This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 20, 30, 40, 50, 70, and 72

RIN 3150–A155

Decommissioning Planning During Operations

AGENCY: Nuclear Regulatory Commission.

ACTION: Draft regulatory guide; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment a draft regulatory guide (DG) DG–4014, “Decommissioning Planning During Operations.” This guide describes a method that the NRC staff considers acceptable for use in complying with the NRC’s Decommissioning Planning Rule.

DATES: Submit comments by February 10, 2012. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. Although a time limit is given, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

ADDRESSES: Please include Docket ID NRC–2011–0286 in the subject line of your comments. For additional instructions on submitting comments and instructions on accessing documents related to this action, see “Submitting Comments and Accessing Information” in the SUPPLEMENTARY INFORMATION section of this document. You may submit comments by any one of the following methods:

• Mail comments to: Cindy Bladey, Chief, Rules, Announcements, and Directives Branch (RADB), Office of Administration, Mail Stop: TWB–05–B01M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

• Fax comments to: RADB at (301) 492–3446.

SUPPLEMENTARY INFORMATION:

Submitting Comments and Accessing Information

Comments submitted in writing or in electronic form will be posted on the NRC Web site and on the Federal rulemaking Web site, http://www.regulations.gov. Because your comments will not be edited to remove any identifying or contact information, the NRC cautions you against including any information in your submission that you do not want to be publicly disclosed.

The NRC requests that any party soliciting or aggregating comments received from other persons for submission to the NRC inform those persons that the NRC will not edit their comments to remove any identifying or contact information, and therefore, they should not include any information in their comments that they do not want publicly disclosed.

You can access publicly available documents related to this document using the following methods:

• NRC’s Public Document Room (PDR): The public may examine and have copied, for a fee, publicly available documents at the NRC’s PDR, O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

• NRC’s Agencywide Documents Access and Management System (ADAMS): Publicly available documents created or received at the NRC are available online in the NRC Library at http://www.nrc.gov/reading-rm/adams.html. From this page, the public may gain entry into ADAMS, which provides text and image files of the NRC’s public documents. If you do not have access to ADAMS or if there are problems in accessing the documents located in ADAMS, contact the NRC’s PDR reference staff at 1–(800) 397–4200, (301) 415–4737, or by email to pdr.resource@nrc.gov. DG–4014 is available electronically under ADAMS Accession Number ML111590642. The regulatory analysis is available electronically under ADAMS Accession Number ML111590649.

• Federal Rulemaking Web Site: Public comments and supporting materials related to this notice can be found at http://www.regulations.gov by searching on Docket ID NRC–2011–0286.

Further Information

The NRC is issuing for public comment a draft guide in the agency’s “Regulatory Guide” series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC’s regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide entitled, “Decommissioning Planning During Operations,” is temporarily identified by its task number, DG–4014, which should be mentioned in all related correspondence. DG–4014 is a proposed Regulatory Guide to support implementation of the Decommissioning Planning Rule (ADAMS Accession Number ML103510117).

This guide describes a method that the NRC staff considers acceptable for use in complying with the NRC’s Decommissioning Planning Rule (DPR), which will become effective on December 17, 2012 (76 FR 35511; June 17, 2011). That rule will amend portions of 10 CFR parts 20, 30, 40, 50, 70, and 72, relative to decommissioning planning. The DPR will affect a wide range of facilities and its purpose is to reduce the likelihood that any current operating facility will become a legacy site, that is, one without the financial means to close permanently.

Backfitting and Issue Finality

The statement of considerations for the DPR discussed that rule’s compliance with applicable backfitting provisions (76 FR 35511, at 35562–63). This regulatory guide presents the NRC staff’s first guidance addressing compliance with § 20.1501(a) and (b)
DEPARTMENT OF ENERGY  
10 CFR Part 900  
RIN 1901–AB18  

Coordination of Federal Authorizations for Electric Transmission Facilities  

AGENCY: Office of Electricity Delivery and Energy Reliability, Department of Energy.  

ACTION: Notice of proposed rulemaking.  

SUMMARY: The Department of Energy (DOE) proposes to amend its regulations for the timely coordination of Federal authorizations for proposed interstate electric transmission facilities pursuant to section 216(h) of the Federal Power Act (FPA). The proposed rule would require permitting entities to inform DOE of requests for authorizations required under Federal law for Qualifying Projects as defined in the rule, as well as establish a process whereby applicants for Federal authorizations for interstate electric transmission facilities that are not Qualifying Projects can request DOE assistance in the Federal authorization process. Also, the proposed rule provides for the selection of a Federal Lead Agency responsible for compiling a single environmental review document, and a consolidated administrative record, for Qualifying Projects. In addition, the proposed rule provides for the establishment of intermediate and final deadlines for the review of Federal authorization decisions, as well as establishing a date certain after which all permit decisions and related environmental reviews under all applicable Federal laws shall be completed within one year, or as soon thereafter as practicable in compliance with Federal law.  

DATES: Public comment on this proposed rule will be accepted until January 27, 2012.  

ADDRESSES: Interested persons are encouraged to submit comments, identified by “Proposed 216(h) Regulations,” by any of the following methods:  
Email: Brian.Mills@hq.doe.gov. Include “Proposed 216(h) Regulations” in the subject line of the message.  

SUPPLEMENTARY INFORMATION:  

I. Background  

A. Statutory Authority and Rulemaking History  

Section 1221(a) of the Energy Policy Act of 2005 (Pub. L. 109–58) (EPAct05) added a new section 216 to the FPA (16 U.S.C. 791–828c) which deals with the siting of interstate electric transmission facilities. Section 216(h) of the FPA (16 U.S.C. 824p(b)), which is titled “Coordination of Federal Authorizations for Transmission Facilities,” provides for DOE to coordinate all applicable Federal authorizations for the siting of interstate electric transmission facilities and related environmental reviews.  

Section 216(h) of the FPA provides for the coordination of Federal transmission siting determinations for entities seeking permits, special use authorizations, certifications, opinions, or other approvals required under Federal law to site electric transmission facilities. This coordination avoids duplicative review processes by various Federal agencies. In addition, section 216(h) also provides that Indian tribes, multi-State entities, and State agencies that have their own separate permitting and environmental reviews can
