range of alternatives to the proposed action, including alternative sites for an IIFP facility, alternative technologies, shipment of the U.S.-generated DUF6 to overseas facilities, and the four U.S.-based enrichment companies to construct and operate their own deconversion facilities. These alternatives were eliminated from further analysis due to economic, environmental, or other reasons. The proposed action and the no-action alternative were analyzed in detail. The no-action alternative serves as a baseline for comparison of the potential environmental impacts of the proposed action.
