.0018, 0306.13.0021, 0306.13.0024, 0306.13.0027, 0306.13.0040, 1605.20.1010 and 1605.20.1030. These HTSUS subheadings are provided for convenience and for customs purposes only and are not dispositive, but rather the written description of the scope of the order is dispositive.

Non-Market Economy Country Status

In every case conducted by the Department involving Vietnam, Vietnam has been treated as a non-market ("NME") country. In accordance with section 771(18)(C)(I) of the Act, any determination that a foreign country is an NME country shall remain in effect until revoked by the administering authority. None of the parties to this proceeding have contested such treatment. Accordingly, we calculated normal value ("NV") in accordance with section 773(c) of the Act, which applies to NME countries.

Separate Rate Determination

In proceedings involving NME countries, there is a rebuttable presumption that all companies within the country are subject to government control and, thus, should be assessed a single antidumping duty rate. It is the
Department’s standard policy to assign all exporters of the merchandise subject to review in NME countries a single rate unless an exporter can affirmatively demonstrate an absence of government control, both in law (de jure) and in fact (de facto), with respect to exports. To establish whether a company is sufficiently independent to be entitled to a separate, company-specific rate, the Department analyzes each exporting entity in an NME country under the test established in the Final Determination of Sales at Less Than Fair Value: Sparklers from the People’s Republic of China, 56 FR 20588 (May 6, 1991) (“Sparklers”), as amplified by the Notice of Final Determination of Sales at Less Than Fair Value: Silicon Carbide From the People’s Republic of China, 59 FR 22585 (May 2, 1994) (“Silicon Carbide”).

A. Absence of De Jure Control

The Department considers the following de jure criteria in determining whether an individual company may be granted a separate rate: (1) an absence of restrictive stipulations associated with an individual exporter’s business and export licenses; and (2) any legislative enactments decentralizing control of companies.

In this NSR, Quoc Viet submitted complete responses to the separate rate section of the Department’s NME questionnaire. The evidence submitted by Quoc Viet includes government laws and regulations on corporate ownership, business licenses, and narrative information regarding its operations and selection of management. The evidence provided by Quoc Viet supports a finding of a de jure absence of government control over each of its export activities. Thus, we believe that the evidence on the record supports a preliminary finding of an absence of de jure government control based on: (1) An absence of restrictive stipulations associated with the exporter’s business license; and (2) the legal authority on the record decentralizing control over Quoc Viet.

B. Absence of De Facto Control

The absence of de facto government control over exports is based on whether the respondent: (1) Sets its own export prices independent of the government and other exporters; (2) retains the proceeds from its export sales and makes independent decisions regarding the disposition of profits or financing of losses; (3) has the authority to negotiate and sign contracts and other agreements; and (4) has autonomy from the government regarding the selection of management.3

In its questionnaire responses, Quoc Viet submitted evidence indicating an absence of de facto government control over its export activities. Specifically, this evidence indicates that: (1) Quoc Viet sets its own export prices independent of the government and without the approval of a government authority; (2) Quoc Viet retains the proceeds from its sales and makes independent decisions regarding the disposition of profits or financing of losses; (3) Quoc Viet selects the general manager, branch manager or division manager with the authority to negotiate and bind the company in an agreement; (4) the general manager is selected by the board of directors or company employees, and the general manager appoints the deputy managers and the manager of each department; and (5) there is no restriction on any of either company’s use of export revenues.

Therefore, the Department preliminarily finds that Quoc Viet has established prima facie that it qualifies for a separate rate under the criteria established by Silicon Carbide and Sparklers.

New Shipper Review Bona Fide Analysis

Consistent with the Department’s practice, we investigated the bona fide nature of the sale made by Quoc Viet in this NSR. We found that the sale by Quoc Viet was made on a bona fide basis.8 Based on our investigation into the bona fide nature of the sale, the questionnaire responses submitted by Quoc Viet, and the company’s eligibility for separate rates (see Separate Rate Determination section above), we preliminarily determine that Quoc Viet has met the requirement to qualify as a new shipper during this POR. Therefore, for the purposes of these preliminary results, we are treating Quoc Viet’s sale of subject merchandise to the United States as an appropriate transaction for this NSR.

Surrogate Country

When the Department conducts a review of imports from an NME country, section 773(c)(1) of the Act directs it to base NV, in most circumstances, on the NME producer’s FOPs, valued in a surrogate market economy ("ME") country or countries considered to be appropriate by the Department. In accordance with section 773(c)(4) of the Act, in valuing the FOPs, the Department shall utilize, to the extent possible, the prices or costs of FOPs in one or more ME countries that are: (1) at a level of economic development comparable to that of the NME country; and (2) significant producers of comparable merchandise. Further, pursuant to section 351.408(c)(2) of the Department’s regulations, the Department will normally value FOPs in a single country, except for labor. The sources of the surrogate factor values are discussed under the “Normal Value” section below.9

As noted above, on January 4, 2011, the Department sent interested parties a letter requesting comments on surrogate country selection and information pertaining to valuing FOPs. On January 31, 2011, the Department received comments from Quoc Viet suggesting that the Department select Bangladesh as the surrogate country, as well as Bangladeshi SV data.10 Pursuant to its practice, the Department received a list of potential surrogate countries from Import Administration’s Office of Policy (“OP”).11 The OP determined that Bangladesh, Pakistan, India, Sri Lanka, the Philippines and Indonesia were at a comparable level of economic development to Vietnam.12 The Department considers the six countries identified by the OP in its Surrogate Country List as “equally comparable in terms of economic development.”13 Thus, we find that Bangladesh, Pakistan, India, Sri Lanka, the Philippines, and Indonesia are all at an economic level of development equally comparable to that of Vietnam. We note that the Surrogate Country List is a non-exhaustive list of economically comparable countries.

7 See Silicon Carbide, 59 FR at 22587; Sparklers, 56 FR at 20589; see also Notice of Final Determination of Sales at Less Than Fair Value: Furfuryl Alcohol from the People’s Republic of China, 60 FR 22544, 22545 (May 8, 1995).
8 For more detailed discussion of this issue, see Memorandum to the File, through Scot T. Fullerton, Program Manager, Office IX, from Paul Walker, Case Analyst, “Bona Fide Nature of the Sale in the Antidumping Duty New Shipper Review of Certain Warmwater Shrimp from the Socialist Republic of Vietnam: Quoc Viet Seaproductions Processing Trading and Import-Export Co., Ltd.”, dated concurrently with this notice.
9 See also Memorandum to the File, through Scot T. Fullerton, Program Manager, Office IX, from Paul Walker, Case Analyst, “New Shipper Review of Frozen Warmwater Shrimp from Vietnam: Surrogate Values for the Preliminary Results,” dated concurrently with this notice (“SV Memo”).
10 See Quoc Viet’s January 31, 2011 submission.
12 Id.
13 Id.
Quoc Viet submitted evidence that Bangladesh, Pakistan, India, Sri Lanka, the Philippines and Indonesia are all significant producers of comparable merchandise.\textsuperscript{14} However, while we find that these countries are economically comparable to Vietnam and produce comparable merchandise, we note that the record contains no publicly available SV factor information for Pakistan, India, Sri Lanka, the Philippines or Indonesia.

With regard to Bangladesh, the record contains publicly available surrogate factor value information. Given the above-cited facts, we find that the information on the record shows that Bangladesh is an appropriate surrogate country because Bangladesh is at a similar level of economic development pursuant to section 773(c)(4) of the Act, is a significant producer of comparable merchandise, and has reliable, publicly available data for surrogate valuation purposes.

**U.S. Price**

For Quoc Viet’s export price (“EP”) sale, we used the EP methodology, pursuant to section 772(a) of the Act, because the first sale to an unaffiliated purchaser was made prior to importation and constructed export price was not otherwise warranted by the facts on the record. We calculated EP based on cost and freight foreign port price to the first unaffiliated purchaser in the United States. We also deducted foreign inland freight, and foreign brokerage and handling from the starting price (or gross unit price), in accordance with section 772(c) of the Act. We reviewed the movement expenses incurred in Vietnam by Quoc Viet and found that they were provided by an NME vendor or paid for using Vietnamese currency. Thus, we based the deduction of these movement charges on SVs.\textsuperscript{15}

**Normal Value**

**A. Methodology**

Section 773(c)(1)(B) of the Act provides that the Department shall determine the NV using an FOP methodology if the merchandise is exported from a NME country; and (2) the information does not permit the calculation of NV using home market prices, third country prices, or constructed value under section 773(a) of the Act. The Department bases NV on FOPs because the presence of government controls on various aspects of NMEs renders price comparisons and the calculation of production costs invalid under the Department’s normal methodologies.

Section 773(c)(1) of the Act provides that the Department shall determine the NV using an FOP methodology if: (1) the merchandise is exported from an NME country; and (2) the information does not permit the calculation of NV using home market prices, third country prices, or constructed value under section 773(a) of the Act.

**B. Factor Valuations**\textsuperscript{16}

In accordance with section 773(c) of the Act, we calculated NV based on FOPs reported by Quoc Viet for the POR. To calculate NV, we multiplied the reported per-unit factor-consumption rates by publicly available Bangladeshi SVs. In selecting SVs, we considered the quality, specificity and contemporaneity of the data. As appropriate, we adjusted input prices by including freight costs to make them delivered prices. Specifically, we added to Bangladeshi import SVs a surrogate freight cost using the shorter of the reported distance from the domestic supplier to the factory of production, or the distance from the nearest seaport to the factory of production, where appropriate. This adjustment is in accordance with the Court of Appeals for the Federal Circuit’s (“CAFC”) decision in Sigma Corp. v. United States, 117 F.3d 1401, 1407–1408 (Fed. Cir. 1997). Where we did not use Bangladeshi Import Statistics, we calculated freight based on the reported distance from the supplier to the factory.

In accordance with the OTCA 1988 legislative history, the Department continues to apply its long-standing practice of disregarding SVs if it has a reason to believe or suspect the source data may be subsidized.\textsuperscript{17} In this regard, the Department has previously found that it is appropriate to disregard such prices from India, Indonesia, South Korea and Thailand because we have determined that these countries maintain broadly available, non-industry specific export subsidies.\textsuperscript{18}

\textsuperscript{14} See Quoc Viet’s January 31, 2011 submission at Exhibit 1.

\textsuperscript{15} See SV Memo for details regarding the SVs for movement expenses.

\textsuperscript{16} In accordance with section 351.301(c)(3)(ii) of the Department’s regulations, for the final results in an antidumping NSR, interested parties may submit publicly available information to value FOPs within 20 days after the date of publication of the preliminary results.

\textsuperscript{18} See, e.g., Carbazole Violet Pigment 23 from India: Final Results of the Expedited Five-year (Sunset) Review of the Countervailing Duty Order, 73 FR 131257 (March 19, 2010) and accompanying Issues and Decision Memorandum at 23.

a study conducted by the Network of Aquaculture Centres in Asia-Pacific ("NACA"), an intergovernmental organization affiliated with the United Nation’s ("UN") Food and Agricultural Organization ("FAO"). The Department’s practice when selecting the best available information for valuing FOPs, in accordance with section 773(c)(1) of the Act, is to select, to the extent practicable, SVs which are product-specific, representative of a broad-market average, publicly available, contemporaneous with the POR and exclusive of taxes and duties.\(^22\) The Department notes that the value of the main input, head-on, shell-on shrimp, is a critical FOP in the dumping calculation as it accounts for a significant percentage of NV. Moreover, the ability to value shrimp on a count-size basis is a significant consideration with respect to the data available on the record, as the subject merchandise and the raw shrimp input are both sold on a count-size specific basis. The Bangladeshi shrimp values within the NACA study are compiled by the UN’s FAO from actual pricing records kept by Bangladeshi farmers, traders, depots, agents, and processors. The Bangladeshi shrimp values within the NACA study are publicly available, represent a broad-market average, are product-specific, count-size-specific, contemporaneous and represent actual transaction prices.\(^23\)

The Department used UN ComTrade Statistics, provided by the UN Department of Economic and Social Affairs’ Statistics Division, as its primary source of Bangladeshi SV data to value the raw material and packaging material inputs that Quoc Viet used to produce the merchandise under review during the POR, except where listed below.\(^24\) For a detailed description of all SVs, see SV Memo. The data represents cumulative values for the calendar year 2007, for inputs classified by the Harmonized Commodity Description and Coding System number. As noted above, for each input value, we used the average value per unit for that input imported from Bangladesh for all countries that the Department has not previously determined to be NME countries, countries that the Department has determined to be countries which subsidized exports (i.e., Indonesia, South Korea, Thailand, and India), imports from unspecified countries and imports from Bangladesh into Bangladesh.

It is the Department’s practice to calculate price index adjustors to inflate or deflate, as appropriate, SVs that are not contemporaneous with the POR using the wholesale price index ("WPI") for the subject country.\(^25\) However, in this case, a WPI was not available for Bangladesh. Therefore, where publicly available information contemporaneous with the POR with which to value factors could not be obtained, SVs were adjusted using the Consumer Price Index ("CPI") rate for Bangladesh, or the WPI for India or Indonesia (for certain SVs where Bangladeshi data could not be obtained), as published in the \textit{International Financial Statistics} of the International Monetary Fund.

Where necessary, the Department made currency conversions into U.S. dollars, in accordance with section 773A(a) of the Act, using the exchange rates in effect on the dates of the U.S. sales, as certified by the Federal Reserve Bank. We relied on the daily exchange rates posted on the Import Administration Web site.\(^26\) On May 14, 2010, the CAFC in \textit{Dorbest Ltd. v. United States}, 604 F.3d 1363, 1372 (CAFC 2010), found that the regression-based method for calculating wage rates, as stipulated by section 351.408(c)(3) of the Department’s regulations, uses data not permitted by the statutory requirements laid out in section 773 of the Act (i.e., 19 U.S.C. 1677b(c)). The Department is continuing to evaluate options for determining labor values in light of the recent CAFC decision. However, for these preliminary results, we have calculated an hourly wage rate to use in valuing the respondent’s reported labor input by averaging industry-specific earnings and/or wages in countries that are economically comparable to Vietnam and that are significant producers of comparable merchandise.

For the preliminary results of this NSR, the Department is valuing labor using a simple average industry-specific wage rate using earnings or wage data reported under Chapter 5B by the International Labor Organization ("ILO"). To achieve an industry-specific labor value, we relied on industry-specific labor data from the countries we determined to be both economically comparable to Vietnam, and significant producers of comparable merchandise. A full description of the industry-specific wage rate calculation methodology is provided in the SV Memo. The Department calculated a simple average industry-specific wage rate of $1.09 for these preliminary results. Specifically, for this review, the Department has calculated the wage rate using a simple average of the data provided to the ILO under Sub-Classification 15 of the ISIC–Revision 3 standard by countries determined to be both economically comparable to Vietnam and significant producers of comparable merchandise. The Department finds the two-digit description under ISIC–Revision 3 ("Manufacture of Food Products and Beverages") to be the best available wage rate SV on the record because it is specific and derived from industries that produce merchandise comparable to the subject merchandise. Consequently, we averaged the ILO industry-specific wage rate data or earnings data available from the following countries found to be economically comparable to Vietnam and are significant producers of comparable merchandise: The Philippines, Egypt and Indonesia. For further information on the calculation of the wage rate, see SV Memo.

We valued electricity using data from the Bangladesh Ministry of Power, Energy, & Mineral Resources. This information was published on their Power Division’s website. We valued water using 2007 data from the Asian Development Bank. We inflated the value using the POR average CPI rate. We valued diesel using data published by the World Bank in “Bangladesh: Transport at a Glance,” published in June 2006. We inflated the value using the POR average CPI rate.

To value truck freight and motorcycle freight, we used data published in \textit{2008 Statistical Yearbook of Bangladesh} published by the Bangladesh Bureau of Statistics. We inflated the value using the POR average CPI rate. We valued containerization using Indian information previously available on the Import Administration Web site. We inflated the value using the POR average WPI rate. We valued brokerage and handling using a price list of export procedures necessary to export a standardized cargo of goods in Bangladesh. The price list is compiled based on a survey case study of the procedural requirement for trading a standard shipment of goods by ocean transport in India that is published in

\(^{22}\) See Fresh Garlic from the People’s Republic of China: Final Results and Partial Rescission of the Eleventh Administrative Review and New Shipper Reviews, 72 FR 34348 (June 22, 2007) and accompanying Issues and Decision Memorandum at Comment 2A.

\(^{23}\) The calculation for shrimp and all other surrogate values listed below may be found in the SV Memo.

\(^{24}\) This can be accessed online at: http://www.unstats.un.org/unsd/comtrade/.

\(^{26}\) See http://www.trade.gov/ia/, see also SV Memo.

We valued the by-product using shell scrap values using a surrogate value for shrimp by-products based on a purchase price quote for wet shrimp shells from an Indonesian buyer of crustacean shells. Although we recognize that Quoc Viet reported by-products other than shells and that this surrogate value is not from Bangladesh, the primary surrogate country, this information represents the best information on the record and has been used in past case segments. Moreover, we also note that this is the only surrogate value on the record for by-products, and as a consequence, is being used for these preliminary results. We inflated the value using the POR average WPI rate. To value factory overhead, selling, general and administrative expenses, and profit, we used the simple average of the 2009–2010 financial statement of Apex Foods Limited and the 2008–2009 financial statement of Gemini Seafood Limited, both of which are Bangladeshi shrimp processors.

Preliminary Results of Review

The Department has preliminarily determined that the following dumping margin exists for the period February 1, 2010, through July 31, 2010:

<table>
<thead>
<tr>
<th>Manufacturer/exporter</th>
<th>Margin</th>
</tr>
</thead>
<tbody>
<tr>
<td>Quoc Viet</td>
<td>de minimis</td>
</tr>
</tbody>
</table>

Disclosure

The Department will disclose to parties of this proceeding the calculated performance in reaching the preliminary results within five days of the date of publication of this notice in accordance with section 351.224(b) of the Department’s regulations.

Comments

In accordance with section 351.301(c)(3)(ii) of the Department’s regulations, for the final results, interested parties may submit publicly available information to value FOPs within 20 days after the date of publication of these preliminary results. Interested parties must provide the Department with supporting documentation for the publicly available information to value each FOP. Additionally, in accordance with section 351.301(c)(1) of the Department’s regulations, for the final results of this NSR, interested parties may submit factual information to rebut, clarify, or correct factual information submitted by an interested party within ten days of the applicable deadline for submission of such factual information. However, the Department notes that section 351.301(c)(1) of the Department’s regulations permits new information only insofar as it rebuts, clarifies, or corrects information recently placed on the record.

Assessment Rates

Upon issuance of the final results, the Department will determine, and CBP shall assess, antidumping duties on all appropriate entries covered by this NSR. The Department intends to issue assessment instructions to CBP 15 days after the publication date of the final results of this NSR. If these preliminary results are adopted in our final results of this NSR, we will instruct CBP to assess antidumping duties on all appropriate entries covered by this review if any importer-specific assessment rate calculated in the final results of this review is above de minimis.

Cash-Deposit Requirements

The following cash deposit requirement will be effective upon publication of the final results of this NSR for all shipments of subject merchandise produced and exported by Quoc Viet entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided for by section 751(a)(2)(C) of the Act: (1) for subject merchandise produced and exported by Quoc Viet, the cash deposit rate will be the rate established in the final results of this NSR. If the cash deposit rate calculated in the final results is zero or de minimis, no cash deposit will be required for the specific producer-exporter combination listed above. The cash deposit requirement, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a preliminary reminder to importers of its responsibility under section 351.402(f)(2) of the Department’s regulations to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this POR. Failure to comply with this requirement could result in the Secretary’s presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

We are issuing and publishing this notice in accordance with section 751(a)(2)(B) and 777(i) of the Act, and section 351.214(b) and 351.221(b)(4) of the Department’s regulations.

29 See SV Memo which contains the following memorandum: Memorandum to Barbara E. Tillman, Director, Office of AD/CVD Enforcement VII, through Maureen Flannery, Program Manager, Office of AD/CVD Enforcement VII, from Christian Hughes and Adina Tesedoescu, Case Analysts, “Surrogate Valuation of Shell Scrap: Freshwater Crawfish Tail Meat from the People’s Republic of China (PRC).” Administrative Review 9/1/00–8/31/00 and New Shipper Reviews 9/1/00–8/31/01 and 9/1/00–10/15/01. DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

Announcement of Meeting to Explore Feasibility of Establishing a NIST/Industry Consortium on Neutron Measurements for Soft Materials Manufacturing

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice of public meeting.

SUMMARY: The National Institute of Standards and Technology (NIST) invites interested parties to attend a pre-consortium meeting on June 2–3, 2011 to be held on the NIST campus. The goal of the one-day meeting is to evaluate industry interest in creating a NIST/industry consortium focused on advanced neutron-based probes for soft materials. The goals of such a consortium would include the development of neutron-based measurements that would address critical needs for manufacturers of soft materials such as polymers, complex fluids, and protein-based materials. Advances in neutron-based measurement science are anticipated through the development of sample environments that closely mimic manufacturing processes, measurement methods to probe and analyze complex mixtures, and data analysis models that support routine measurements with high information content. The consortium would be administered by NIST. Consortium research and development would be conducted by NIST staff members along with at least one technical representative from each participating member company. CRADA contributions for participation in the consortium would be on the order of Twenty Thousand ($20,000) per year. The initial term of the consortium is intended to be three years.

DATES: The meeting will take place on June 2–3, 2011 from 8 a.m. to 5 p.m.

ADDRESSES: The meeting will be held on the NIST Gaithersburg campus, 100 Bureau Drive, Gaithersburg, MD 20899. Please note admittance instructions under the SUPPLEMENTARY INFORMATION section of this notice.

FOR FURTHER INFORMATION CONTACT: Ronald L. Jones, National Institute of Standards and Technology, 100 Bureau Drive, Stop 8514, Gaithersburg, MD 20859–8514, USA; Telephone: (301) 975–4624; Fax (301) 975–3928; E-mail: ronald.jones@nist.gov.

SUPPLEMENTARY INFORMATION: All visitors to the National Institute of Standards and Technology site will have to pre-register to be admitted. Anyone wishing to attend this meeting must pre-register by C.O.B May 27, 2011 in order to attend. Please submit your name, e-mail address, and phone number to Teresa Vicente, and you will be provided instructions for admittance. Non-U.S. citizens must also submit their country of citizenship, title, employer/ sponsor, and address. Teresa Vicente’s e-mail address teresa.vicente@nist.gov and their phone number is (301) 975–3883.

Dated: April 6, 2011.

Charles H. Romine,
Acting Associate Director for Laboratory Programs.

DEPARTMENT OF DEFENSE

Department of the Army

Record of Decision (ROD) for the Base Closure and Realignment (BRAC) 2005 Actions at Fort McPherson, GA

AGENCY: Department of the Army, DoD.

ACTION: Record of decision.

SUMMARY: The Department of the Army announces the availability of the ROD, which summarizes the decision on how to implement property disposal in accordance with the Defense Base Closure and Realignment Act of 1990 (the Base Closure Act), Public Law 101–510, as amended, following the closure of Fort McPherson, Georgia.

The Army has decided to implement its preferred alternative of early transfer of surplus federal property to other entities for reuse. Pursuant to the National Environmental Policy Act of 1969 (NEPA) and its implementing regulations, the Army prepared a Final Environmental Impact Statement (FEIS) that includes the evaluation of the environmental and socioeconomic impacts of disposing of surplus federal property and the implementation by others of reasonable, foreseeable reuse alternatives for the entire property. Under the early transfer alternative, the Army can transfer and dispose of surplus property for redevelopment before environmental remedial actions have been completed. This method of early disposal, allowable under Section 120(b)(3)(C) of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, would defer the CERCLA covenant requirement to complete all necessary environmental cleanup prior to the transfer of the remediated property. In this way, parcels could become available for redevelopment and reuse sooner under this disposal alternative than under any other. The Governor of Georgia must concur with the deferral request for the surplus federal property at Fort McPherson.

ADDRESSES: To obtain a copy of the ROD contact Mr. Owen Nuttall, Fort McPherson BRAC Environmental Office, Building 714, 1508 Hood Avenue, Fort Gillem, GA 30297–5161; (404) 469–5245 or owen.nuttall@us.army.mil. An electronic version of the ROD can be viewed or downloaded at: http://www.hqda.army.mil/acsim/brac/nepa_eis_docs.htm.

FOR FURTHER INFORMATION CONTACT: Mr. Owen Nuttall at (404) 469–5245.

SUPPLEMENTARY INFORMATION: The McPherson Planning Local Redevelopment Authority (MPLRA) reuse plan (Reuse Plan) provides the basis for the development of reasonable and foreseeable reuse scenarios evaluated in the FEIS. The McPherson Redevelopment Authority (MPLRA) is the implementation authority for the redevelopment of Fort McPherson and will implement the Reuse Plan. The range of reuse alternatives evaluated in the EIS encompasses reasonably foreseeable variations of the Reuse Plan and the results of this analysis were used by the Army in its decision regarding disposition of the property.

A Memorandum of Agreement (MOA) for the Closure and Disposal of Fort McPherson has been legally executed by the signing of authorized representatives of the Army, the Georgia State Historic Preservation Officer, and the Advisory Council on Historic Preservation. Army obligations fully described in the MOA are considered mitigations required under the National Historic Preservation Act. Specific mitigation measures the Army commits to perform are outlined in the MOA.

Dated: April 7, 2011.

Herschell E. Wolfe,
Acting Deputy Assistant Secretary of the Army (Environment, Safety and Occupational Health).
