program partners/collaborators identified by each Program Director (1–2 partners per Director) as instrumental to the selection and implementation of cancer control EBPs. The survey results will help CDC enhance existing NCCCP efforts by identifying new strategies for promoting the use of evidence-based approaches to comprehensive cancer control. The surveys will also identify technical assistance needs of NCCCP-funded awardees related to selection and implementation of EBPs, and will contribute to CDC’s efforts to build the capacities of states, Tribes, and Pacific Island jurisdictions and territories toward more effective efforts in cancer prevention and control. Finally, the results may lead to new insights and questions that can be addressed in future studies. CDC’s authorization to conduct the study is provided by Section 301 of the Public Health Service Act (42 U.S.C. 241).

OMB approval will be requested for one year. Participation in the study is voluntary. There are no costs to the respondents other than their time.
