Title: NSPS for Petroleum Refineries (Renewal).

ICR Numbers: EPA ICR Number 1054.11, OMB Control Number 2060-0022.

ICR Status: This ICR is scheduled to expire on December 31, 2011. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, and displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The New Source Performance Standards (NSPS) for Petroleum Refineries were promulgated on March 8, 1974, and amended on October 2, 1990. These regulations apply to the following affected facilities in petroleum refineries: Fluid catalytic cracking unit catalyst regenerators, fuel gas combustion devices, and Claus sulfur recovery plants of more than 20 long tons per day commencing construction, modification, or reconstruction after the date of proposal.

Owners or operators of subpart J facilities are required to comply with reporting and recordkeeping requirements, and maintain records of specific information needed by EPA to determine if compliance has been achieved. Sources are required to submit semiannual reports of excess emissions. These notifications, reports, and records are essential in determining compliance; and, in general, are required of all sources subject to NSPS.

Affected sources are required to complete initial notifications, performance tests, and periodic reports. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance; and, in general, are required of all sources subject to NSPS.

All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA

regional office. This information is being collected to assure compliance with 40 CFR part 60, subpart J, as authorized in sections 112 and 114(a) of the Clean Air Act. The required information consists of emissions data and other information that have been determined to be private.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 53 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Petroleum refineries.

Estimated Number of Respondents: 150.

Frequency of Response: Occasionally, initially, and semiannually.

Estimated Total Annual Hour Burden: 15,784.

Estimated Total Annual Cost: \$2,229,986, which includes \$1,510,886 in labor costs, no capital/startup costs, and \$719,100 in operation and maintenance (O&M) costs.

Changes in the Estimates: The adjustment increase in burden from the most recently approved ICR is due to a more accurate estimate of existing sources. Consultations with the Office of Air Quality Planning and Standards (OAQPS) and trade associations reveal that there are approximately 150 sources subject to the rule, as compared with the active ICR that shows 132 sources. There are no new facilities expected to be constructed over the next three years of this ICR. There is also an increase in the estimated burden cost as currently

identified in the OMB Inventory of approved Burdens. The increase is not due to any program changes. The change in burden cost is due to the use of the most updated labor rates.

Because there are no new sources with reporting requirements, no capital/startup costs are incurred. The only cost that is incurred is for the O&M of the monitoring equipment.

Dated: December 16, 2011.

John Moses,

Director, Collection Strategies Division.

Title: Establishing No-Discharge Zones Under Clean Water Act § 312 (Renewal).

ICR numbers: EPA ICR No. 1791.06, OMB Control No. 2040-0187.

ICR Status: This ICR is scheduled to expire on December 31, 2011. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for

The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: (A) *Sewage No-discharge Zones:* The need for EPA to obtain information for the establishment of no-discharge zones (NDZs) for vessel sewage in State waters stems from CWA §§ 312(f)(3), (f)(4)(A), and (f)(4)(B), and subsequent regulations at 40 CFR 140.4(a-c). No-discharge zones are established to provide State and local governments with additional protection of waters from treated or untreated vessel sewage. There are three ways in which NDZs for vessel sewage can be established. This ICR discusses the information requirements associated with the establishment of NDZs for vessel sewage. The responses to this collection of information are required to obtain the benefit of a sewage NDZ (see 33 U.S.C. 1322). The information collection activities discussed in this ICR do not require the submission of any confidential information.

(B) *UNDS No-discharge Zones:* Under section 312(n) of the Clean Water Act ("Uniform National Discharge Standards for Vessels of the Armed Forces" or "UNDS") no-discharge zones ("NDZs") for discharges from Armed Forces vessels may be established by either State prohibition or EPA prohibition following the procedures in 40 CFR Part 1700. UNDS also provides that the Governor of any State may petition EPA and the Secretary of Defense to review any determination or standard promulgated under the UNDS program if there is significant new information that could reasonably result in a change to the determination or standard. This ICR discusses the information that will be required from a State if it decides to establish a NDZ by State prohibition or apply for a NDZ by EPA prohibition, and the information that will be required from a State if it decides to submit a petition for review. The responses to this collection of information are required to obtain the benefit of an UNDS NDZ or a review of an UNDS determination or standard (see 33 U.S.C. 1322(n)). The information collection activities discussed in this ICR do not require the submission of any confidential information.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is
