Joan River Restoration Settlement Act (Act), included in Public Law 111–11. The Secretary of the Interior is authorized and directed to implement the terms and conditions of the Settlement through the Act. The SJRRP, consisting of Reclamation, DWR, the U.S. Fish and Wildlife Service (FWS), the National Marine Fisheries Service (NMFS), and the California Department of Fish and Game (DFG), will work to implement the Settlement.

Reclamation, on behalf of the Secretary of the Interior, proposes to implement the terms and conditions of the Settlement, consistent with the Act. Additionally, the Settling Parties agreed that implementation of the Settlement will also require participation of the State of California (State), concurrently, and through the execution of the Settlement, the Settling Parties entered into a Memorandum of Understanding with the State (by and through the California Resources Agency, DWR, DFG, and the California Environmental Protection Agency) regarding the State’s role in the implementation of the Settlement. The “implementing agencies,” which include Reclamation, FWS, NMFS, DWR, and DFG, are responsible for the management of the program to implement the Settlement.

The Draft PEIS/R evaluates and documents numerous physical and operational actions that, when implemented, could potentially directly, indirectly, or cumulatively affect environmental conditions in the Central Valley. The Draft PEIS/R study area includes areas potentially affected by Settlement actions and involves the San Joaquin River, from Millerton Reservoir to the Sacramento-San Joaquin Delta, and the water service areas of the CVP and State Water Project, including the Friant Division.

The Draft PEIS/R considers a reasonable range of alternatives and analyzes the environmental effects of implementation of the Settlement. Seven alternatives are evaluated in the document, including a No-Action Alternative and six action alternatives. The Draft PEIS/R analyzes most activities that would be implemented at a program level. Actions analyzed at a program level in the Draft PEIS/R would require future project-specific environmental compliance. The Draft PEIS/R also analyzes the reoperation of Friant Dam to implement the Settlement at a project level. The project level review for the reoperation of Friant Dam comprises the entire NEPA analysis for this component of the Settlement. The Draft PEIS/R provides broad direction for a wide range of possible future project-level actions while allowing the opportunity for flexibility to respond to changing needs.

Copies of the Draft PEIS/R are available for public inspection and review, including the following locations:
