Veterinary biological products include viruses, serums, toxins, and analogous products of natural or synthetic origin, such as vaccines, antitoxins, or the immunizing components of microorganisms intended for the diagnosis, treatment, or prevention of diseases in domestic animals. APHIS issues licenses to qualified establishments that produce veterinary biological products and issues permits to importers of such products. We also enforce requirements concerning production, packaging, labeling, and shipping of these products and set standards for the testing of these products.

To help ensure that veterinary biological products used in the United States are pure, safe, potent, and effective, APHIS requires certain information collection activities, including establishment license applications, product license applications, product import permit applications, product and test report forms, and field study summaries.

In part 94, §94.1 prohibits the importation of used farm equipment into the United States from regions in which foot-and-mouth disease (FMD) or rinderpest exists, unless the equipment has been steam-cleaned prior to export to the United States so that it is free of exposed dirt and other particulate matter. Such equipment must be accompanied to the United States by an original certificate, signed by an authorized official of the national animal health service of the exporting region, stating that the farm equipment, after its last use and prior to export, was steam-cleaned free of all exposed dirt and other particulate matter.
