Description of Proposed Impose and Use Project

Terminal B/C Connector. This project will construct a 40-foot-wide passenger connector hallway between the secured side of Concourses B and C in order to allow connecting passengers the ability to move freely between Concourse B and C without having to exit the secure side of one concourse and having to be rescreened at a passenger screening checkpoint of the other concourse. The project will also include the widening of Concourse C to provide fire/life safety compliance with required ingress/egress of passengers. In addition, the existing 6-lane passenger security checkpoint for Concourse C will be relocated and expanded to a total of 9 passenger screening lanes to allow for more efficient passenger screening times during peak periods. The existing airline outbound baggage conveyance system will be required to be reconfigured to accommodate the Concourse B/C Connector project along with the relocation/reconfiguration of several airport concessions.
