SUPPLEMENTARY INFORMATION:

I. Abstract

The NPS needs information concerning park visitors and visitor services, potential park visitors, and residents of communities near parks to provide National Park Service (NPS) managers with usable knowledge for improving the quality and utility of agency programs, services, and planning efforts. Since many of the NPS surveys are similar in terms of the populations being surveyed, the types of questions being asked, and research methodologies, the NPS proposes to renew its clearance from OMB for a generic Information Collection (1024–0224) of NPS-sponsored surveys. Since 1999, the benefits of this generic approval program have been significant to the NPS, Department of the Interior, OMB, NPS cooperators, and the public. Significant time and cost savings have been incurred and 514 surveys have been conducted in units throughout the National Park System. Approval was typically granted in 60 days or less from the date the Principal Investigator (PI) first submitted the survey package for review. This is a significant reduction over the approximately 6–8 months involved in the regular OMB review process. From FY 1999 through FY 2010, the generic ICR process has produced an estimated cost savings to the Federal government and PI’s of $1,017,495.
