j. Description of the supplement: S. D. Warren (Warren) requests the Commission adopt modifications to the existing Sebago Lake Level Management Plan (LLMP) that would include changing project operation from requiring seasonal target lake water surface elevations to a seasonal flow-based regime. Under the modified LLMP, Warren would first direct flows into the bypassed reach as required by the license, and then would direct flows that are above the required minimum bypassed reach flow into the power canal. Warren also requests confirmation that no further wetland studies at Sebago Lake are necessary, that no shoreline permitting program is needed under a new license, and that no new shallow boat launch near the project facilities is necessary.
