days, the Port requested authorization for the incidental take of 138 harbor seals (an average of 2 per day), 69 California sea lions (an average of 1 per day), 69 harbor porpoises (an average of 1 per day), and 2 gray whales (2 annually). Based on further consultation with the NMFS Southwest Regional Office and previous authorizations in this region, NMFS is proposing to authorize the take of five gray whales annually, rather than two. These numbers indicate the maximum number of animals expected to occur within the largest Level B harassment isopleth (1,900 m).

Negligible Impact and Small Numbers Analysis and Determination

NMFS has defined “negligible impact” in 50 CFR 216.103 as “* * * an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.” In making a negligible impact determination, NMFS considers a number of factors which include, but are not limited to, number of anticipated injuries or mortalities (none of which would be authorized here), number, nature, intensity, and duration of Level B harassment, and the context in which takes occur.

As described above, marine mammals would not be exposed to activities or sound levels which would result in injury (PTS), serious injury, or mortality. Pile driving would occur in shallow coastal waters of the Columbia River. The area (waters around Terminal 5) is not considered significant habitat for pinnipeds. The closest haul-out is 3.2 km (2 mi) away, which is well outside the project area’s largest harassment zone. Marine mammals approaching the action area would likely be traveling or opportunistically foraging. The amount of take the Port has requested, and NMFS proposes to authorize, is considered small (less than one percent) relative to the estimated populations of 34,233 Pacific harbor seals, 238,000 California sea lions, 9,189 harbor porpoises, and 18,813 gray whales. Marine mammals may be temporarily impacted by pile driving noise. However, marine mammals are expected to avoid the area, thereby reducing exposure and impacts. Pile driving activities are expected to occur for approximately 69 days. Furthermore, San Francisco Bay is a highly industrialized area, so animals are likely tolerant or habituated to anthropogenic disturbance, including low level vibratory pile driving operations, and noise from other anthropogenic sources (such as vessels) may mask construction related sounds. There is no anticipated effect on annual rates of recruitment or survival of affected marine mammals.

Based on the analysis contained herein of the likely effects of the specified activity on marine mammals and their habitat, and taking into consideration the implementation of the mitigation and monitoring measures, NMFS preliminarily determines that the Port’s proposed pile driving activities will result in the incidental take of small numbers of marine mammals, by Level B harassment only, and that the total taking from will have a negligible impact on the affected species or stocks.

Impact on Availability of Affected Species for Taking for Subsistence Uses

There are no relevant subsistence uses of marine mammals implicated by this action.

Endangered Species Act (ESA)

No marine mammal species listed under the ESA are anticipated to occur within the action area. Therefore, section 7 consultation under the ESA is not required.

National Environmental Policy Act (NEPA)

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), as implemented by the regulations published by the Council on Environmental Quality (40 CFR parts 1500–1508), and NOAA Administrative Order 216–6, NMFS is preparing an Environmental Assessment (EA) to consider the direct, indirect, and cumulative effects to marine mammals and other applicable environmental resources resulting from issuance of a one-year IHA and the potential issuance of future authorizations for incidental harassment for the ongoing project. Upon completion, this EA will be available on the NMFS Web site listed in the beginning of this document (see ADDRESSES).

Dated: October 19, 2011.

[Docket ID DOD–2010–OS–0034]

Defense Transportation Regulation, Part IV

AGENCY: United States Transportation Command (USTRANSCOM), Department of Defense (DoD).

ACTION: Notice of announcement.

SUMMARY: Reference Federal Register Notice (FRN), Docket ID: DOD–2010–OS–0034, published April 1, 2010 (75 FR 16445–16446) and subsequently revised April 5, 2011 (76 FR 18737). We have taken industry recommendations into consideration regarding the incorporation of local moves into the intrastate/interstate program. The Surface Deployment and Distribution Command (SDDC) is conducting a Direct Procurement Method (DPM) feasibility study to determine how local moves could be better managed to serve our DoD customers. Industry will be notified of any subsequent DoD decisions associated with the future of local moves. We thank our industry partners for their review and important suggestions to improve the Defense Personal Property Program (DP3).

FOR FURTHER INFORMATION CONTACT: Mr. Jim Teague, United States Transportation Command, TCJ5/4–PI, 508 Scott Drive, Scott Air Force Base, IL 62225–5357; (618) 220–4803.

Dated: October 21, 2011.

Aaron Siegel,
Alternate OSD Federal Register Liaison Officer, Department of Defense.

Withdrawal of the Notice of Intent To Prepare a Programmatic Environmental Impact Statement for the Stationing and Operation of Joint High Speed Vessels

AGENCY: Department of the Army, DoD.

ACTION: Notice of intent; withdrawal.

SUMMARY: On February 5, 2010, the Department of the Army announced in the Federal Register (75 FR 6003) its intention to prepare a Programmatic Environmental Impact Statement (PEIS) for the stationing and operation of up to 12 Joint High Speed Vessels (JHSV). In May 2011, the Army’s JHSV were transferred to the U.S. Navy; therefore,
