SUPPLEMENTARY INFORMATION:

I. Background

On March 7, 2007, the National Practitioner Data Bank (NPDB) published in the Federal Register (72 FR 10227) a notice announcing a Proactive Disclosure Service (PDS) prototype. The PDS was offered as an alternative to the traditional querying of the NPDB and allowed for on-going monitoring of a practitioner’s credentials. PDS is a subscription service that notifies subscribers, which are registered entities that are eligible to query the NPDB or the Healthcare Integrity and Protection Data Bank (HIPDB), of new information on any of their enrolled practitioners within 24 hours of the NPDB or HIPDB receipt of the information. The PDS prototype was available for enrollment beginning on April 30, 2007 to a select group of NPDB registered entities. A few months later PDS was opened to all NPDB registered entities, as well as to those registered in the HIPDB. In the last year (July 1, 2010 through June 30, 2011), 1,965 entities had practitioner enrollments through PDS versus 14,370 entities that submitted traditional queries on
