requires that carriers update their cost allocation manuals (CAMs) at least annually; except that changes to the cost apportionment table and the description of time reporting procedures must be filed at the time of implementation. Proposed changes in the description of time reporting procedures, the statement concerning affiliate transactions, and the cost apportionment table must be accompanied by a statement quantifying the impact of each change on regulated operations. Changes in the description of time reporting procedures and the statement concerning affiliate transactions must be quantified in $100,000 increments at the account level. Changes in the cost apportionment table must be quantified in $100,000 increments at the cost pool level.

Moreover, filing of CAMs and occasional updates are subject to the uniform format and standard procedures specified in Responsible Accounting Officer (RAO) Letter 19. RAO Letter 26 provides guidance to carriers in revising their CAMs to reflect changes to the affiliate transactions rules pursuant to the Accounting Safeguards Order (FCC 96–490). The CAM is reviewed by the Commission to ensure that all costs are properly classified between regulated and nonregulated activity. Uniformity in the CAMs helps improve the joint cost allocation process. In addition, this uniformity gives the Commission greater reliability in financial data submitted by the carriers through the Automated Reporting Management Information System (ARMIS).

Proposed Project

Health Literacy Item Set Supplemental to CAHPS Health Plan Survey—Pretest of Proposed Questions and Methodology

The Consumer Assessment of Healthcare Providers and Systems (CAHPS®) program is a multi-year initiative. AHRQ first launched the program in October 1995 in response to concerns about the lack of good information about the quality of health plans from the enrollees’ perspective. Numerous public and private organizations collected information on enrollee and patient satisfaction, but the surveys varied from sponsor to sponsor and often changed from year to year. The CAHPS® program was designed to:

• Make it possible to compare survey results across sponsors and over time; and

• Generate tools and resources that sponsors can use to produce understandable and usable comparative information for consumers, health providers and for quality improvement purposes.

Over time, the program has expanded beyond its original focus on health plans to address a range of health care services and to meet the various needs of health care consumers, purchasers, health plans, providers, and policymakers. Based on a literature review and an assessment of currently available questionnaires, AHRQ identified the need to develop a health literacy module for the CAHPS® Health Plan Survey. The intent of the health literacy module is to examine health plan enrollees’ perspectives on how well health information is communicated to them by health plans and by healthcare professionals in the health plan setting. The objective of the new module is to provide information to
