minimize litigation, eliminate ambiguity, and reduce burden.

**Protection of Children**

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

**Indian Tribal Governments**

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

**Energy Effects**

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a “significant energy action” under that order because it is not a “significant regulatory action” under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

**Technical Standards**

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

**Environment**

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.1D, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have concluded this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule is categorically excluded, under figure 2–1, paragraph (34)(g), of the Instruction. This rule involves the establishment of a safety zone and as such is covered by this paragraph.

An environmental analysis checklist and a categorical exclusion determination are available in the docket where indicated under ADDRESSES.

EPA is also determining, based on quality-assured, quality-controlled, and certified ambient air monitoring data for the 2007–2009 monitoring period, that these Areas have attained the 1997 annual PM_{2.5} NAAQS by the applicable attainment date of April 5, 2010.

I. What action is EPA taking?

EPA is making the final determination that three Ohio nonattainment areas (the Cleveland-Akron, the Columbus, and the Dayton-Springfield areas) and one Ohio-West Virginia bi-state area (the Steubenville-Weirton area) have attained the 1997 annual PM_{2.5} NAAQS. EPA’s determination is based upon the most recent three years of complete, quality-assured, quality-controlled, and certified ambient air monitoring data for the Areas showing that they have attained attainment of the 1997 annual PM_{2.5} NAAQS based on the 2007–2009 data as well as the 2008–2010 data (see Table 1). EPA is also making the final determination, in accordance with EPA’s PM_{2.5} Implementation Rule of April 25, 2007 (72 FR 20664), that the Areas have attained the 1997 annual PM_{2.5} NAAQS by their applicable attainment date of April 5, 2010.

EPA published in the Federal Register its proposed determination for the four nonattainment Areas on May 17, 2011 (76 FR 28393). A detailed discussion of the rationale for the determination, and the effect of the determination, was included in the proposal. EPA received no comments on the proposed rule.
