controlled at the time that it determined that a noncompliance existed in the subject tires.

Paragraph S5.5(f) of FMVSS No. 139 require in pertinent part:

S5.5 Tire markings. Except as specified in paragraphs (a) through (i) of S5.5, each tire must be marked on each sidewall with the information specified in S5.5(a) through (d) and on one sidewall with the information specified in S5.5(e) through (f) according to the phase-in schedule specified in S7 of this standard. The markings must be placed between the maximum section width and the bead on at least one sidewall, unless the maximum section width of the tire is located in an area that is not more than one-fourth of the distance from the bead to the shoulder of the tire. If the maximum section width falls within that area, those markings must appear between the bead and a point one-half the distance from the bead to the shoulder of the tire, on at least one sidewall. The markings must be in letters and numerals not less than 0.078 inches high and raised above the tire, on at least one sidewall. The actual number of plies in the tread area of the tires as required by paragraph S5.5(f). Specifically, the tires in question were inadvertently manufactured with “TREAD 1 PLY NYLON + 2 PLY STEEL + 3 PLY POLYESTER; SIDEWALL 3 PLY POLYESTER.” The labeling should have been “TREAD 2 PLY NYLON + 2 PLY STEEL + 3 PLY POLYESTER; SIDEWALL 3 PLY POLYESTER.”

Cooper also explains that the noncompliance was discovered during a review of the specified stamping requirements and visual inspection of tire stamping.

Cooper argues that this noncompliance is inconsequential to motor vehicle safety because the noncompliant sidewall marking does not create an unsafe condition and all other labeling requirements have been met.

Cooper points out that NHTSA has previously granted similar petitions for non-compliances in sidewall marking. In summation, Cooper believes that the described noncompliance of its tires under their control after Cooper notified them that the subject noncompliance existed. Those tires must be brought into conformance, exported, or destroyed.

to meet the requirements of FMVSS No. 139 is inconsequential to motor vehicle safety, and that its petition, to exempt from providing recall notification of noncompliance as required by 49 U.S.C. 30118 and remediying the recall noncompliance as required by 49 U.S.C. 30120 should be granted.
