This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE
Animal and Plant Health Inspection Service

7 CFR Part 319
Importation of French Beans and Runner Beans From the Republic of Kenya Into the United States

AGENCY:  Animal and Plant Health Inspection Service, USDA.

ACTION:  Final rule.

SUMMARY:  We are amending the fruits and vegetables regulations to allow the importation of French beans and runner beans from the Republic of Kenya into the United States. As a condition of entry, both commodities will have to be produced in accordance with a systems approach that would include requirements for packing, washing, and processing. Both commodities will also be required to be accompanied by a phytosanitary certificate attesting that all phytosanitary requirements have been met and that the consignment was inspected and found free of quarantine pests. This action will allow for the importation of French beans and runner beans from the Republic of Kenya into the United States while continuing to provide protection against the introduction of plant pests.

DATES:  Effective Date:  December 5, 2011.

FOR FURTHER INFORMATION CONTACT:  Mr. Marc Phillips, Import Specialist, Regulatory Coordination and Compliance, PPQ, APHIS, 4700 River Road, Unit 133, Riverdale, MD 20737; (301) 734–4394.

SUPPLEMENTARY INFORMATION:

Background

The regulations in “Subpart—Fruits and Vegetables” (7 CFR 319.56–1 through 319.56–53, referred to below as the regulations) prohibit or restrict the importation of fruits and vegetables into the United States from certain parts of the world to prevent the introduction and dissemination of plant pests within the United States.

On March 25, 2011, we published in the Federal Register (76 FR 16700–16703, Docket No. APHIS–2010–0101) a proposal 1 to amend the regulations by allowing French beans and runner beans from the Republic of Kenya to be imported into the United States if they are cut, shredded, or split and inspected for quarantine pests, and if certain other requirements are met.

We solicited comments concerning our proposal for 60 days ending May 24, 2011. We received two comments by that date. They were from a State department of agriculture and a member of the general public.

One commenter stated opposition to the importation of French and runner beans from Kenya without raising any issues related to the pest risk analysis or proposed rule.

The other commenter recommended that shipments of French and runner beans from Kenya not be permitted entry into the commenter’s State until the shipping protocol has had sufficient time to demonstrate the effectiveness of the proposed mitigation measures.

The pest risk analysis we prepared for this action, which includes a qualitative, pathway-initiated pest risk assessment and a risk management document, not only identifies 10 quarantine pests that could potentially accompany shipments of fresh French and runner beans from Kenya, but also identifies mitigation measures that must be completed before these commodities can be safely imported into the United States. The cutting or shredding and splitting of the bean described in the proposed rule will expose and allow detection of internal feeders, thereby mitigating the risk of the quarantine pests being introduced into the United States via the importation of this commodity. As we receive imports from the program, we will continue to evaluate the effectiveness of the program.

Therefore, for the reasons given in the proposed rule and in this document, we are adopting the proposed rule as a final rule, without change.

Executive Order 12866 and Regulatory Flexibility Act

This final rule has been has been determined to be not significant for the purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

In accordance with the Regulatory Flexibility Act, we have analyzed the potential economic effects of this action on small entities. The analysis is summarized below. Copies of the full analysis are available by contacting the person listed under FOR FURTHER INFORMATION CONTACT or on the Regulations.gov Web site (see ADDRESSES above for instructions for accessing Regulations.gov).

Kenya produced an average of about 37,000 metric tons (MT) of French beans per year between 2004 and 2009, of which it exported an average of about 34,000 MT, primarily to the European Union (EU). The EU provides a well-established market, and it is unlikely that there would be a large diversion of French bean exports by Kenya from this market to the United States.

To examine potential effects of the rule for U.S. small entities, we model three levels of French bean exports to the United States from Kenya, of increasing magnitude: The amount that Kenya expects to export to the United States (800 MT), and amounts equal to 5 percent and 10 percent of Kenya’s average annual exports worldwide, 2004–2009 (1,750 MT and 3,500 MT). The largest assumed level is equivalent to 1.3 percent of average annual consumption by the United States during this same period.

Yearly French bean imports from Kenya of 3,500 MT are estimated to result in a price decline of $12.35 per MT, or less than 1 cent per pound in the wholesale price of green beans, and a fall in U.S. production of 1,838 MT.

Consumer welfare could decline by $2.84 million and consumer welfare could increase by $3.25 million, yielding an annual net welfare gain of about $410,000.

While most U.S. green bean producers are small entities, the annual decrease in producer welfare per small entity for the 3,500 MT import scenario is
estimated to be only about $64, or about 0.7 percent of average annual sales by small entities. The dollar decrease in welfare for most small fresh bean producers would be even smaller, given that the majority planted less than an acre in green beans in 2007, while the average area planted in green beans by small-entity producers was 2.4 acres. Also, effects are likely to be smaller than indicated, to the extent that fresh French bean imports from Kenya would displace fresh bean imports from other countries.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

**Executive Order 12988**

This final rule allows French beans and runner beans to be imported into the United States from the Republic of Kenya. State and local laws and regulations regarding French beans and runner beans imported under this rule will be preempted while the fruit is in foreign commerce. Fresh fruits and vegetables are generally imported for immediate distribution and sale to the consuming public, and remain in foreign commerce until sold to the ultimate consumer. The question of when foreign commerce ceases in other cases must be addressed on a case-by-case basis. No retroactive effect will be given to this rule, and this rule will not require administrative proceedings before parties may file suit in court challenging this rule.

**Paperwork Reduction Act**

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.), the information collection or recordkeeping requirements included in this rule have been approved by the Office of Management and Budget (OMB) under OMB control number 0579–0373.

**E-Government Act Compliance**

The Animal and Plant Health Inspection Service is committed to compliance with the E-Government Act to promote the use of the Internet and other information technologies, to provide increased opportunities for citizen access to Government information and services, and for other purposes. For information pertinent to E-Government Act compliance related to this rule, please contact Mrs. Celeste Sickles, APHIS’ Information Collection Coordinator, at (301) 851–2908.
