SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 et seq.) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222–226).

The SWFSC proposes to conduct research on leatherback sea turtles to continue long-term monitoring of their status off the coasts of California, Oregon, and Washington. This purpose of the work is to identify critical forage habitats, genetic stock structure, migratory corridors, and potential fishery impacts for leatherbacks. Up to 55 sea turtles would be located annually through aerial surveys and subsequently approached from a research vessel for remote tissue sampling and attachment of a suction-cup transmitter. After tag attachment a subset of the animals would be captured by breakaway hoopnet for additional research procedures before release: measure; weigh; flipper and passive integrated transponder tag; ultrasound; tissue, blood, cloacal swab and fat sample; opportunistically sample feces and stomach contents; photograph/video; insertion of a stomach pill; transmitter attachment via suction-cup and drilling through the medial ridge; and/or oxytetracline injection. The permit would be valid for 5 years from the date of issuance.

Dated: September 16, 2011.

SUPPLEMENTARY INFORMATION:

Background

Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 et seq.) direct the Secretary of Commerce to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth. NMFS has defined “negligible impact” in 50 CFR 216.103 as "... * * * an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.”
